To whom it may concern,

I have grown to love Central City Cyberschool. The reason being is because I didn't know if my son was going to be able to make a huge transition coming from a smaller environment. My son started C3 in the first grade, this is his second year at Cyber and I couldn't have made a better decision on leaving him there and also letting him join Cyberschool's CLC program. When he first started he struggle tremendously with reading and math. When I found out they had the great after school program CLC I was over joyed because I knew that my son needed tutoring. Cyber has been great for myself and my son. This school year my son's academic levels are great. I love how great they are and always willing to help at the school. They have been supportive of me and my son since he started.
