As much as I love advancing technology, I feel like this is going to be used for the wrong reasons, in my person opinion and from history i believe these are being used for a more surveillance purposes than beneficial to the community, we don't need them taking water from our beautiful Great Lakes, we don't need them over working the electricity and raise prices for everyone because of how much they'll need to operate. And pollution we don't need more pollution than we already have. Please say no to the data center..

Best Regards,

A Proud Wisconsinite
