Subject: Data Center Absentee Testimony

[Some people who received this message don't often get email from haileyproebsting@gmail.com.
Learn why this is important at <https://aka.ms/LearnAboutSenderIdentification>]

Hi there,

My name is Hailey Proebsting - I am a resident in the City of Milwaukee and I am emailing to record and express my distress and concern at the possibility of a data center on 60th and Capitol.

Data centers anywhere are of concern, especially in a location where people live and work - the construction and creation of this building will put further ecological strain on an already marginalized and overburdened area. It seems of no surprise that the city is trying to implement this in a historically black/brown neighborhood. Furthermore, who will pay for the energy bill. Similar projects have proposed that the price to operate be offset by existing we energies consumers. There is no faction of residents asking for this and certainly no group wishing to increase the already unreasonable energy bill. This center will not create any sustainable jobs and will only put a strain on our fresh water source: Lake Michigan.

Please consider the voices of the residents of this city and do not move forward with any plans to place a data center in the city.

Thank you,
Hailey Proebsting
