Willis was engaged to prepare a 2007 rate recommendation for the City of Milwaukee's Basic Plan, the self-insured medical and prescription drug plan. This plan is split into two components: Base and Major Medical. The plan year is 1/1/2007-12/31/2007.

Effective 1/1/2006, the City changed the medical and prescription drug claim administrators for the Basic Plan. The medical claims administrator was changed from WPS to CMS and the prescription drug claims administrator was changed from Medco to Navitus.

There was an influx of active and under 65 members from the HMO plan into the Basic Plan on 1/1/2006. Active enrollment increased by 48% and under 65 enrollment increased by 17%. Over 65 enrollment decreased by 7%. It is anticipated that the employees and retirees who have changed coverage from the HMO to the Basic Plan will have a claim cost similar to other Basic Plan participants in 2007.

Administrative costs are included in the 2007 rates. The expense per contract for medical claims administration for 2007 is \$25.50 for actives, \$22.00 for under 65 retirees and \$18.25 for over 65 retirees. The expense per member for prescription drug claims administration is \$4.01 for actives and under 65 retirees. The administrative charge for the Wrap plan for Medicare eligible retirees is \$6.24 per participant per month. Overall, this results in an expense component in the rates of 2.1% for medical and .8% for prescription drug.

The details of the 2007 rate calculation are shown in Attachment 1. The base period claim data used for the projection was 6/30/2005-5/31/2006. The cost projection has been split into active, under 65 retirees and over 65 retirees. Because of the way that claim data is maintained on the CMS system it was not possible to obtain claim data by retiree plans 1-10. Because of the low enrollment in a few of these plans and lack of credible experience data, it is not recommended to experience rate each plan.

Trend rates used to project 6/1/2005-5/31/2006 experience to 2007 were 12% for both medical and prescription drug.

The rate calculation has resulted in a 1.2% decrease in 2007 rates compared to 2006 rates for active employees and under 65 retirees. The rate decrease has resulted from provider network discounts.

Over 65 retirees will be moved to a Medicare Part D Prescription Drug Plan (PDP) and a Wrap Plan beginning 1/1/2007 and will benefit from the resulting drug cost savings. The total per member per month savings are expected to be \$100.40 per Medicare eligible member which will be passed on to the retiree.

The details of the expected savings resulting from the adoption of the PDP/Wrap are shown in Attachment 2.
