PROJECT PLAN

TAX INCREMENTAL DISTRICT NO. 62

CITY OF MILWAUKEE

(DRS Power & Control Technologies Project)

Public Hearing Held: November 17, 2005

Redevelopment Authority Adopted: November 17, 2005

Common Council Adopted:

Joint Review Board Approval:

I. DESCRIPTION OF PROJECT

A. Introduction

Section 66.1105(4)(d), Wis. Stats. Requires the "preparation and adoption of a project plan for each tax incremental district." This Project Plan is submitted in accordance with this statutory requirement.

B. District Boundaries & Compliance with Statutory Eligibility Criteria

Tax Incremental District No. 62, City of Milwaukee (the "District") consists of a single 22.7 acre site located at 4265 N.30th Street. (Tax Key No. 246-9998-110-5). The District is shown on Map 1, "Boundary and Existing Land Use," and described in Exhibit 4, "Boundary Description."

The District is presently zoned IH (Industrial Heavy). The 600,000 s.f. manufacturing building on the property is owned and operated by DRS Power & Control Technologies, Inc.. DRS is a supplier of defense technology systems to the U.S. military and intelligence agencies, major aerospace and defense contractors and international military forces. Nationally, DRS employs 5700 and has other facilities in New Jersey, Connecticut, California, Texas, Florida, Ohio, Pennsylvania, Massachusetts, and Colorado. The company is traded on the NYSE (symbol:DRS) and reported annual revenue of \$1.3 billion.

In Milwaukee, DRS designs and manufactures power generation, conversion, and distribution equipment for ship propulsion systems for the U.S. Navy and for industrial applications. DRS employs 370 people at this location, principally engineers, engineering technicians, and skilled assemblers. Average wages for unionized manufacturing and testing positions at this site is \$19/hr. Technical and administrative staff averages \$34/hr.

The DRS facility was constructed in 1956 as a dual use facility for Cutler-Hammer, Inc. and is currently outdated and inefficient, particularly with respect to HVAC systems, engineering spaces, shop layout and overall utilization. Of the 600,000 s.f., DRS is currently using only 350,000 s.f. Also, of the 600,000 s.f., 165,000 s.f. is located in the basement and cannot be used efficiently for manufacturing.

Given the condition of the facility, the District satisfies the requirements of Wis. Stats. Sec 66.1105(4)(gm)(4)(a) as being a "in need of rehabilitation and conservation work, as defined in Sec. 66.1337 (2m)(b)."

Over the last seven years, the assessment of improvements in the District has always exceeded the land assessment. Accordingly, the District is not "vacant" property, as provided in Sec. 66.1105(4)(gm)(1).

C. Project Plan Goals and Objectives

Goals and objectives for the District are:

- 1. To modernize the DRS facility in the District for high-technology manufacturing and assembly use, plus related design and engineering functions. Modernization consists of facility infrastructure repair and replacement including window replacement, roof repair and replacement, upgrades and replacement of HVAC, electrical and fire protection systems.
- 2. The project will enhance the company's lean manufacturing processes, and expand its power conversion testing and research laboratory. The new facility will be capable of testing a complete set of Navy power systems, creating a power conversion center of excellence in Milwaukee.
- 3. To generate space for additional manufacturing uses. Since DRS will occupy 343,000 s.f. of the upgraded facility, 249,000 s.f. will be available for lease to other business.
- 4. To increase employment opportunities, particularly jobs that provide family supporting wages. DRS anticipates adding 80 new positions at its Milwaukee facility.
- 5. To increase the property tax base of the community.
- 6. To upgrade the condition of the surrounding residential and commercial neighborhoods. This Project Plan includes funding for forgivable loans to neighboring property owners for exterior repairs. Standards will be those used in TID 44 (Lindsay Heights) and TID 59 (Bronzeville).

D. Existing Land Uses and Conditions in the District

As discussed above, the District contains a 600,000 s.f. heavy manufacturing plant, situated on 22 acres. Approximately 350,000 s.f. of this area is utilized by DRS, including 165,000 s.f. of basement space used for storage and maintenance.

The site is located at the intersection of W. Roosevelt Ave. and N. 30th Street, in the 30th St. Industrial Corridor. Major adjacent business include Aldrich Chemical, Eaton Corp. and the former sites of Citation/ Interstate Foundry and Tower Automotive. The investment by DRS is viewed as the start of a revitalization of theses sites which may include the expansion of this District or the creation of complementary districts.

Key to the long term revitalization of the District and the surrounding area will be the upgrade of the residential and commercial areas nearby. The current condition of this area is viewed as a major deterrent to recruiting professional and technical personnel to this location, particularly to DRS and Eaton.

A preliminary budget for the upgrade of the facility is shown in Exhibit 2. Total estimated renovation costs are \$11.3 million.

I. PROJECT PLAN PROPOSALS

- A. The following is a description of the kind, number, and location of all proposed Public Works or Improvements within the District:
 - 1. In order to remain competitive and achieve the efficiencies required in a high-technology manufacturing business, DRS set out achieve a 30% reduction in building-related operating expenses. Hence, the emphasis on upgrading HVAC systems, window replacement, fire protection systems, etc. One key upgrade, for example, is to air-condition the entire production area. To assist in funding this upgrade, the City is proposing to provide a Forgiveable Loan to the project in the amount of \$1.5 million. The terms of the Loan are set forth in Exhibit 3, and generally provide that DRS shall maintain employment at the facility at not less than 450 for a period of ten years. Should employment at DRS be less than 450 in any given year, DRS will make a payment to the City for that year. The payment will be applied to amortize the Project Cost of the TID, reducing the term of the District. All expenditures in the District will occur at 4265 N. 30th Street, Milwaukee, WI.
 - 2. In addition to funding the DRS project, the District Project Plan provides \$150,000 for a Residential Assistance Program for exterior repairs and upgrades to nearby homes and apartment buildings. In order to implement this stage or the Project Plan, the District boundary will have to be expanded. The general terms of these grants are also include in Exhibit 3 and are expected to mirror the grant terms in TID 44 (Lindsay Heights) and TID 59 (Bronzeville).

B. The following is an estimate of the project costs to be implemented as part of this Project Plan.

TASK	ESTIMATED COST
City grant to Redevelopment Authority for Loan to DRS.	\$ 1,500,000
City grant to RACM and NIDC for Residential Assistance Program	150,000
Project Administrative Costs	50,000
NET PROJECT CAPITAL COSTS	\$ 1,700,000
Estimated Interest Costs	1,522,000
TOTAL TID PROJECT COSTS	\$ 3,222,000

The costs included in this subsection, without limitation hereof because of enumeration, are claimed as eligible Project Costs as defined under Wis. Stats. Sec. 66.1105(2)(f) and may be incurred directly by the City, or by the Redevelopment Authority of the City pursuant to a grant or cooperation agreement with the City, pursuant to Wis. Stats. Sec. 66.1105(2)(f)(1)(h).

C. Project financing and timetable for expenditures:

All expenditures are expected to be incurred in 2006 – 2010

The City expects to issue general obligation bonds to finance the Project Costs.

D. List of Estimated Non-Project Costs:

Estimated costs of redeveloping the DRS project are shown in Exhibit 2.

E. Proposed Method of Relocating any Persons to be Displaced:

No persons or businesses are to be displaced.

F. Statement Indicating How District Creation Promotes Orderly Development:

The Project Plan for the District anticipates the redevelopment of a 600,000 s.f., outdated manufacturing facility Total investment is estimated at approximately \$11,500,000. DRS expects to add 80 positions at this location, bringing total employment to 450 in three years following project completion. The project, therefore, adds employment opportunities to the community as well as tax base.

G. Proposed changes of zoning ordinances, master plan, if any, map, building codes and city ordinances:

The zoning for the District is currently IH (Industrial Heavy). The zoning is not planned to be changed.

LOAN TERMS FOR DRS PROJECT

Draft Term Sheet

DRS, Inc. Project

Draft Term Sheet

DRS, Inc. Project

Borrower: DRS, Inc.

Lender: Redevelopment Authority of the City of Milwaukee (RACM)

Loan Amount: \$1,500,000

Interest Rate: 3%

Term: 10 years

- Payment: \$175,850 per year, commencing _______, 2009 and payable annually thru 2018. If the
 Minimum Employment Requirement is achieved before 2009, Borrower shall have the option of
 commencing payments at that time for the ensuing ten-year Term.
- Use of Funds: Renovation of Grantee's facility at 4265 N. 30th Street, Milwaukee, WI (the "Facility") at estimated cost of \$11.5 million (the "Project").
- Disbursing: Loan to be disbursed pro-rata with Grantee's other funding for project. All funding sources must be in hand, or committed prior to initial disbursement by RACM.
- Minimum Employment Requirement: Borrower shall maintain employment, at the Facility, of not less than 450 full-time equivalent positions, including full-time contractor positions, for a period of 10 years commencing December 31, 2008.
- Loan Forgiveness: Payments shall be forgiven in each year Borrower achieves the above Employment Requirement. If Borrower does not meet the Minimum Employment Requirement, based on the average quarterly employment of each year, Borrower shall pay to RACM a prorated Payment based on the actual number of employees at the Facility.
- Due on Sale: Should the Project be sold, Borrower shall make a payment equal to \$175,850 times the difference between the number of whole years since the initial disbursement of Loan funds was made, and 10.
- Due on Tax Exemption: If any portion of the Facility is determined to be exempt from real estate property taxes, Borrower shall make a payment equal to \$175,850 times the difference between the number of whole years since the initial disbursement of Loan funds was made, and 10. For

example, if the exemption is made in the sixth year from initial disbursement, the payment will be (10-6)* \$175,850 = \$703,200). Alternatively, the Borrower may elect to make a Payment In Lieu of Taxes on the Facility.

• Emerging Business Enterprise: Borrower shall use its best efforts to utilize Emerging Business Enterprises, as that term is defined in Ordinance 360 of the Milwaukee Code of Ordinances, for 18% of the construction and renovation cost of the Project.

GRANT TERMS FOR RESIDENTIAL ASSISTANCE.

Residential Assistance Program:

This program will provide Forgivable loans for residential new construction and rehabilitation in the District. The program will be managed by the Neighborhood Improvement Development Corp. (NIDC).

Loans for new residential construction shall be made in accordance with the following criteria:

- <u>Eligibility</u>: Buyers who will build, own and occupy the property for 5 years are eligible. Buyers must submit evidence of financing at the time of application.
- <u>Income</u>: There will be no income restrictions, but buyers will have to verify their income for reporting purposes.
- Type of Construction: One and two family owner-occupied residential new construction; Building plan must be pre-approved by the Dept. of City Development's Urban Design Division; Tax-exempt properties are not eligible; Mixed-use properties are not eligible.
- Loan Terms: Loans are for up to \$10,000; Term is 5 years; One loan per property; Loans are 0% forgivable at 20% per year. Families who previously built in the District are not eligible.

Loans for residential rehabilitation are do be made under the following criteria:

- <u>Eligibility:</u> Owners who occupy their property and rental property owners are eligible.
- <u>Income</u>: There will be no income restrictions, but owner-occupants and tenants will be required to verify their income, for reporting purposes.
- Taxes, Insurance, Mortgages, and other Restrictions: All owners must be current with their property taxes, mortgages, and have homeowner's insurance when they apply. Landlords must be current on their property taxes, and have a good building inspector record on all properties located in the city.
- Types of Buildings Eligible: Residential property (owner-occupied and rental) is eligible. The building must be over 25 years old, and 1 to 4 units. Taxexempt buildings are not eligible. Mixed-use properties are eligible if there are 1 0 4 residential units. All residential units in mixed-use buildings must be occupied when the rehab is done.
- Loan Terms: Same as above
- Investor Owners: Landlord Training is a required condition of obtaining a loan. There are rent controls; landlords are restricted to no more than 5% rent increases per year, starting when the rehab work is completed. Landlords must

- match the loan dollar-for-dollar with their own funds. If the owner lives within 3 blocks of a rental property, there are no matching fund requirements.
- Assumptions and Subordinations: Loans are assumable only if the home is sold to an owner-occupant. Subordinations are allowed for owner-occupants who are refinancing. Subordinations for equity loans are acceptable. Subordinations are not allowed for investor-owners.
- <u>Forgiveness:</u> For owner-occupants, the loan will be forgiven if the owner lives in the home for five years. For investor-owners, as long as there are no unresolved complaints about rents and the taxes on the building are current, the loan will be forgiven in five years after the rehab is done.
- Eligible Rehabilitation Work: The purpose of the loan is to make permanent exterior repairs that will benefit the homeowner and the neighborhood. Loan funds may be used only for correcting code violations on: Roof replacement, chimney repairs, gutters and downspouts, door replacement, window replacement, porch replacement, siding and cladding, exterior painting, front yard service walks and steps, permanent front yard landscaping
- What is not eligible: Loans are not intended for general remodeling or home improvements. Applicants needing more comprehensive work should be referred to other programs such as Home Rehab, NIP, or WHEDA. Also not eligible are interior repairs, minor repairs, garages, parking pads, patios, decks, fencing, rear yard landscaping, and the like.

EXHIBIT 4

ECONOMIC FEASIBILITY STUDY FOR:

DRS POWER & CONTROL TECHNOLOGIES PROJECT

Background:

The City of Milwaukee is proposing to assist DRS Power & Control Technologies, Inc. to renovate its 600,000 s.f. manufacturing facility at 4265 N. 30th Street. The description of the project, the renovation budget and the terms of the assistance proposed, are set forth in the Project Plan for proposed TID No. 62. In addition, the City proposes to provide a certain amount of grant assistance to nearby property owners, as a means to correct code violations and make exterior improvements to residential properties.

The DRS project will result in a 6% reduction in total product cost, according to the company. The firm's ultimate goal is to reduce costs by 30%.

The project is expected to result in a:

- 25% reduction in electrical and water consumption
- 53% reduction in natural gas consumption
- 40% reduction in maintenance services

Offsetting these savings are expected increases in:

- Property taxes
- Depreciation (although a non-cash charge, this factors into product pricing)

DRS plans to contract its facility to 343,000 s.f. in order to improve its efficiencies:

- 233,000 s.f. will be upgraded, including:
 - o 24,000 s.f. shipping area: lighting, wall insultation
 - o 82,000 s.f. office area: lighting, HVAC, remodel; 42,000 s.f. new const.
 - o 49,000 s.f. testing area: lighting, HVAC; consolidation
 - o 38,000 s.f. manufacturing: lighting, HVAC, flooring, sprinkler
 - o 40,000 s.f. cafeteria, training, lobby, other: lighting, HVAC
- 110,000 s.f of basement storage and maintenance space will remain as is.

In addition to interior upgrades, DRS plans improvements to the building envelope (roof, window replacement, insulation, etc.) and the parking area.

The remaining 257,000 s.f. will be made available for lease. The leased area includes 55,000 s.f. of basement space which can be converted to parking for future tenants.

As set forth in Exhibit 2, total renovation and consolidation cost is estimated at \$11.5 million.

As an incentive to DRS to proceed with the project, the City is proposing a Forgiveable Loan on terms set forth in Exhibit 3. This Loan amount is proposed to be recaptured through future incremental tax revenue derived from the DRS upgrade to its space, and from the leased space made available in the facility.

Similarly, the Wisconsin Dept. of Commerce has committed to assist the project with a \$2 million forgivable loan through its Major Economic Development Fund, and up to \$500,000 through the Focus on Energy Program for the cost differential of energy-efficiency technology.

The balance of the \$11.5 million will be financed by DRS, possibly with the aid of New Markets Tax Credits.

Current Property Valuation:

The current valuation of the DRS facility is:

• Land : \$550,400 [\$24,200 per acre]

• Improvements : 2,091,700 [\$3.50 /s.f. overall; or, \$4.80/s.f. for first floor &

Second floor of 435,000 s.f.]

• Total : \$ 2,642,100

This represents the Base Value of the proposed District. This value has remained substantially unchanged since DRS acquired the facility. As stated previously, the facility is nearly 40 years old. While adequately maintained, the Wis. Dept. of Revenue assigns a 50% functional obsolescence factor to the property when valuing it for tax purposes.

Anticipated Future Value of Leaseable Space:

As stated above, 257,000 s.f of space in the facility will be made available for lease. This includes 202,000, s.f of first floor manufacturing or warehouse space, plus second floor office; and, 55,000 s.f. of basement space.

Comparable space in the area, for buildings of similar age and size have "asking rents" from \$2.00 to \$2.50 / s.f., NNN, according to the Business Journal's Commercial Real Estate Quarterly dated September 23, 2005.

For the purposes of valuing this area, we believe a \$2.25 rent is appropriate for the first floor manufacturing and associated office space (202,000 s.f.); and, \$1.00 / s.f. is appropriate for the basement space (55,000 s.f.).

Value for this space is estimated as follows:

Gross Revenue:

Manufacturing / Office : \$454,000 Basement 55,000

Total \$509,000

Less: Owner's Expenses 51,000 (10%) Vacancy 127,000 (25%)

Net Operating Income 331,000

Value \$3,009,000 (11% cap rate)

We expect this space to be leased over three years beginning in 2008.

Anticipated Future Value of DRS Occupied Space:

DRS plans to spend \$11.5 million on upgrades to 233,000 s.f., or almost \$50 per s.f..

A typical manufacturing building usually contains 5% to 10% office space. This facility, as shown above, contains 35% office space. If the training and cafeteria space is included, the space allocated to non-manufacturing and testing, rises to over 50%. In addition, DRS's area, exclusive of the 110,000 s.f. of storage space, is expected to be air conditioned – a requirement of the high-tech testing and assembly work performed by DRS.

As planned, the facility is unique and would not generally be expected to command a value, for property assessment purposes, equal to the entire cost of renovation.

There is a sample of high-tech assembly buildings in the City that are somewhat comparable to the renovated DRS facility, i.e. having significant air handling infrastructure, clean rooms, etc. That sample is summarized below:

Address	Owner	Bldg. Assessment	Bldg. S.F.	Assess. / S.F.	Age
8200 W.	GE	\$6,973,900	297,360	\$23	1984
Tower	Healthcare				
9000 W.	HUF North	\$3,375,500	95,753	\$35	2000
Dean	America				
8901 W.	Paper	\$3,336,100	106,552	\$31	1990
Tower	Machinery				
9909 W.	Xymox	\$1,932,200	62,000	\$31	2000
Dean	Technologies				
7025 W.	3M Touch	\$3,515,700	88,760	\$39	2000
Marcia	Systems				
Subject:					
4265 N. 30th	DRS Power	\$2,117,800	435,000	\$5	1956
	& Control				

In addition to being significantly newer, all of these facilities are located in modern business parks on the City's northwest side, with more immediate access to freeways.

The sample suggests that current building assessments (excl. land) for such facilities are in the range of \$30 / s.f.. Due to the age and accessibility of the DRS facility, we believe a 20% reduction in assessed value would be appropriate. This suggests that the renovated portion of the facility will have a value for tax purposes of \$24 / s.f. – still, over four times its current value.

Forecast of Tax Increment Revenue:

The attached table forecasts property value in the District given the above assumptions as to Leased Space and to space occupied by DRS. The DRS space, now valued at \$5 /s.f. is increased to \$24/ s.f., resulting in a value of \$6 million by 2009. The Leased Space, which comes on line that same year is estimated to be absorbed over three years, achieving a value of \$3 million by 2011. Thereafter, values grow moderately as is typical of manufacturing properties in the area.

Based on this cash flow, the District is able to support a total borrowing of \$1,700,000 at current interest rates. To the extent personal property is added to real property values, borrowing capacity may be increased. However, almost all significant manufacturing assets are now exempt from property taxes, including machinery and equipment, testing equipment, computers, software, etc.

As shown in the forecast of cash flow for the District, the City will recover its costs over the, nearly, maximum recovery period of 25 years. As such the District is nominally feasible.

As stated earlier in the Project Plan, it is expected that the boundary of this District will be expanded to enable grants to be made for residential renovation in the neighborhood. Depending on the rate of appreciation in the residential area, this growing tax base could increase the borrowing capacity of the District, increasing the available funding not only for residential improvements but for subsequent assistance to DRS, as needed.
