Dear admin:

Please rethink the proposal of a data center in Midtown.

A data center in the middle of our city is not what we need and will negatively impact every citizen in the city. Please don't pollute our waters and create an even larger barrier for low income communities who do not stand a chance in this city with large barriers in education, environmental protection and housing/utility costs. Please do your part to this city and help humans survive the already alarming crisis we face.

Data center facts:

- They cause cancer
- They destroy the environment
- They provide little to no long term jobs
- They pass along energy costs to the community, when utility bills are already out of control

Please DO NOT allow this data center to be created in midtown or anywhere in Milwaukee county. This will create an unhealthy environment for everyone in the Milwaukee area, yourself included.
