Hello,

I am writing to encourage all to PLEASE oppose the proposed data center at the Midtown Center. We know all too well how these data centers impact communities and the environment around them. This area has a high population of low-income families who will not be able to afford the increased energy bills, and they should not be subjected to the never ending noise of the cooling systems, dirty drinking water, or low water pressure in their own homes. Our Great Lakes are a national treasure, we must take care of them instead of cause damage we cannot undo!

We do not need a data center in this community, nor any more data centers at all! What we need is to take care of the people in it who are already struggling and our Great Lakes! It is time we wake up and take care of our home and not the greedy billionaires who will not face any of the repercussions!

By and large, the constituents in this area oppose the data center. Please do your job in representing their wishes.

MaKenna Kurth
