Wisconsin Department of Transportation (WisDOT) Statewide Multi-Modal Improvement Program (SMIP) FYs 2009-2011 PROJECT APPLICATION FORM FOR:

Local Transportation Enhancements (TE) Program Bicycle and Pedestrian Facilities Program (BPFP)

(This form is available from WisDOT in a rich text format (rtf) that you can fill in electronically. If desired in this format, please contact us by e-mail and we can return to you as an e-mail attachment)

1.	Project Name: Open Metal Grate Bike Lane	es
2.	Project Location: Municipality: Milwaukee	County:Milwaukee
	Street Address of Project (if applicable):	
	on these bridges: Install anti-slip	Downtown area of the City of Milwaukee, bridge decking in bike lane of lift
	bridges at Water St., Pleasant St., W	isconsin Ave., and Juneau
3.	Name of the MPO the project is represented by:	Southeastern Wisconsin RPC (SEWRPC) MPOs is located on page 13 of the Guidelines section.
	NOTE. A Wisconsin map with areas covered by	' os is located on page 13 of the Guidelines section.
4. Name and Location of Public Sponsor: Milwaukee		
	Indicate Sponsor Type: State County	☐ City ☐ Village ☐ Town ☐ Indian Nation
5.	If public sponsor is submitting more than one application, prioritize this project here: (e.g., 1 of 5): of This is required for projects in urbanized areas with MPOs, recommended for others.	
5.	Primary Contact Person of Public Sponsor Agency:	
	Name: David Schlabowske	Title: Bicycle and Pedestrian
	Address: 841 N Broadway, Rm 919	Phone: (414) 286-3144
	Municipality: City of Milwaukee	State: wi Zip: 53202
	FAX: (414) 286-0663	E-mail: david.schlabowske@milwaukee.go
	Secondary Contact of Non-Profit or Other Agency	Submitting Application through Public Sponsor:
	Name:	Title:
	Address:	Phone: ()
	Municipality	State: WT 7in:

1	FAX: ()E-mail:
i	Check the appropriate box below and complete the following information. (See Guidelines for detailed information) All TE projects must fit into one of the 12 categories AND relate to surface transportation:
	Transportation Enhancements (TE) Program Indicate which ONE of these twelve categories best identifies your project:
	 ☑ Provision of facilities for pedestrians/bicycles ☐ Provision of safety and educational activities for pedestrians & bicyclists ☐ Preservation of abandoned railway corridors (including the conversion and use thereof for pedestrian or bicycle trails) ☐ * Historic Preservation ☐ * Rehabilitation/operation of historic transportation buildings (including historic railroad facilities and canals) ☐ Establishment of transportation museums ☐ Acquisition of scenic easements and scenic or historic sites ☐ Scenic or historic highway programs (including the provision of tourist and welcome center facilities) ☐ Landscaping and other scenic beautification ☐ Control and removal of outdoor advertising ☐ Environmental mitigation of water pollution due to highway runoff or reduce vehicle caused wildlife mortality while maintaining habitat connectivity ☐ Archeological planning and research
	toric Projects must be on or deemed eligible for the Wisconsin or National Register(s) of Historic Places, or officially nated as a local landmark.
unde sidev elem allov 8. I	Bicycle and Pedestrian Facilities Program (BPFP) Bicycle and pedestrian projects eligible or the TE program will also be eligible for BPFP with some exceptions. Pedestrian-only projects such as walks and ped-only bridges as well as streetscaping are excluded, even if they include some bike/ped tents. Bicycle and pedestrian planning projects are eligible. No Local Force Account (LFA) work is wed. State agencies are eligible for TE but not BPFP.
3	This project retrofit our existing lift bridges with 4ft. anti-slip
	treatments on the outside edge to improve the deck for bicyclists. The existing bridge decks are open metal grate and very slippery when wet.
	With this grant we will add the SlipNot plating and leave the outside
2	one foot area (not usable by cyclists) open to allow for drainageone
V	We have already used these treatments on three bridges in Milwaukee
V Z	with great success and hope to add them to these key bridges on our City bikeway network.

9. PROJECT COSTS: An accurate cost estimate is critical because the sponsor will be responsible for any costs that exceed the project award amount. List the broad categories of expenses in the following table. To ensure the reasonableness of estimates a more detailed budget should be included in your answer to Question 12, particularly for projects with many Construction components such as streetscaping and landscaping projects. Construction related projects must be \$200,000 total and over, including any Design related costs. Because of the significant federal requirements that must be met when FHWA funds are used to purchase Real Estate and delays that can result, Real Estate costs are eligible only for costs of \$100,000 total or more. Purchase of materials should be listed under Construction as the costs can only be reimbursed after the materials are installed. All other projects must be \$25,000 federal share and over. This applies to all non-construction projects including Preliminary Engineering work such as developing project specific design work, environmental documents and Plans, Specifications and Estimates (PS&Es). Please note that you should submit a separate application and budget for each project or stand-alone project segment you are willing to accept funding for, e.g., Preliminary Engineering (P.E.) or a bike trail section that could function as a separate facility. We will not split or partially fund project requests. Note that due to previous year project commitments, major new funds are only available in state Fiscal Year 2010. It is possible that Regions may be able to meet requests for Design work in early 2009 for cases where Design work is needed prior to letting a project for Construction by July of 2009. This will depend on the status of projects already scheduled and the number and size of requests received.

FY 2009	FY 2010	FY 2011	TOTALS
(Begins 7/1/08)	(Begins 7/1/09)	(Begins 7/1/10)	Must = sum of
			FYs 2009-11

\$	\$700,000	\$	\$
	\$140,000	\$	\$
A year to grammation and the second s	\$560,000	\$	\$
\$	\$700,000	\$	\$
	(Begins 7/1/08) \$ Not available Not available Not available \$	(Begins 7/1/08) (Begins 7/1/09) \$ \$100,000 Not available \$ Not available \$600,000 \$ \$700,000 \$140,000 \$560,000	(Begins 7/1/08) (Begins 7/1/09) (Begins 7/1/10) \$ \$100,000 \$ Not available \$ \$ Not available \$ \$ Not available \$600,000 \$ \$ \$700,000 \$ \$ \$140,000 \$ \$ \$560,000 \$

Note: We may be able to schedule lower cost items like Design in FY 2009. Higher cost phases such as Construction will generally need to wait until FY 2010 to 2011 and possibly 2012. The above line item categories include the most common project phases. Starting in 2008, eligible utility relocation related costs will need to be funded 100% locally and can only be funded in cases where <u>each</u> utility is \$50,000 or more which is unlikely for these projects. Also starting in 2008, state Delivery related costs will need to be added. We will contact each successful recipient after project approval with the additional costs that could be 10% or more of the project, depending on size and complexity of review and oversight needed for the project.

10. When will the project begin? (Please indicate month and year for each applicable phase):

P.E./Design	Feb., 2010	_
Real Estate		
Railroad Crossings		
Construction	Sept., 2010	

Please note that each project will be reviewed by the WisDOT Disadvantaged Business Enterprise (DBE) office for an assessment of the potential for the project to be assigned a **DBE goal** as a percentage of the award amount. Only WisDOT certified firms may be used to meet DBE goals.

certified firms may be used to meet DBE goals. 11. Please confirm your understanding of the following project conditions by <i>initialing</i> below:			
	rson initialing and signing the application must have fiscal authority for the public sponsor. The sponsor must provide matching dollar funding of at least 20% of project costs.		
	Accepted.		
ъ.	This is a reimbursement program. The sponsor must finance the project until federal reimbursement funds are available. Accepted.		
c.	The sponsor must fund project costs in excess of the amounts indicated in Question 9 (i.e., cost overruns) at no expense to state/federal funding sources. Accepted.		
đ.	The sponsor must not incur costs for any phase of the project, until that phase has been authorized for federal charges and the Region has notified the sponsor that it can begin incurring costs. Otherwise, the sponsor risks incurring costs that will not be reimbursable. Local Force Account (LFA) work only allowed on TE funded projects. Accepted.		
e.	The sponsor will follow the applicable federal and state regulations required for each phase of the project. Some of these are described in the Guidelines. The requirements include but are not limited to the following: a Qualifications Based Selection process for design and engineering services (Brooks Act); real estate acquisition requirements of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 and amendments; competitive procurement of construction services; Davis-Bacon wage rates on federal highway right-of-way projects; WisDOT FDM & Bicycle Facilities Handbook; ADA regarding accessibility for the disabled; MUTCD regarding signage; U.S. Department of the Interior standards for historic buildings, etc. Each Region can provide copies of the current Sponsor's Guide, and references for sections of the Facilities Development Manual (FDM) and other documents necessary to comply with federal and state regulations. Applicants need to become familiar with the requirements in these documents as necessary to complete their projects. Accepted.		
f.	If applying for a bicycle facility, it is understood that All Terrain Vehicles (ATVs) are not allowed. Snowmobile use is only allowable by local ordinance. Trail fees may only be charged on a facility if the fees are used solely to maintain the trail. WisDOT reserves the right to require snow plowing of facilities as part of the maintenance agreement where year round use by bicyclists and pedestrians is expected. Accepted.		
g.	The sponsor agrees to maintain the project for its useful life. Failure to maintain the facility, or sale of the assets improved with FHWA funds prior to the end of its useful life, will subject the sponsor to partial repayment of federal funds or various stipulations protected the public interest in the project for its useful life. Accepted.		
h.	The sponsor agrees to State Delivery and Oversight costs by WisDOT staff and their agents. These costs include review of Design and Construction documents for compliance with federal and state requirements, appropriate Design standards, etc. These costs will vary with the size and complexity of the project. Costs could be a higher percentage of small projects and higher in total but lower on a percentage basis for large projects. We will contact if your project is approved for the amount that needs to be added, which could be 10% or more of your initial estimate. The Sponsor agrees to add these costs that will be 80% federally funded with the balance local. Accepted.		

12. On NO MORE THAN THREE, 8 1/2" x 11", DOUBLE SPACED, SINGLE-SIDED PAGES (11 point font minimum), please answer the following questions regarding the project you are applying for:

- a) For bicycle and/or pedestrian facilities, clearly indicate the location, length, width and surface materials and any connections to existing or planned facilities. Also answer the following as applicable to your bicycle or pedestrian project:
 - Does your community have a bicycle or pedestrian plan?

13. I have read and understood the above statements.

(Title of Person Signing)

- Summarize the bicycle and pedestrian projects that you have developed over the past 5 years being sure to include
 any bicycle and pedestrian projects that have been incorporated into larger street or highway projects (such as
 paved shoulders and bike lanes). A one-sentence description including the project length is sufficient.
- Summarize any other non-project bicycle and pedestrian efforts put into action by your community (participation in Bike-to-Work Week, bike rack installation, bike safety courses, pedestrian road-shows, police on bikes, etc.).
- Does your community assess adjacent property owners for sidewalk improvements? (Only needs to be answered if you are applying for TE funded sidewalks or other pedestrian improvements.)
- Clearly indicate any plans to charge fees to access your proposed facility, how the fees will be used and whether the trail/path will be snowplowed in winter months.
- b) For historic related projects, how does the project relate to Wisconsin's past or present surface transportation system? Document that the project is on or eligible for the National and/or State Register of Historic Places or a local landmark designated under a locally adopted landmarks ordinance. If not already on a register, provide documentation from the Wisconsin Historical Society that the project meets eligibility standards for the register. Provide detail on the historic, architectural and other significance of the project. Including a picture with the application is particularly helpful for evaluating historic projects.
- c) For landscaping/streetscaping applications, clearly detail the types of amenities and improvements that will be part of the project. Indicate how the improvements will promote opportunities for walking and biking. Beware that certain cost items such as parking improvements, street work not related to bike/ped usage, utilities like sanitary sewer and other items not strictly related to the TE project must be excluded. Street light fixtures are expected to be of a decorative, antique-look type.
- d) Realistically, how much usage or impact will the proposed facility have on an annual basis? e.g., how many bicycle or pedestrian users, visitors, viewers, etc., of the facility per year. For bicycle and pedestrian facilities there should be significant non-recreational usage of the trail such as for shopping, work, school trips, etc.
- e) Broadly describe other project benefits (not already covered above) related to any of the following improvement to Wisconsin's multi-modal transportation system (bicycle, pedestrian or transit); preservation of state historic, environmental and scenic resources; promotion of economic development, tourism, safety, etc.

Signed on behalf of	
(Name of Sponsor)	· •
(Name of Person with Fiscal Authority)	(Signature of Person)

(Date)

Please remember to include the <u>required</u> 8 1/2" x 11" black and white map for you project Completed applications consist of 1 original and 3 copies of pages 1-5 plus attachments. Avoid stapling, at least for original that we will use for copying. Applications must be submitted to the appropriate WisDOT Region office or postmarked with an official Post Office date stamp (private postage meter stamp will not be acceptable after deadline) by Friday, April 18, 2008 to be eligible for funding.
-- NO LATE APPLICATIONS WILL BE ACCEPTED --

12. On NO MORE THAN THREE, 8 1/2" x 11", DOUBLE SPACED, SINGLE-SIDED PAGES (11

point font minimum), please answer the following questions regarding the project you are applying for:

a) For bicycle and/or pedestrian facilities, clearly indicate the location, length, width and surface materials and any connections to existing or planned facilities. The bridges selected for this project are all in the downtown central business area. We plan to install the SlipNot anti-slip bridge decking in bike lane of lift bridges at Water St., Pleasant St., Wisconsin Ave., and Juneau. These are all on key bicycle routes. This project will serve primarily the mixed use development Downtown, in the Third Ward and Brewers Hill areas. Currently many cyclists ride on the sidewalks to avoid traveling over these bridges, even when they are dry. This is a danger to pedestrians in an area with high pedestrian counts. We have also received complaints from cyclists who have fallen on the bridges and suffered additional injuries due to the "cheese grater" effect when skin hits the bridge grating.

Also answer the following as applicable to your bicycle or pedestrian project:

- 1. Does your community have a bicycle or pedestrian plan? Yes, and we are updating it now.
- 2. Summarize the bicycle and pedestrian projects that you have developed over the past 5 years being sure to include any bicycle and pedestrian projects that have been incorporated into larger street or highway projects (such as paved shoulders and bike lanes). A one-sentence description including the project length is sufficient.

Marsupial Bridge: The City constructed an architecturally significant bicycle and pedestrian only bridge that hangs beneath the Holton Street Bridge.

Bike Lanes: The City has more than 45 miles of bike lanes and adds bike lanes whenever a road is reconstructed that is on our 145 planned bike lane network.

Riverwest Bike Trail: The City has let a contract to construct a multi-use trail in the River West neighborhood.

KK River Bike Trail: The City is in the final design stages to construct a trail and new bridge over Chase Ave. The trail will run on abandoned rail line from 6th and W.

Rosedale Ave. to E. Washington Street, just east of N

Barclay St.

3. Summarize any other non-project bicycle and pedestrian efforts put into action by your community (participation in Bike-to-Work Week, bike rack installation, bike safety courses, pedestrian road-shows, police on bikes, etc.).
Off-street Bikeway Study: this project was completed last year and looked at possible locations for future off-street trails. The resulting project also provided design guidelines and best practices.

Bicycle Publicity Plan: Completed 5 years ago, this looked at ways to promote bicycle use and included estimates on media campaign costs, bicycle media campaign guidelines and templates for advertisements, a bicycle information website: www.milwaukeebybike.org. It also gave us a television commercial promoting biking to work that we use every year and may now be used statewide.

Park for Free Milwaukee: The City of Milwaukee has installed and distributed more bicycle parking racks for more than 2000 bicycle throughout the City. We have a bicycle parking needs analysis and best practices report for the City.

Bike to Work Week: The City participates in bike to work week every year. The Mayor bikes to work, we have a

facility tour and City Staff assist the Bicycle Federation with their bike to work week activities.

Pedestrian Road Shows: The City has been very active in pedestrian safety efforts and has run a number of pedestrian road shows in neighborhoods across the City. We have made many traffic calming and safety infrastructure improvements to those areas based the results of those planning efforts.

StreetShare Program: The City was a leader in creating the StreetShare program. We continue to work on building awareness for that program and are planning a StreetShare Safety Week for later this year.

Police on Bikes: The Milwaukee Police Department has had a very active program with police officers on bicycles. One member of that team is on our City Bicycle and Pedestrian Task Force.

Bicycle and Pedestrian Task Force: The City has an active and effective bicycle and pedestrian task force appointed by the Mayor.

- 4. Does your community assess adjacent property owners for sidewalk improvements? (Only needs to be answered if you are applying for TE funded sidewalks or other pedestrian improvements.) Yes
- Clearly indicate any plans to charge fees to access your proposed facility, how the fees will be used and whether the trail/path will be snowplowed in winter months. NA

b) For historic related projects, how does the project relate to Wisconsin's past or present surface transportation system? Document that the project is on or eligible for the National and/or State Register of Historic Places or a local landmark designated under a locally adopted landmarks ordinance. If not already on a register, provide documentation from the Wisconsin Historical Society that the project meets eligibility standards for the register. Provide detail on the historic, architectural and other significance of the project. Including a picture with the application is particularly helpful for evaluating historic projects. NA

- c) For landscaping/streetscaping applications, clearly detail the types of amenities and improvements that will be part of the project. Indicate how the improvements will promote opportunities for walking and biking. Beware that certain cost items such as parking improvements, street work not related to bike/ped usage, utilities like sanitary sewer and other items not strictly related to the TE project must be excluded. Street light fixtures are expected to be of a decorative, antique-look type. NA
- d) Realistically, how much usage or impact will the proposed facility have on an annual basis? e.g., how many bicycle or pedestrian users, visitors, viewers, etc., of the facility per year. For
 bicycle and pedestrian facilities there should be significant non-recreational usage of the trail
 such as for shopping, work, school trips, etc. The bridges selected for this
 project are all primary connectors to the downtown central
 business district. Therefore they will have very heavy use by
 recreational cyclists from downtown residents, commuter cyclists,
 and from the two bicycle courier companies that work downtown.

 The two bicycle messenger companies estimate that they make more
 than one hundred trips a day over each bridge. While we do not
 have bridge bicycle counts, if one percent of the 78,000 downtown
 workers commute by bike, then it would be safe to estimate 70 to
 1,000 daily users of the slipknot plates.
- following improvement to Wisconsin's multi-modal transportation system (bicycle, pedestrian or transit); preservation of state historic, environmental and scenic resources; promotion of economic development, tourism, safety, etc.

 The bridges selected for this project are all primary connectors to the downtown central business district. Yet they are viewed as dangerous and scary to ride over. If we are to encourage people to use alternative means of transportation, we must give them viable, convenient, complete and attractive options. A network of bicycle facilities with significant gaps fails the average potential user. These open metal grate bridges represent significant gaps in our City's bicycle way network.

e) Broadly describe other project benefits (not already covered above) related to any of the
