I. Requirements

The Wisconsin Comprehensive Planning Law, herein known as the Smart Growth Law, Section 66.1001(4)(a) Statute requires the City to:

“Adopt written procedures that are designed to foster public participation, including open discussion, communication programs, information services and public meetings for which advance notice has been provided, in every stage of the preparation of a comprehensive plan. The written procedures shall provide for wide distribution of proposed, alternative or amended elements of a comprehensive plan and shall provide an opportunity for written comments on the plan to be submitted by members of the public to the governing body and for the governing body to respond to such written comments.”

II. Purpose

The purpose of this procedure is to fulfill the requirements of Wisconsin Smart Growth Law by providing early and continuous public participation opportunities at all stages of the planning process.

This public involvement procedure has been prepared to establish a proactive public involvement process for the development of the City's Comprehensive Plan and its components. The procedure brings together diverse stakeholder viewpoints and values early into the decision-making process enabling a common vision to make informed decisions, improve quality through collaborative efforts and build mutual understanding and trust between the City and the public it serves. It is designed as a general framework for all comprehensive plans.

III. Public Participation Goal and Policies

Further, plans need to be reassessed periodically to determine if the public's evolving needs and expectations are adequately being met. By adhering to the following goal and policies, this procedure ensures that the public will be kept informed of activities and given meaningful opportunities to participate in the development and review of public plans and policy.

Goal: The comprehensive planning process seeks to provide to the public complete information, timely notice, and full access to key decisions; and shall support early and continuing involvement of the public.

Policy 1: The City will provide the public with timely notice and reasonable access to information about physical development issues and processes.

Policy 2: The City will create opportunities for the public to become informed about issues and proposals under consideration.

Policy 3: The City will share with the public the tasks of identifying concerns, developing alternatives and evaluating policies to address the concerns.

Policy 4: The City will be diligent in its follow-up to public requests for information and further participation.

Policy 5: The City will listen and respond to suggestions made by the public.

Policy 6: The City will foster candid information exchanges and ongoing two-way communication using a variety of mediums.
