

February 19, 2004

To the Honorable, the Common Council

Subject: Consultant Contract to Evaluate City Streets

Dear Council Members:

The attached resolution authorizes the City of Milwaukee to enter into a contract with a consulting firm to test existing pavements and underlying base, and to submit a report evaluating their findings and recommending the improvement treatments for approximately twelve miles of City streets.

Over the last several years, we have found the information gained from the analysis of pavements most helpful in programming improvements for City streets, and we recommend this resolution be adopted.

Very truly yours,

Mariano A. Schifalacqua
Commissioner of Public Works
