Hello, I'm sending this email in regards to the proposal of a Data Center being built on N 60th street.

While I do support AI in some ways, I do not support generative AI. It does far more damage than good and isn't done in a proper way to be on such a large scale at this point in time.

I hold the personal belief that Generative AI is not ready to be on a global scale and the rush to put it at that point is going to lead to the downfall of it. I highly oppose the Data Center due to this.

Thank you for this opportunity to make our voices as a community heard.
