

STEMCON

Science Technology Engineering and Math Convention

April 8, 2016

Best STEM Practices for the Next Generation

The STEM Conference is the place for science, technology, math, and engineering educators and industry professionals to share best practices, resources, and strategies to prepare the next generation for the jobs of tomorrow.

In 2015, over 350 STEM educators and industry leaders attended the day-long conference with sponsors and exhibitors sharing their products and services, including NASA and Cleveland State University. As the focus on STEM education grows, so does The STEM Conference.
