

Hi sir

My name is Emad Emran I have been driving a taxi in the city of milwaukee for the past 17 years in the last 5 years business has been declining badly as everyone knows the largest taxicab company American United has most of its fleet grounded due to lack of business which drives drivers to quit working,even with the most of America United fleet grounded there is not enough business for the rest of the fleet,even with a quick look at the taxicab company the yellow cab you will notice a long waiting time to pickup a fair at taxicab stands around the city .

Adding more cabs to the city of milwaukee would be detrimental to 400 families already making some living ,please consider your decision before making it.

Thank you
