

Project Overview

Fresh Coast Protection Partnership (FCPP) Program

- The Fresh Coast Protection Partnership (FCPP) is a public-private partnership that seeks to provide a cost-effective, large-scale increase in GI implementation in the District's green infrastructure service area.
- Key Outcomes for Program:
 - 8.45 million gallons of capacity will be developed
 - 25% utilization of SMWBE will be developed.
- Funding Source:
 - FCPP covers design and construction associated with GI
 - Funding includes 5 years of maintenance

License Agreement

- Authorizes access for construction
- Cost-share agreement for soil disposal
- FCPP provides 5 years of maintenance
- RACM maintains for at least 6 additional years
- 11-year conservation easement signed upon completion
