Dear Mr. Lee,

We are writing to express support for the Hambrook family's proposed solar panel installation at 2015 North Lake Drive (file # 231219). Our home is located directly across the intersection and we are not concerned about the view of the solar panels.

Solar energy plays a vital role in reducing our carbon footprint and promoting sustainable practices. It is essential to balance innovative green policies with historic preservation, ensuring that our neighborhood remains environmentally conscious while respecting its rich history. We believe this project is consistent with historic preservation principles as the panels will not be visible from the main elevation and do not detract from the architectural features of the Hambrook home, in our opinion.

We believe that supporting projects like this demonstrates a commitment to sustainable living while preserving the unique character of our neighborhood.

Thank you for considering our feedback.

Sincerely,

Ashley and Michael Adam
