attached is the picket fence picture

I don t understand the gutter request for a certificate.

The gutters on the building were what was there prior to Shingling 14 years ago. Replaced? Yes, but the same design as what was removed. I will be replacing a gutter of 15 feet on the southeast corner as it has rusted through. Galvanized metal with a three inch flange....one piece. You could certificate that also. Let me know if you need more information.
