Subject: Data Center at Midtown

Some people who received this message don't often get email from nmstevenson3@gmail.com. [Learn why this is important](#)

Hello,

I'm writing to you today to inform you that I'm against building a Data Center in Midtown Milwaukee Sherman Park area or anywhere in the area and our state!

You should be ashamed of yourself even considering this in the community and our beautiful state. These data centers will be the death of our waterway, our air quality, to humans, wildlife and the already polluted environment. Have you noticed how dirty cars are when it rains now? It's raining dirt and chemicals on EVERYTHING!! DOESN'T THAT CONCERN YOU? This is even before adding a data center!! Don't you have children and loved ones that you care about? Oh you're probably not from the area so you don't care!

I thought the DNR and Environmental groups cared about the damage already done to the earth and yet here you are considering adding a data center. Look at the damage being done in other areas across the country including Port Washington, WI!!

People know what a disaster this is to humans, wildlife and the planet. This is not for more data storage, people know this by now what the agenda is for these centers. We lived all these years without data centers and we'll be even better without them.

DO NOT BUILD THE DATA CENTER!!!!

Sincerely,

Nadine S. - a very concerned citizen
