

Reply to Common Council File No. 051467
From DOA-Budget and Management Division

January 8, 2009

Ref: 06013

Common Council File 051467 is a resolution authorizing the Department of Administration to enter into an agreement with Milwaukee County Automated Mapping and Land Information Systems (MCAMLIS) for professional and technical services in the maintenance of cadastral maps and street address database.

The City of Milwaukee participates in the implementation of MCAMLIS, which is overseen by a Steering Committee. The Steering Committee, which includes a representative of the city, approved an agreement on February 7, 2006 that obligates the DOA Information and Technology Management Division to maintain and update cadastral maps and map data in a format consistent with that used by MCAMLIS. To perform this function, ITMD requires authority for one new position. The position will be funded entirely from revenues received from MCAMLIS.

The file amends the Positions Ordinance to add one GIS Developer Position, which is footnoted to have position authority expire unless the MCAMLIS agreement is extended. MCAMLIS will pay the city \$74,915 for services from July 1, 2006 through June 30, 2007. There is no fiscal impact to the city.

Entering into this agreement will ensure that both the city and Milwaukee County maintain cadastral maps and store data using the standard MCAMLIS geodatabase format. This will not only facilitate intergovernmental sharing of data, it will also enhance the capabilities of city applications, including MapMilwaukee and COMPASS, by providing more timely access to updated and consistent information.

RECOMMENDATION: ADOPT FILE NUMBER 051467.
