

**H) COMPUTATIONS USED IN ARRIVING AT FISCAL ESTIMATE:** The estimate is calculated from the approximate number of transports fees collected from sources other than Medicare, Medicaid, and GAMP for 2003. No data is available on the number of resident vs non-resident fees collected, so an average increase of \$14 w as used.

It should be noted that the estimated impact of this file only reflects BLS transports conducted by the Milwaukee Fire Department. Approximately 95% of all BLS transports are performed by private ambulance providers. Since private provider transport income is not reported to the city, the total impact of this file on the EMS system is unknown.
