Subject: Testimony opposing the mid town data center

Some people who received this message don't often get email from kimyenceske@gmail.com. [Learn why this is important](#)

My name is Kim Yenceske, I'm a current Milwaukee resident, and I grew up just a couple blocks from the midtown center on capital. My grandmother still lives in that neighborhood she's 86 years old and has lived in her home for over 60 years. This neighborhood is already prone to power outages pretty much anytime it storms. She's always calling me saying her power is out. This proposed data center is not just bad for the environment, for the community, for the city; It's bad for humanity. We cannot let these corporations continue to suck up our resources and destroy our communities on the false hope of bringing jobs. we've seen it before, We'll see it again, but we cannot let it happen in our town. There are so many different things they could do with this empty space to better the community and do good things for the residents . The data center would be the exact opposite. It would only further contribute to growing food deserts, pharmacy deserts, increased heat activity, and continue to suck up our Precious resources here in the Great Lakes. We have to stand up and fight for what's right for the citizens for the residents . The people who have been here since they were born and the next generation to come, we have to set an example for the rest of the Country and say no to these dangerous centers. we don't fully know yet the environmental impacts the centers will create and the long lasting effects, which will likely be negative. Anything good for us - they don't pass so clearly these data centers cannot be good for us because they are throwing them up like weeds, no matter the cost. Why can we not make the same monetary investment to better our situation and better the community? we have so many problems in the city, The last thing we need to do is invite in more, especially from outside investment. I strongly oppose the DATA center as should every Milwaukee Citizen!

Thank you
