

The **Integrated** School Safety Platform

Atlas One is an integrated School Safety platform that combines real-time alerting and geo-fenced communication, safety plan management and publishing, anonymous two-way tipping, and expedited law enforcement notifications via panic buttons and secure internal communications.

**Geo-Fenced
Messages & Alerts**

**Interactive Safety
Guides & Training**

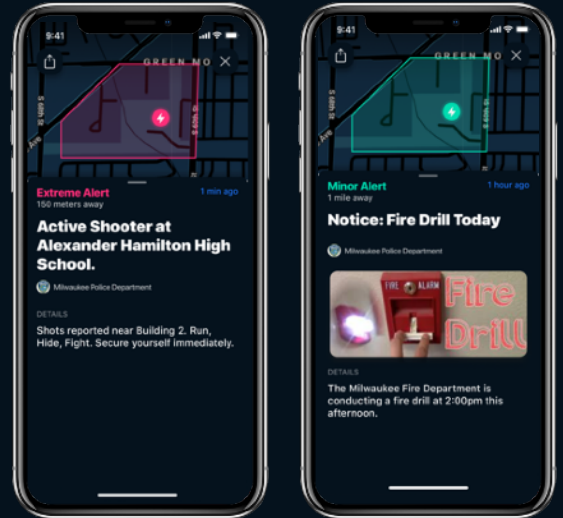

**Anonymous
Two-Way Tipping**

**Panic Button
App**

Geo-Fenced Messages & Alerts

Send dynamic geo-fenced alerts to everyone inside a specific location such as a campus or building. Simply draw a geo-fence on a map and everyone inside will be alerted. Private messages can also be securely sent to campus security.

Interactive Safety Guides & Training

With Atlas One's No-Code App Builder, publish interactive safety guides and resources such as active shooter training, directories, safety maps, and plans. Guides will be immediately updated for students to access through the Atlas One app.

Anonymous Two-way Tipping

Students can anonymously report crime tips, bullying, and suspicious activity, and even enter into a live two-way chat with campus administration, security, or public safety officials. Tips include text, location, and multimedia such as photos and videos.
