To Whom It May Concern:

I want to address the concern I have regarding the seagulls that permeate the area between Highland and Juneau, and 8th and 9th Streets. The seagulls sit on top of the Pabst-owned warehouse at this site. The roads and sidewalks are covered in bird droppings and feathers. The seagulls are always circling overhead. I walk to and from the Pabst Brewery parking structure to MATC each day and am always conscious that I may get bird droppings on me during my walk. I have incurred dry cleaning bills because of being hit by seagull feces. Many of my co-workers wear hats or use umbrellas because of their fear of being hit.

I realize that seagulls are protected birds, but is there a way we can have Pabst, or the City of Milwaukee, get these seagulls to find somewhere else to hang out? Any solution you can provide to this situation is greatly appreciated.

Thank you for your time.

Sincerely,

Jennifer Blanchard
