Hello!

Not a MKE resident, but was for a decade and plan to move back someday once life allows. I just want to note my support for any actions to gain control of the 30th St corridor. I bike to and around MKE regularly, typically to spend money on food and entertainment, or for summer camps with our kids. Improving this route could drastically unlock new places I can get to that now are exceedingly complex and time consuming. A silly example, but I'd like to go to more Brewers games. Improving this route could get me there in a much more direct way, one I might not even be able to reach currently due to distance. Run some trains along side and I'd be pretty happy about that!
