To the City Clerk

To whom it may concern:

On 10/15/07, I was traveling North bound on Appleton Ave at the intersection of 59th street and Appleton you could see a patch to suggest that a pot hole had been repaired. What you couldn't see was the pot hole was not properly repaired/or filled. The street level was at least 4 to 6 inches higher than ground level that the city attempted to make the repair. When we drove across the pot hole we came to a sudden stop. Because of the impact, it instantly blow out two tires and damage the meg rims and cracked the windshield. We had to get the vehicle out of traffic to 59th Appleton. This was when we notice fluid leaking from under the car. There was damage to the alignment amongst other things per the estimate. Here are a couple of wittiness that were present:
