Hello,

My name is Lian Markovich and I am a constituent in Alderman Alex Brower's district.

I want to give testimony that as a longtime Milwaukee resident, Data Centers are a BIG NO. They do not benefit our city and the environmental impact on public health is detrimental. They take our resources and poison our communities, giving them long lasting health issues.

Additionally, this plan is for the North of Milwaukee, where a majority of the residents are Black and Brown who have been historically targeted harmful city planning. Don't continue adding to this.

Remember that the politicians and the city of Milwaukee serve US, work for US, and are here to make OUR lives better - not worse. We don't want this and if the data center plans to move ahead, you better prepare for us to go even harder to protect our people.
