Some people who received this message don't often get email from ansarm@netscape.net. [Learn why this is important](#)

Good morning

Lets make a change and start being on the right side of history.

Data centers pose ecological, logistical and ethical questions.
Please watch <https://youtu.be/hiPCeP-ufak?si=pN0hO3ofGBoXG-H0>

Wisconsin and Milwaukee city need to say NO to these monstrosities.

To make it worse the location is obviously chosen for a low income area. Try River Hills, plenty of empty space there. (This is sarcasm)

Data centers tie into flock cameras etc and are against our basic rights to privacy.
Besides causing well documented health issues.
