Subject: Data Center Comment (May 18th meeting)- Kelsie Barlow

Some people who received this message don't often get email from kelsieleesmwi@gmail.com. [Learn why this is important](#)

My name is Kelsie Barlow and I am a resident in the Hampton Heights neighborhood. I am nothing short of disgusted by our city for even considering letting a data center be built in this already disenfranchised area. Resources are already low in this area, and you want to deplete them even more for families who can't afford to move or change their circumstances? SHAME ON YOU. I recently moved to the area, and can't believe I already have to consider moving again because living near a data center could affect our quality of life.

It's also shameful that I only heard about this happening this morning, when it was almost too late for me to say my piece. It is equally as shameful that this meeting is being held in the middle of a work day when many can't attend. I would love to attend, but I work a full time job and can't just call out because I need the money.

If you build this data center, it will not be received in peace. There will be unrest in the community, and citizens will not fold to the wishes of the wealthy. Our community doesn't need a data center, it needs the city to care about the infrastructure, and improving public resources. Please get a grip. We don't want a data center in our neighborhood. Thank you.
