# Introduction

---

## General

The Wisconsin Department of Administration (DOA) Division of Facilities Development (DFD) has retained GEI Consultants, Inc. on behalf of the Wisconsin Department of Corrections (DOC) to prepare an Environmental Assessment (EA) for the proposed construction of the Type 1 Juvenile Corrections Facility (JCF) in Milwaukee, Wisconsin. The Environmental Assessment (EA) has been prepared in accordance with the Wisconsin Environmental Policy Act (WEPA), Wisconsin Statutes 1.11, and Wisconsin Administrative Code Chapter DOC 335.07 to determine whether an Environmental Impact Statement (EIS) is required for the project.

## EA Process

The WEPA compliance process began in September 2022 with authorization by the DFD to prepare an EA. An Information Letter to solicit input on potential impacts of the project was submitted to potentially interested agencies and groups on September 29, 2022. A copy of the Information Letter, responses received, and the distribution list for parties that received the Information Letter and this EA are included as Appendix A.

The EA was made available on December 1, 2022, for a 15-day public review period. Copies of the EA were available at the Milwaukee Public Library – Good Hope Branch, Milwaukee Journal Sentinel, Wisconsin State Journal and online at: <https://geiconsultants.sharefile.com/d-s90bb587aa0534fc8be9ba9ecaa6bc201>

A public information meeting was held on December 7, 2022, at 6:00 p.m. in Room 182 of the Milwaukee Police and Fire Academy Building located at 6680 N. Teutonia Avenue, Milwaukee, Wisconsin 53209. A description of the project was presented, and all persons were afforded a reasonable opportunity to identify both orally and in writing any support, issues, or concerns they believed should be addressed as part of the EA process for this proposed project.

Refer to Appendix B for the public notice, announcing the public information meeting and availability of this EA document, minutes from the public meeting, affidavits of publication, and response received during the EA process.

All comments were directed to be received by the below-listed project contact, no later than 5:30 p.m., December 16, 2022:

Mitch H. Salzwedel, PG, GEI Consultants, Inc.  
406 Science Drive, Suite 404, Madison, WI 53711  
[msalzwedel@geiconsultants.com](mailto:msalzwedel@geiconsultants.com)

The following subsections provide information required by DOC 335.07 to evaluate and determine whether this project is a major action that will significantly affect the quality of the human environment, and to describe alternatives to that action.

Refer to Section 7 for the Determination of the EA process.

# 1. Description of Proposed Action

---

## 1.1 Title of Proposed Project

Type 1 Juvenile Corrections Facility  
Milwaukee, Wisconsin  
DFD Project No. 18K2M

## 1.2 Project Location

Address: 7930 W Clinton Avenue, Milwaukee, Wisconsin  
County: Milwaukee  
Political Town: City of Milwaukee, Wisconsin

An aerial view of the site, and United State Geologic Survey (USGS) topographic map indicating the proposed project location included in Appendix C as Figures 1 and 2, respectively. Appendix D includes a photographic log for photographs of site features of both the project site and adjacent areas at the site.

## 1.3 Project Purpose and Need

### 1.3.1 Description of the Proposed Action

This project will provide for the planning, design, and construction of a new building for a JCF located in Milwaukee, Wisconsin. The facility is anticipated to be approximately 71,000 gross square feet (GSF) and the total site development, including paved surfaces, lawn, sidewalk, designated lots, is estimated to be approximately 6.0-acres. The completed site will include the following spaces:

- Operational capacity and beds for 32 youths.
- Classroom space for educational purposes, including a computer lab. Additional program space will be planned for music, carpentry, and welding, and dedicated teacher spaces.
- Food Services. Food preparation is anticipated to occur on site.
- Space for nursing staff for primary health care services.
- Multipurpose space for visiting and programs.
- Space for administrative services, mechanical areas, supplies, and equipment.
- The facility will have a Type 1 security level, including a perimeter fence and a locked building with 24/7/365 security.
- Parking lot with approximately 100 parking stalls.
- Secure courtyard/recreational area.

Appendix E includes preliminary site plans and details for the proposed facility.

### **1.3.2 Purpose and Need of Proposed Action**

The DOC Division of Juvenile Corrections currently operates two juvenile correctional facilities on the same campus, Lincoln Hills School for boys and Copper Lake School for girls, both located outside Irma in northern Wisconsin. Research on juvenile justice systems shows multiple advantages of having youth placed in small secure facilities over larger correctional campuses. The advantages include the chance to keep youth close to home and engaged with their families, greater opportunities to recruit mentors and other volunteers, and provision of quality programs in a smaller treatment environment. Since 2019, the DOC has been transitioning its secure youth facilities from a traditional correctional model to a secure evidence-based treatment model.

The 2017 Wisconsin Act 185 enumerated a project to build state-operated youth facilities that follow this model. In the 2021/2022 budget (2021 Act 58) \$4,000,000 was enumerated for site for site selection, acquisition, and the design of a juvenile correctional facility. Subsequently, Act 2021 252 enumerated and additional \$41,791,000 to construct a juvenile correctional facility in Milwaukee County. The DOC and the DOA have been working to plan and select a feasible location for a new state-of-the-art secure youth facility since 2019. With funding now approved, the DOC was able to move forward on this proposed site. Along with the EA process, the DOC will be working through the local government zoning process to obtain the necessary approvals and as a result there will be several public meetings and listening sessions the public can participate in to learn more about the project and provide input.

## **1.4 Estimated Project Cost, Funding Source and Schedule**

The current project schedule anticipates the following project milestones:

- State Building Commission Approval to Purchase Site – Spring 2023
- State Building Commission Approval to Construct – Summer 2023
- Start Construction – 2024
- Substantial Completion – 2025/2026

The 2017 Wisconsin Act 185 enumerated a project to build state-operated youth facilities that follow this model. In the 2021/2022 budget (2021 Act 58) \$4,000,000 was enumerated for site for site selection, acquisition, and the design of a juvenile correctional facility. Subsequently, Act 2021 252 enumerated and additional \$41,791,000 to construct a juvenile correctional facility in Milwaukee County.

## **2. Existing Environment**

---

### **2.1 Physical**

The site includes approximately 6.66-acres of land comprised of a 6.66-acre parcel (Tax ID No. 1079989212) associated with a legal address of 7930 West Clinton Avenue that is developed with three single-story, brick buildings (approximately 4,400 square foot, 7,438-square foot, and 8,160-square foot), an approximately 1,447-square foot garage, and associated asphalt-paved parking and driving surfaces. The remaining portion of the property is vegetated.

The parcel is currently owned by 7930 W Clinton Avenue LLC and occupied by Poblocki Paving, an asphalt and snow removal company. Existing land use at adjacent parcels is currently industrial and mixed-use commercial. Appendix E includes a vicinity map for the site and surrounding area.

#### **2.1.1 Topography**

A 7.5-minute topographic map of the Menomonee, Wisconsin quadrangle (2018) shows the area topography in and around the property. The topographic map shows the site elevation at approximately +750-760 feet above mean sea level (MSL). Overall topography is shown to generally slope east toward Lake Michigan (approximately six miles east of the subject property).

#### **2.1.2 Air**

The U.S. Environmental Protection Agency (EPA) has designated Milwaukee County as in attainment of all but one of the National Ambient Air Quality Standards. These standards are based on the Clean Air Act, Section 107, as documented in EPA's "Green Book." Accordingly, the concentrations of "criteria" pollutants (i.e., ozone, carbon monoxide, nitrogen dioxide, sulfur dioxide, particulate matter, and lead) are protective of health and welfare, with an adequate margin of safety. The proposed project area is near a 2022 nonattainment area of 8-Hour Ozone (2015). This nonattainment area has been designated as "marginal" by the EPA. Refer to Appendix F.1 for a map indicating the location of the non-attainment area in the vicinity of the project site.

#### **2.1.3 Soils**

Soils in the project area are mapped on the United States Department of Agriculture (USDA) – Natural Resources Conservation Services (NRCS) Web Soil Survey as Ozaukee silt loam, high carbonate substratum, 2 to 6 percent slopes, eroded (approximately 25.1%), Ozaukee silt loam, high carbonate stratum, 2 to 6 percent slopes (approximately 49.5%), Mequon silt loam, 1 to 3 percent slopes (approximately 17.0%), Clayey land (approximately 7.0%), and Ashkum silty clay loam, 0 to 2 percent slopes (approximately 1.3%). The Ozaukee silt loams consist of

moderately well drained soils. Parent soils for the Ozaukee silt loams are thin mantle of loess over silty and clayey till. The Mequon silt loam consists of somewhat poorly drained soils. Parents soils for the Mequon silt loam are loess over calcareous clayey till. A soil map and descriptions are included in Appendix F.2.

## **2.2 Biological**

The current biological habitat of the project area consists of approximately 85% developed area (parking lot, gravel, building(s), aggregate piles and manicured lawn) and approximately 15% undeveloped open area (woodland, natural vegetation).

## **2.3 Utilities**

The site is currently serviced by public sanitary and storm sewer, public water, natural gas, and telecommunication utilities.

## **2.4 Stormwater**

The site is in an area of relatively low relief, with surface drainage on the Property generally infiltrated into permeable surfaces or as sheet flow across the paved parking lot and into storm water catch basins in the paved area that discharge to either the municipal storm sewer system or undeveloped areas of the project site.

## **2.5 Surface Water Bodies, Wetlands and Flood Plains**

### **2.5.1 Surface Water Bodies**

Surface water bodies are not located within the boundary of the project site. Refer to Appendix C, Figure 3 for the Wisconsin Department of Natural Resources (WDNR) surface water body and wetland map associated with the project site. The closest existing surface water to the site is Noya Pond (WBIC 11100), approximately 0.35 miles northwest of the project area as identified by the WDNR surface water viewer. The property is located within the Lake Michigan basin that lies along eastern Wisconsin and borders the western shore of Lake Michigan (U.S. Geological Survey publication Water Resources of Wisconsin – Lake Michigan basin, Hydrological Atlas 432). Lake Michigan is located approximately 6 miles from the property and Little Menomonee River is approximately 0.70 miles west.

### **2.5.2 Wetlands and Wetland Indicator Soils**

No mapped wetlands are located within the boundaries of the project site. The closest mapped wetland is located 0.05 miles west of the project site, and wetland indicator soils are also identified at the southern extent and immediately southwest of the project boundary. The wetland indicator soils located within the project site are outside of the grading/redevelopment

limits for the proposed facility. Refer to Appendix C, Figure 3 for mapped surface water bodies and wetlands map associated with the project site.

### **2.5.3 Floodplains**

No floodplains are present within the boundary of the proposed project and the area is classified as minimal flood hazard. The closest mapped floodplain is approximately 0.34 miles south of the project area, Zone A in the Federal Emergency Management Agency (FEMA) National Flood Hazard Layer (NFHL) Viewer. Refer to Appendix C, Figure 4 for a floodplain map of the project area and adjacent properties.

## **2.6 Vehicular Traffic**

Estimates developed by the Wisconsin Department of Transportation (WisDOT) indicate that State Trunk Highway 181, North of West Good Hope Road, experiences an average annual daily traffic (AADT) count of 29,700 vehicles (Site 402662, data as of September 23, 2019). Traffic count data was not available for West Clinton Avenue.

## **2.7 Environmental Database Results and Reports**

Standard environmental databases and previous reports were reviewed for potential environmental concerns within the project site. Findings of the review are discussed in the following paragraphs.

### **2.7.1 DATCP Registered Tanks**

The Wisconsin Department of Agriculture, Trade and Consumer Protection (DATCP) storage tank database was accessed on October 25, 2022, for sites with registered above-ground storage tanks (AST) and/or registered underground storage tanks (UST). The DATCP database search revealed no records of registered tanks for the 7930 West Clinton Avenue address. Streets within project site and adjacent areas were searched and a radius of 1-mile around the project site address was used to filter through results. Active tanks found within 1-mile of the project site area include:

- WI Underground Storage Tank (UST): Eighteen sites
- WI Aboveground Storage Tank (AST): Fourteen sites

Tank information is summarized below.

Site Address	Tank ID	Tank Contents	Tank Capacity (gallons)	Tank Type	Approximate Distance from Site (miles)
7411 N 76 <sup>th</sup> St	92274	Fuel Oil	550	AST	0.3
7616 W Good Hope Rd	107975	Unleaded Gasoline	8000	UST	0.4
7616 W Good Hope Rd	108773	Diesel	10000	UST	0.4
7616 W Good Hope Rd	113100	Unleaded Gasoline	12000	UST	0.4
7605 W Good Hope Rd	112631	Unleaded Gasoline	12000	UST	0.5
7605 W Good Hope Rd	113445	Diesel	15000	UST	0.5

6829 N 76 <sup>th</sup> St	112035	Unleaded Gasoline	12000	UST	1.0

Refer to Appendix F.3 for DATCP search results including active, closed, removed, and out of service tanks.

### 2.7.2 BRRTS Database

The WDNR Bureau of Remediation and Redevelopment Tracking System (BRRTS) database and Remediation and Redevelopment (R&R) Sites Map (i.e., GIS Registry) for the subject property and surrounding area was searched on October 26<sup>th</sup>, 2022. Information in the BRRTS database and R&R Sites Map is summarized below. Twenty-one (21) sites were identified within 0.5 miles of the project site and are summarized below:

**Environmental Assessment**  
**DFD Project Number: 18K2M**  
 Milwaukee, Wisconsin  
 January 27, 2023

<b>BRRTS Facility Name</b>	<b>BRRTS Facility ID</b>	<b>Type</b>	<b>Start Date</b>	<b>Closed Date</b>	<b>Summary</b>
Heiser Lincoln Mercury	341005149	Closed Leaking Underground Storage Tank (LUST)	8/14/1995	9/9/1997	Petroleum soil contamination (Unleaded Gasoline)

Refer to Appendix F.4 for a map depicting the location of BRRTS sites near the project location and additional details on each site listed above.

### 2.7.3 RCRA Info Search

The Resource Conservation and Recovery Act (RCRA) information database was searched for facilities past or present that may be generators, transporters, treaters, storers, or disposers of hazardous waste. The proposed project area search was conducted on October 26<sup>th</sup>, 2022, for these types of facilities. Twelve (12) sites were identified within a 0.3-mile search radius of the project area and are summarized below:

RCRA Facility	Owner Name	Handler ID	Handler Type	Waste Description
Amoco	Amoco Oil Co	WID988616439	Very Small Quantity Generator	Ignitable Waste; Corrosive Waste; Lead; Benzene
Auto Transtech 2	Lands Real Estate Holdings LLC	WIR000143792	Unspecified Universe	Tetrachloroethylene
Autozone #1789	Autozone Inc	WIR000159467	Very Small Quantity Generator	Ignitable Waste; Corrosive Waste; Barium; Chromium; Lead; Methyl Ethyl Ketone
Best Cleaners	Luong Catherine	WID981538135	Very Small Quantity Generator	Halogenated Solvents

Refer to Appendix F.5 for summary info for each site.

### **2.7.4 Solid and Hazardous Waste Information System (SHWIMS)**

The Solid and Hazardous Waste Information System (SHWIMS) on the Web (SOTW) provides access to information on sites and facilities operating at sites, that are regulated by the WDNR Waste Management program. Activities that occur at facilities include landfill operation, waste transportation, hazardous waste generation, wood burning, waste processing, sharps collection and many more. The SHWIMS was searched for sites listed as Superfund sites and generators of hazardous/toxic waste on October 26<sup>th</sup>, 2022. Two operating SHWIMS facilities were found on Clinton Avenue approximately 100 feet and 500 feet east of the site, but are classified as inactive for waste management activities. Refer to Appendix F.6 for details on the on SHWIMS listings.

### **2.7.5 Phase I Environmental Site Assessment (ESA)**

A Phase I Environmental Site Assessment (ESA) conducted for the site (Draft, GEI Consultants, October 2022) identified the following potential environmental conditions and our opinion on whether the conditions are or are not currently recognized environmental conditions (RECs), controlled recognized environmental conditions (CRECs), or historical recognized environmental conditions (HRECs) for site:

**Presence of Fill Material on Subject Property:** Observation of the subject property revealed fill material was present in the southern portion of the subject property and a berm made of fill material was observed along the west and north portions of the subject property. Interviews with Mr. Sagan indicated that in approximately 2015, Poblocki Paving milled portions of the existing asphalt pavement in the southern portion of the subject, regraded the southern portion of the subject property using the asphalt millings and topsoil from the subject property, and created the berms using asphalt millings and topsoil from the subject property.

Although not considered a REC, CREC, or significant data gap, the following was identified as Business Environmental Risk (BER) for the subject property, which is defined in the ASTM Standard to be “A risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of commercial real estate, not necessarily related to those environmental issues required to be investigated in this practice.”

**Asbestos Containing Material:** Reasonably ascertainable information suggests that the buildings on the subject property were constructed between 1983 and 1995. Federal regulations promulgated in the 1970s banned the use of asbestos in some materials (e.g., wallboard patching compounds and thermal insulation products), and federal regulations and court rulings in the late 1980s and early 1990s banned the use of asbestos in specific materials (e.g., flooring felt) and in products that historically did not contain asbestos; however, several materials commonly used during building construction prior to and after those dates (mastic, ceramic and vinyl flooring, roofing, etc.) may contain asbestos. Based on the age of the buildings on the subject property, there is a potential for asbestos-containing material (ACM) to be present in the

buildings. An ACM Survey by a Wisconsin-licensed asbestos inspector would be required to determine the presence/extent of ACM on the subject property.

### 2.7.5.1 Phase I ESA Summary and Recommendations

We have performed a Phase I Environmental Site Assessment of the subject property in conformance with the scope and limitations of ASTM Practice E1527-21.

This assessment has revealed no evidence of RECs, CRECs, or significant data gaps in connection with the subject property, except for the following Business Environmental Risk (BER):

- Fill material present in the southern portion of the subject property and berms containing fill material present along the west and north portions of the subject property.

Although not considered RECs, the potential risk identified in the Phase I ESA was identified as a BER for the subject property. As a result of the findings of the Phase I ESA as outlined above, a Phase II ESA was commissioned for the site. The results are summarized in the following Section 2.7.6.

### 2.7.6 Phase II Environmental Site Assessment

Field work for a Phase II ESA was completed by GEI in October 2022 with a draft report completed in November 2022 for the project area located at 7930 West Clinton Avenue. The scope of work of the Phase II ESA was intended to evaluate the significance of BERs identified in the Phase I ESA by determining whether impacted soil or groundwater exists at the proposed project site from historical operations on the site.

The Phase II ESA included collecting and screening soil samples, completing soil analysis, and assessing the subsurface to investigate potential impacts from historic operations on the site. The scope of the Phase II ESA was not intended to define the extent and degree of potentially impacted soil or groundwater at the site, but rather provide information regarding the environmental concerns illuminated in the Phase I ESA.

Seven (7) soil borings were advanced using direct-push methods (truck-mounted Geoprobe®) to depths ranging from 8.0 feet to 20.0 feet below ground surface (bgs). The soil borings were advanced to a depth, which would characterize potentially impacted material based on the historical data or characteristics of the BER identified in the Phase I ESA.

- Seven soil borings (GP-1, GP-2, GP-3, GP-4, GP-5, GP-6 and GP-7) were advanced to depths of 8 and 20 feet bgs in areas where fill was observed from site observations and aerial photo review. One shallow and deep sample were collected from each boring to

assess soil directly adjacent to the fill characteristics and underlying soil quality, respectively.

Locations of the soil borings are depicted on Figure 5 in Appendix C. Chemical laboratory analysis was determined based on the BERs identified in the Phase I ESA.

#### **2.7.6.1 Phase II ESA Summary and Recommendations**

Analytical results at GP-1 – GP-7 indicate concentrations which exceed residual contaminant levels (RCLs) for metals in native soils at the site. Appropriate management either through onsite engineering controls during construction to limit inhalation, ingestion, or dermal contact of native soils are recommended.

## **3. Description of Those Elements in the Human Environment Affected by the Proposed Action**

---

### **3.1 Terrestrial Resources**

The existing project site area consists of three single-story brick buildings, a garage, aggregate piles, and asphalt paved surfaces. The remainder of the site is undeveloped and vegetated.

Site activities will include demolition of the existing buildings, removal of the aggregate piles, site grading, construction of a new building, outdoor recreation area, parking lot, and materials delivery/loading area.

#### **3.1.1 Surface Manipulation**

Existing structures, trees, and vegetation will be removed as needed from the site to facilitate construction of the building, outdoor recreation area, parking lot, and facilitate stormwater drainage. The site will be graded to allow for positive drainage away from the footprint of the building toward stormwater inlets for conveyance. Cutting and filling of existing soils will be needed for final site grading and estimated volume will be determined after the site survey is complete. Materials that are removed from the site will be properly disposed. The total area of land disturbance estimated at 6.0 acres. Fugitive dust control on site will comply with WDNR Conservation Practice Standard 1068.

#### **3.1.2 Subsurface Manipulation**

Short term impacts include the excavation and backfilling of soils during installation/expansion of utilities and the new building foundation.

Erosion control measures will be implemented in accordance with WDNR technical standards for construction within and around the perimeter of the construction zone. The construction zone will be limited to the smallest possible size in order to minimize disruption of site soils.

#### **3.1.3 Atmospheric Manipulation**

Site lighting will include exterior fixtures for security at the site perimeter, building exterior, and general lighting of parking lots, sidewalks, and other areas where pedestrian and vehicular traffic will occur. Project activities will not generate a significant source of air emissions. Emissions will increase in the short-term during construction due to use of equipment and vehicles during site work. Long-term emissions will increase at the site due to an increase in vehicular traffic intensity from workers and visitors. Point source emissions requiring permitting, monitoring, and reporting are not planned for the facility

## 3.2 Biological Resources

There will be a long-term impact on the flora and fauna on the project site as this project will result in a decreased amount of vegetation and an increased amount of impervious area. Long-term impacts to fauna will include displacement of local birds and mammals that may reside within the project site area, due to loss of natural habitat. Impacts to flora include permanent removal of existing vegetation within the project footprint. Revegetation including landscaped areas and tree plantings will occur as part of the restoration plan for the site.

Impacts to fish and invertebrates within the watershed are not anticipated to result from this project. Best management practices for stormwater control and appropriate erosion control practices required by the WDNR will be followed during and after project construction in order to minimize potential biological impacts.

## 3.3 Structures

The proposed JCF will be approximately 71,000 GSF for the facility and will include the following structures:

- Operational capacity and beds for 32 youth.
- Classroom space for educational purposes, including a computer lab. Additional program space will be planned for music, carpentry, and welding, and dedicated teacher spaces.
- Food Services. Food preparation is anticipated to occur on site.
- Space for nursing staff for primary health care services.
- Multipurpose space for visiting and programs.
- Space for administrative services, mechanical areas, supplies, and equipment.
- The facility will have a Type 1 security level, including the following:
  - 16-foot precast concrete and brick perimeter wall surrounding the courtyard/recreational area
  - 6-foot decorative steel picket nuisance fence set back from the courtyard/recreational area
  - Locked building
  - Perimeter patrol and emergency vehicle access road
  - Perimeter lighting
  - Monitored perimeter cameras
  - Roof perimeter security

- Motorized gates operated from within the building
- 24/7/365 secured facility
- Parking lot with approximately 100 parking stalls.
- Secure courtyard/recreational area.

Construction will meet applicable state and local building codes, including mechanical, electrical, fire protection, plumbing, and heating, ventilation, and air conditioning (HVAC). Finished building height will be approximately 31 feet. Refer to Appendix E for preliminary site plans for the proposed facility.

### **3.4 Hazardous Materials**

Potentially hazardous materials including lead-based paint (LBP), asbestos-containing building materials (ACM), polychlorinated biphenyl (PCB)-containing ballasts, mold, radon, and mercury-containing switches may be present in the existing three structures and garage onsite. Inspection and testing for the building materials will be required prior to demolition. If hazardous materials are identified, they will require management and/or abatement according to applicable WDNR regulations.

### **3.5 Utilities**

When construction is complete, the building will be serviced by new or upgraded storm sewer, sanitary sewer, electrical services, water services, telecommunications, and natural gas at the site. Refer to Appendix E for preliminary site plans for the proposed facility.

### **3.6 Traffic, Parking and Roadways**

During construction, an increase in traffic on West Clinton Avenue and connected roadways near the project location will occur due to equipment and workers accessing the site. There may also be intermittent lane closures during construction and utilities installation. Following the completion of construction, these roads will experience an increase in vehicular traffic, as compared to current traffic levels, due to staff and visitors at the new facility. An increase in approximately 100 parking stalls is anticipated to facilitate operations and parking for visitors at the site.

### **3.7 Noise**

Although construction will occur during permitted hours, the increase in noise will be mitigated with muffling equipment when feasible. Noise may temporarily affect local verbal communication and pose a short-term nuisance to those working immediately adjacent to the site.

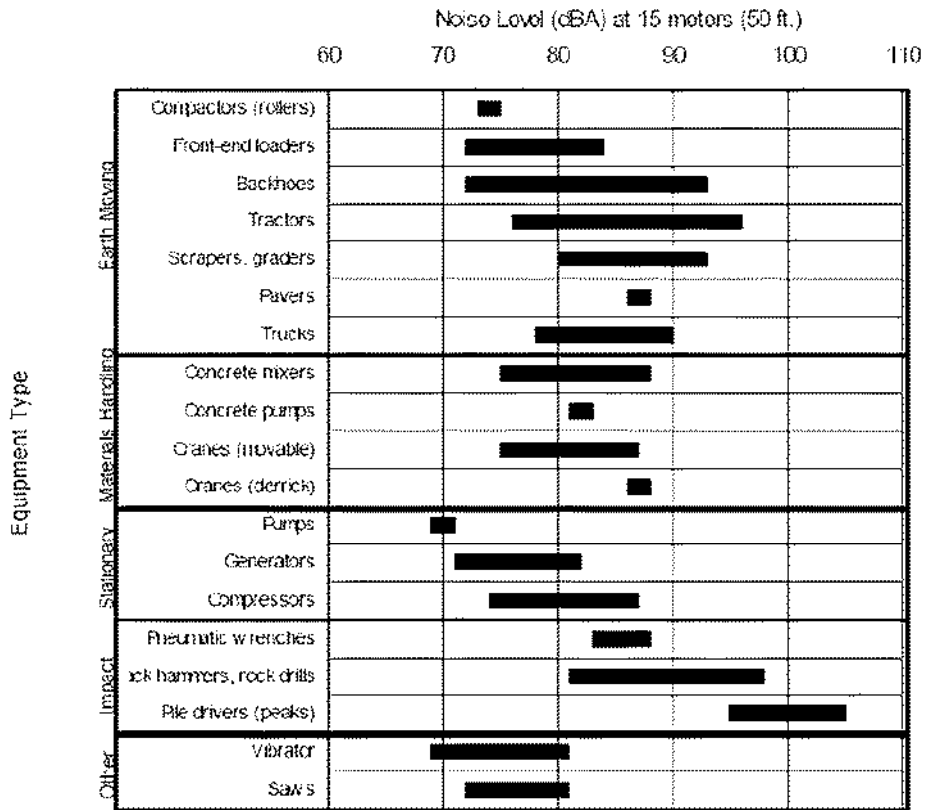

Figure 1. Construction Equipment Noise at 15 Meters  
 Source: U.S. Report to the President and Congress on Noise. February 1972.

The chart above lists typical peak operating noise levels from construction equipment at a distance of 50 feet, grouping construction equipment by mobility and other operating characteristics. Earth moving equipment will be used for this project. Residual noise levels in an outdoor residential setting are 44 decibels (dB) during the daytime, and 40 dB during the evening (U.S. Senate, February 1972).

Noise generated as part of construction activities is anticipated to occur between 7:00 AM and 5:00 PM. Work will target compliance with the applicable ordinances.

### 3.8 Surface Water Quality

There are no surface water features (streams, lakes, etc.) or other aquatic resources located within the boundaries of the project site. The closest surface water body to the site is Noya Pond (WBIC 11100), approximately 0.35 miles northwest. Because water quality and erosion control measures will be in place during and after construction, it is unlikely that these aquatic resources will be affected by the project. Wisconsin Administrative Code NR151 (Runoff Management) includes performance standards for construction sites and post construction sites. The standards are intended to protect water quality by minimizing the amount of sediment and other non-point source pollutants that enter waterways. The standard regulations for

construction site erosion control call for the limitation of sediment so that there is a reduction of 80 percent of the sediment load carried in runoff as compared to no sediment or erosion control measures. The following erosion control and stormwater management provisions are currently incorporated into the design:

- Silt fence will be installed on the perimeter of the construction limits
- A 50-foot minimum rock construction entrance/exit will be maintained and utilized to prevent sediment tracking off site.
- Soil stockpiles will be stabilized
- Proposed storm sewer inlets will be constructed with inlet protection until the site is stabilized. There are no existing storm sewer inlets.
- If infiltration is utilized, the basins will be constructed at the end of the construction sequencing.

### **3.9 Wetlands**

No mapped wetlands are located within the boundaries of the project site. The closest mapped wetland is located 0.05 miles west of the project site. Mapped wetland indicator soils are identified at the southern tip of the project site area and are currently outside of the project grading/disturbance limits. Refer to Appendix C, Figure 3 for the mapped surface water bodies and wetlands map associated with the project site.

### **3.10 Flood Plains**

No floodplains are present within the boundary of the proposed project and the area is classified as minimal flood hazard. The closest mapped floodplain is approximately 0.34 miles south of the project area, Zone A in the FEMA National Flood Hazard Layer (NFHL) Viewer. Refer to Appendix C, Figure 4 for a floodplain map of the project area and adjacent properties.

### **3.11 Groundwater**

Groundwater impacts from this project are not anticipated other than a long-term decrease in the amount of surface water infiltration resulting from the new building, parking lot, and internal roadways, which will increase the impermeable surface area onsite.

### **3.12 Protected Plant, Animal, and Fish Species**

Impacts to protected plant, animal, and fish species are not anticipated as a result of this project.

An Endangered Resources Review (ERR) was submitted to the WDNR on October 6, 2022, to identify data for threatened, endangered, and/or special concern species that may be located in the general area or impacted directly by the project. A response (ER Log 22-727) was received

from the WDNR on October 6, 2022, which indicated that there are no follow-up actions required to comply with state and/or federal laws for species which may be present within the project or surrounding area. There are recommended (voluntary) actions for the site related to prescribed vegetation planning, erosion control, exclusion fencing, and maintenance. Provisions will be incorporated into the design as appropriate for the recommended actions. Refer to Appendix G.1 for correspondence related to ER review.

### **3.13 Historical or Cultural Resources**

Commonwealth Heritage Group, Inc. (Commonwealth) conducted an archaeological and architecture/history review for the project in accordance with Wisconsin Statute 44.40. The closest property (AHI #232604) is 500 feet east of the site and is not an adjacent parcel. Based on these results, in a report dated September 22, 2022, Commonwealth concluded that the project will not have an effect on historic properties and additional archaeological investigations are not recommended. Refer to Appendix G.2 for an excerpt from the archaeological survey report and concurrence of no impacts received from the State Historical Preservation Office.

## **4. Evaluation of Significant Primary and Secondary Environmental Effects That Can Reasonably be Foreseen if the Proposed Action is Carried Out**

---

### **4.1 Primary Environmental Effects**

#### **4.1.1 *Physical Effects***

Physical effects from the project are long-term and primarily related to removal of existing structures and pavements, disturbance of soil, and change of grades. Excavation and grading will be required to construct the building footings, utilities, and achieve required elevations at the site. Physical changes to the site will not encroach on or impact adjacent properties except to modify visual appearance of the site from surrounding areas/properties, and from West Clinton Avenue. Total area of land disturbance is estimated to be approximately 6.0 acres.

Appropriate provisions to minimize light pollution will be incorporated into the project design, while maintaining lighting levels required for security measures at the facility. The proposed project will not impact air quality. Short-term air emissions will be limited to those from use of equipment and site work during project construction. Long-term impacts to air quality are not considered significant. There will be no point source emissions, and no significant emission sources in the planned use of the facility once constructed.

#### **4.1.2 *Biological Effects***

Long-term adverse biological impacts are not anticipated as the project site is located in a developed urban area. There will be a biological impact due to the loss of green space associated with the footprint of the building and parking lot. Impacts will be minimized by protecting trees and/or other vegetation onsite which are not required to be removed to facilitate construction.

Adverse impacts to threatened, endangered and/or protected flora or natural communities are not anticipated as a result of the project. There are recommended (voluntary) actions for the site related to prescribed vegetation planning, erosion control, exclusion fencing, and maintenance. Provisions will be incorporated into the design as appropriate for the recommended actions.

#### **4.1.3 *Effects from Site Demolition and Management of Impacted Media***

Assessment and removal of ACM, LBP, and other hazardous building materials will be required prior to demolition of the existing structures at the site. Additionally, impacted soil may require measures for proper management during construction to protect construction workers, and to mitigate potential for offsite migration in fugitive dust and/or stormwater runoff/erosion.

There will be an overall beneficial impact to the environment as a result of demolition and removal of potentially hazardous building materials from the site associated with the three one-story buildings and garage. Materials will be properly managed and disposed during the demolition and removal process.

Short and long-term effects associated with other impacted media on-site (soil) will be managed through engineering controls incorporated into the design to mitigate potential adverse effects to facility users and environmental receptors.

#### **4.1.4 Socioeconomic Effects**

##### **4.1.4.1 Social**

When construction is completed, the project will have a beneficial social impact on youth and staff in the Wisconsin DOC system. The facility will follow evidence-based practices and national trends with a small juvenile corrections facility model, which has multiple advantages over larger conventional schools including:

- The ability to keep youth close to home and engaged with families
- Increased opportunities to recruit a pool of diverse staff
- Greater opportunities to recruit mentors and other volunteers
- Ability to integrate provisions of DOC programs in a treatment environment
- Smaller youth to staff ratio allows for more effective treatment, programming, and communication

Completion of the project will also facilitate compliance with the statutory requirement for closure of the Lincoln Hills School for boys and Copper Lake School for girls as stated in 2017 Act 185 as amended by 2021 Act 58.

The project will impact the land use and function at the site with a modification from a privately owned-property, to a state-owned property managed by DOC and used for a JCF.

##### **4.1.4.2 Economic**

Short-term beneficial economic effects include employment and retention of design and management team members. In addition, there will be a positive impact to the local and regional retail community resulting from purchase of food, lodging, fuel, equipment, and supplies during the construction phase.

Currently, the project has an enumerated budget of approximately \$45 million. Based upon a February 2021 study titled, “Economic Impact of Wisconsin Construction Industry Estimated at \$50.3B” (AGC, Feb. 2021), every \$1 spent directly on construction projects produces an overall economic impact of approximately \$1.81. Therefore, with a budget of \$45 Million, the project may generate over \$81.5 Million in total economic impact. The same February 2021 study states

that every \$1 million spent directly on construction projects generates about 12 jobs throughout the economy. Therefore, this project may generate over 540 full time positions during the course of construction activities.

Long-term beneficial economic effects include employment of approximately 107.50 full-time equivalent (FTE) staff (Facility staff of 88.50 FTEs and Administrative staff of 19.00 FTEs). Most staff will be located on site for various functions at the facility including treatment, security, food service, and maintenance roles. Much of the administrative staff will be located at central office in Madison, WI or elsewhere. The facility operates 24/7/365 with multiple shifts, thus not all staff are on site at the same time. Long-term costs associated with the facility include estimated total annual operating budget of \$13,645,753. The estimated operating cost included utilities, which are estimated to cost \$91,600 per year.

#### **4.1.5 Bike and Pedestrian Traffic**

No long-term effects to bike or pedestrian traffic are anticipated as a part of this project, as there are no public sidewalks or other trails currently present at the site. The project will result in intermittent adverse impacts to bike and pedestrian traffic due to sidewalk closures on West Clinton Avenue. Closures will be short-term in duration and will be restored to existing condition and capacity once construction is completed. The City of Milwaukee is requiring an accessible sidewalk be provided from the JCF building entrances to the existing sidewalks on Clinton Ave. Additionally, bike racks will be provided at the building entrances.

#### **4.1.6 Noise**

Short-term noise impacts to adjacent property owners and current tenants (Pak Technologies, Scholastic Warehouse, Abundant Faith Church of Integrity, Shawn's Auto Repair, Agility Colo, Complete Lawn & Landscape Supply) will occur during the construction phase of the project. Construction elements that will produce elevated noise levels include materials hauling, excavating, grading, landscaping and building construction/demolition. No long-term adverse impacts from noise are anticipated as a result of this project.

#### **4.1.7 Vehicular Traffic**

During construction, local public traffic may experience short-term adverse impacts due to increased congestion associated with construction workers at the site, materials delivery, and increases in construction traffic. Following construction, there will be long-term impact due to a localized increase in traffic intensity associated with 107.5 FTE facility staff members, and visitors to the new JCF.

#### **4.1.8 Energy**

There will be a continued commitment of energy resources to construct the project, including fossil fuel consumption used by construction vehicles and equipment. Energy that will

irreversibly be consumed includes fuel and electricity used to run construction equipment and to operate construction material manufacturing plants and quarries. Other electrical needs may include lighting, compressors, and tools. In the long term, energy consumption is expected including lighting, heating, cooling and general electricity consumption, with estimated annual costs of \$150,000.

## **4.2 Secondary Impacts**

### **4.2.1 Foreclosure of Future Options**

This action does not eliminate future options at the site.

### **4.2.2 Establishment of Precedent**

The decision to construct and operate the facility is not precedent-setting in nature. This action is consistent with activities of other state-funded, owned, and operated facilities to meet needs established by the DOC, and for compliance with statutory requirements enacted by the legislature. The project will comply with federal, state, county, and local requirements for, protected species, management of impacted media, and overall construction as part of the project.

### **4.2.3 Cumulative Impacts When Actions of the Type Are Repeated**

Repeated actions of this type should not result in major or significant cumulative environmental impacts. State of Wisconsin and WDNR requirements for stormwater runoff and fugitive dust control will be implemented at the site during construction. The site will be graded to prevent erosion. Repeated actions to remove potential hazards from the property will generally provide a safer environment to those around the facility. Engineering controls will be designed and constructed to mitigate exposure to users and environmental receptors from impacted soil at the site. Future actions of this type would require state funding to support construction, programmatic, operational, and staffing needs for new facilities. Completion of other JCF facilities will support programming for coverage throughout the state using the model for smaller corrections facilities for treatment and programming by the DOC.

### **4.2.4 Stimulation of Indirect Effects**

There are no anticipated significant adverse indirect effects anticipated as a result of the proposed project. Stormwater runoff will be managed in accordance with WDNR standards. Impacts to threatened and/or endangered species are not likely as a result of construction.

### **4.2.5 Conflicts with Public Agency or Government Plans**

The construction of the new JCF does not appear to conflict with public agency or government plans. In accordance with Wis. Stat. 301.16(3) the site is not subject to the ordinances or

regulations relating to zoning of the county and municipality in which the construction or establishment takes place. Although not required, the DOA and DOC are designing and siting the JCF to satisfy the City of Milwaukee Plan Commission, Common Council, and Zoning Neighborhoods Development regulations and processes, providing multiple opportunities for public engagement and interaction.

#### **4.2.6 Significant Controversy That May be or is Generated by the Proposed Action**

Five automated responses were received during the comment period for the Information Letter. Refer to Appendix A for a compiled summary of comments received as part of the Information Letter distribution.

General project discussions to date and public meetings held to date indicate some controversy associated with the project. A summary of DOC facilitated Community Input Gathering Sessions held in November 2022 are included in Appendix H.1. The summaries include further detail including comments/concerns raised by interested parties.

As part of the site development, the DOC initiated the rezoning process to change the site's zoning classification from Industrial Light (IL1), to a Detailed Plan Development. The rezoning process through the City of Milwaukee requires multiple hearings and approvals with the Mayor's Office, the City of Milwaukee Plan Commission, the City of Milwaukee Common Council, and the Zoning, Neighborhoods & Development Committee which is composed of five members of the Common Council.

The proposed project was presented at the December 7, 2022, meeting of the Granville Development Advisory Committee (GAC). The project was endorsed by the GAC by a 2-0 vote with two committee member abstentions.

Meeting minutes from the December 12, 2022, Milwaukee City Plan Commission are included in Appendix H.2. Public testimony in support and opposition was documented at the meeting with the intent of rezoning of the site. The City Plan Commission granted a conditional approval for the rezoning with the conditions of DOC committing to periodic meetings with the Granville Advisory Committee and updating zoning exhibits to limit occupancy of the facility to 32 youths.

The proposed project action was presented at the January 10, 2023, Milwaukee Zoning, Neighborhoods & Development Committee. The committee motioned to pass the rezoning ordinance following a 5-0 vote. Public testimony in support and opposition was documented at the meeting and is included in Appendix H.3.

The proposed action was then heard at the January 17, 2023, meeting of the Milwaukee Common Council where the rezoning was passed following a vote with 9 council members approving, 2 council members not approving, and one council member abstaining from the vote as outlined in Appendix H.4.

## **5. Brief Study, Development and Description of Reasonable Alternatives to the Proposed Action and a Brief Evaluation of the Significant Environmental or Other Effects of These Alternatives**

---

### **5.1 No Action/Defer the Proposed Project**

Under this action, the project would not occur. Impacts for this alternative are primarily economic and social. Adverse economic impacts would occur due to the loss in monies and schedule availability already expended during the site selection, planning, and design process for the project. Adverse social impacts would occur as the needs of DOC for juvenile corrections facilities in the state would not be addressed, and the statutory requirement under 2017 Act 185 for closure of the Lincoln Hills School for boys and Copper Lake School for girls would likely not be met. Additionally, the construction of smaller regional facilities to follow evidence-based practices for incarcerated youth and bringing youth closer to home and families would likely not be met.

No action or deferring the project is not a viable alternative since another location and/or Type 1 juvenile correction facility is required by statute to continue implementation of DOC programs and operations.

### **5.2 Evaluation of Alternative Locations**

Act 185 created a Juvenile Corrections Study Committee (JCSC) in DOC to develop siting criteria, develop programming rules, and recommend a location for construction of one or more new Type 1 facilities.

A series of meetings were conducted by the JCSC during late-2018 to discuss criteria and recommend additional study of a location for a JCF in southeast Wisconsin, and other potential locations throughout the state. During an October 16, 2018 meeting, the following criteria were used during a voting process by JCSC to recommend study for site selection:

Criteria supporting location recommendations:

- Number of youth
- Proximity to families
- Workforce availability
- Proximity to tribes
- Industry/vocational opportunities
- Availability of services
- Amount of land
- Proximity to technical colleges and universities
- Community resources
- Existing facilities

Criteria that supported ruling out of locations:

- Staffing issues
- Locations are too remote
- Too few youth
- No potential site
- Availability of services
- Drive time for staff
- Rural location
- Harder to access
- Distance from Milwaukee

Since the passage of 2017 Act 185, the state has reviewed several sites as possible locations for a new type 1 facility. 2017 Act 185 required that the Juvenile Corrections Study Committee develop minimum site requirements based on space and security needs, proximity to families that will be served, and best practices for the operation of a new secure youth facility. The law also required that the bipartisan committee select locations from a list of state-owned properties using those standards and submit their final recommendations to the DOC. In 2019 the DOC reviewed the list and determined that the only site recommendation located in the City of Milwaukee on W. Mill Road would not be a viable option as it did not cover the minimum acreage requirement and it was later determined that the DOT would no longer relinquish that property.

After engaging with the City of Milwaukee, the former Mayor proposed a new site on Teutonia Avenue, which would have required that the state acquire that site from the City. In October 2019, the DOC submitted the Teutonia Avenue site, and a site in the Town of Hortonia that was listed in the recommended property list from the study committee. In Feb 2020, the Joint Committee on Finance declined to fund the two proposed locations the DOC submitted for approval for two new Type 1 facilities. After the Joint Committee on Finance declined to approve the necessary funding for those locations, the DOC was forced to halt further action.

Without action by the legislature, the DOC looked to existing sites as a possible avenue for a new Type 1 facility. This would require that the DOC close one of its existing sites and rebuild a new Type 1 at the that location. The Felmers O. Chaney Center (FCCC) was then proposed as a possible site for a new Type 1 Facility, however it would require purchasing nearby city-owned property to comply with the minimum site acreage. Additionally, the FCCC is one of the few DOC facilities to offer work release programs with local employers. Ultimately, the redevelopment of the FCCC was not pursued due to public support for the FCCC current work release programing, community partnerships, and insufficient acreage.

Community groups and legislators submitted other possible sites and the DOC reviewed those sites. The current proposed site was reviewed as a possibility by the County for their proposed youth detention center, but the site was under different ownership at the time and the county chose not to move forward.

Key criteria aiding the eventual selection of the Clinton Avenue site consisted of the following:

- Proximity to community services
- Proximity to health services:
  - Site is approximately ½ miles away from Good Hope Pediatrics and Froedtert Good Hope Health Center.
- Locational attributes and site information:
  - Site is adjacent to major transportation routes.
  - Site is in close proximity to a bus line with regular bus service.
  - Site has a low level of foot traffic and is not in or near a residential area.
  - Site has existing connection to municipal services and utilities.
  - No known environmental issues at the site.

Ultimately, negotiations with the DOA Real Estate team were initiated to purchase the property. The negotiations resulted in a signed agreement with the property owner with normal contingencies required of the property and 2021 Act 252 requirements, DOA approval, Joint Committee on Finance requirements, and State Building Commission approval to purchase the property and construct the facility.

### **5.3 Evaluation of Alternative Designs**

The 2017 Act 185 created a Juvenile Corrections Study Committee (JCSC) in DOC to recommend rules for governing services and programming and recommend a location for construction of one or more new Type 1 facilities.

As part of DFD Project 18A2N, BWBR Architects Inc., was retained to develop a study and conceptual design for a prototype juvenile corrections facility. The prototype study was presented to JCSC during the October 16, 2018, meeting and included conceptual floor plans, site plans, renderings, and cost estimates. Additionally, the goals and vision for the prototype facility were discussed, which included the following elements:

- Community Care
- Day Treatment
- Family Engagement and Support
- Service Coordination
- Community Partnerships
- Residential Treatment
- Juvenile Courts
- Youth Education and Development
- Development of an Integrated Continuum of Care

Suggestions for additional amenities and elements for inclusion in the study were provided by the committee for application during site-specific design for future facilities. The prototype study forms the basis for evaluation and application of alternatives for site specific design of a JCF at the Milwaukee location.

## **6. A Listing of Other Agencies or Groups Contacted and the Comments of and Other Pertinent Information from These Agencies and Groups**

---

An Information Letter regarding the proposed project was sent to the following agencies or groups for comment. A copy of the Information Letter and a detailed distribution list are included in Appendix A.

### State Agencies

- Department of Administration, Division of Facilities Development
- Department of Corrections
- Wisconsin Department of Natural Resources

### Federal Agencies

- U.S. Fish and Wildlife

### Milwaukee County

- Supervisor – District 2
- Board of Supervisors
- County Executive
- House of Corrections
- Sheriff
- Department of Administrative Services
- Health & Human Services – Director
- Office of Emergency Management - Director

### City of Milwaukee

- Mayor
- Assessor's Office
- Commissioner of City Development
- Police Department – Chief
- Fire Department – Chief
- Milwaukee Public School Board – District 1
- Common Council

### Elected Officials

- State of Wisconsin – Governor

- State of Wisconsin – 4th Senate District
- State of Wisconsin – 11<sup>th</sup> Assembly District
- State of Wisconsin – 12<sup>th</sup> Assembly District

## 7. Determination

---

### DETERMINATION

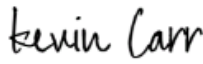

#### Environmental Assessment

**Type 1 Juvenile Corrections Facility  
7930 West Clinton Avenue  
Wisconsin Department of Corrections**

**DFD Project No: 18K2M**

The public review process has been completed. The Wisconsin Department of Corrections (DOC) received and fully considered responses to the news release and other information presented as part of the EA process.

Pursuant to s.1.11, Wis. Stats, and Wisconsin Administrative Code Chapter DOC 335, the assessment of the anticipated environmental impacts of this proposed project is sufficient in scope and detail to conclude that this is not a major action that will significantly affect the quality of the natural and physical environment of human beings. The Wisconsin DOC has made a final determination that an environmental impact statement is not required prior to final action.

## Information Letter, Responses, and Distribution List

September 29, 2022

**Re: Type II WEPA Environmental Assessment (EA)  
Wisconsin Department of Corrections  
Regional Juvenile Corrections Facility  
7930 W. Clinton Avenue  
Milwaukee, Wisconsin**

Consulting  
Engineers and  
Scientists

Potentially Interested Party:

The Wisconsin Department of Administration (DOA) Division of Facilities Development (DFD) has retained GEI Consultants, Inc. (GEI) on behalf of the Wisconsin Department of Corrections (DOC) to prepare an Environmental Assessment (EA) for the proposed construction of a Juvenile Corrections Facility located in Milwaukee, Wisconsin. The EA will be prepared in accordance with the Wisconsin Environmental Policy Act (WEPA), Wisconsin Statutes 1.11, and Wisconsin Administrative Code, Chapter DOC 335. An initial part of the EA process is to contact potentially interested parties regarding the project. The comments received from these parties will be considered during the preparation of the EA to determine whether an Environmental Impact Statement (EIS) is required for the project. Because you, your agency, or group may have an interest in the project, we are inviting you to participate in the process.

### **Project Background**

The DOC Division of Juvenile Corrections currently operates two juvenile correctional facilities, Lincoln Hills School for boys and Copper Lake School for girls, both located outside Irma in northern Wisconsin. Research on juvenile justice systems shows multiple advantages of having youth placed in small secure facilities over larger correctional campuses. The advantages include the chance to keep youth close to home and engaged with their families, greater opportunities to recruit mentors and other volunteers, and provision of quality programs in a smaller treatment environment. Since 2019, the DOC has been transitioning its secure youth facilities from a traditional correctional model to a secure evidence-based treatment model.

The 2017 Wisconsin Act 185 enumerated a project to build state-operated youth facilities that follow this model. 2017 Wisconsin Act 185 was subsequently superseded by 2021 Wisconsin Act 58 which enumerated \$4,000,000 for site selection, acquisition, and design of a juvenile correctional facility located in Milwaukee County. In addition, 2021 Wisconsin Act 252 enumerated an additional \$41,791,000 to construct a juvenile correctional facility in Milwaukee County. The DOC and the DOA have been working to plan and select a feasible location for a new state-of-the-art secure youth facility since 2019. With funding now approved, the DOC was able to move forward on this proposed site. Along with the EA process, the DOC will be working through the local government zoning process to obtain the necessary permits and as a result there will be several public meetings and listening sessions the public can participate in to learn more about the project and provide input.

### **Proposed Project Action**

This project will provide for the planning, design, and construction of a new building for a juvenile corrections facility located at 7930 W. Clinton Avenue in Milwaukee, Wisconsin. An aerial view of the project site is included as Attachment 1. The facility is anticipated to be approximately 66,000 gross square feet (GSF) and will include the following spaces:

- Capacity and beds for 32 youths.
- There will be classroom space for educational purposes, including a computer lab. Additional program space will be planned for music, carpentry, and welding, and dedicated teacher spaces.

- Food Services. Food preparation is anticipated to occur on site.
- Space for nursing staff for primary health care services.
- Multipurpose space for visiting and programs.
- Space for administrative services, mechanical areas, supplies, and equipment.
- The facility will have a Type 1 security level, including a perimeter fence and a locked building.
- Parking lot with estimated 100 parking stalls.
- Courtyard/recreational area.

The estimated project cost is currently under development.

### **EA Schedule**

The EA report will evaluate the potential positive and adverse environmental impacts of the project in accordance with Chapter DOC 335.07. As part of the EA process, GEI will perform research using available databases and resources to collect information pertaining to primary effects as related to environmental, social, economic, cultural, or historic aspects of the project. Secondary impacts and alternatives to the project will also be considered and summarized.

The EA report will be made available to the public for a 15-day comment period anticipated to start in November 2022. A notice will be published in state and local media to announce the availability of the EA. Following completion of the public comment period, comments received will be considered, and the need for an EIS will be determined.

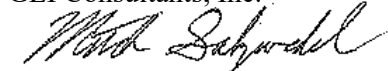

If you are interested in this project, we welcome any comments, suggestions, or other input you feel are important. Please submit your comments related to this project and the associated EA in writing by October 17, 2022, for consideration in the EA report. A Response Form (Attachment 2) is included for your convenience. Send your comments to:

Mitch Salzwedel  
GEI Consultants, Inc.  
406 Science Drive, Suite 404  
Madison, WI 53711  
[msalzwedel@geiconsultants.com](mailto:msalzwedel@geiconsultants.com)

If no comments are received from you or your organization, we will assume that there are no project issues that negatively impact you, or that you would like to comment on.

Sincerely,

GEI Consultants, Inc.

Mitch H. Salzwedel  
Project Manager

Dear writer,

First, let me say thank you for contacting the Office of State Senator Lena C. Taylor (4th Senate District). We truly appreciate hearing from you, and encourage ALL citizens to be engaged! However, because of the large amount of emails we receive, we are only able to respond and take messages from constituents of the 4th Senate District. If I'm not your representative, or you are not sure who represents you in the Legislature, you can find out by entering your address [here](#).

Constituents will receive a response as necessary, so please be sure you have included your full name, address, phone, email and any other contact information that will help us assist you. If you are writing about Unemployment, please consider that you have included the last 4 of your social security number, dob and reason for your concern.

Again, thank you for contacting the Office of State Senator Lena C Taylor by email, please know you can also reach the Madison office at: (608) 266-5810 or visit our website [here](#).

In service,  
Lena C. Taylor  
State Senator  
4th Senate District

EXTERNAL EMAIL

Thank you for contacting my office with your thoughts, concerns, and ideas.

As governor, whether it is traveling across the state for listening sessions, visiting local businesses, schools, or farms, or reading messages like yours, it is my top priority to listen to the people of Wisconsin. As I like to say, I'm not going to make important decisions about you without you. Your input is critically important to me and my administration, and in working together to put our families, communities, and our state in the best position to bounce back from this pandemic and to build the sort of future we want for our state.

My office receives hundreds of letters, emails and phone calls every day, but I want you to know that we have received your message and are giving it due consideration, and greatly appreciate your contacting us.

Again, thank you for writing me. It is an honor to serve you and to represent the people of Wisconsin. As always, please do not hesitate to reply to this email if we can be of further assistance.

Sincerely,

Tony Evers

### EA Public Notice, Public Meeting Minutes, Affidavit of Publication, and Response

**Notice of Availability and Public Information Meeting**  
**Environmental Assessment**  
**Type 1 Juvenile Corrections Facility**  
**7930 West Clinton Avenue, Milwaukee, Wisconsin**

A public information meeting is scheduled for December 7, 2022, at 6:00 p.m. in Room 182 of the Milwaukee Police and Fire Academy Building located at 6680 N. Teutonia Avenue, Milwaukee, Wisconsin 53209. A description of the project will be presented, and all persons will be afforded a reasonable opportunity to identify both orally and in writing any support, issues, or concerns they believe should be addressed as part of the EA process for this proposed project.

The EA has been prepared in accordance with the Wisconsin Environmental Policy Act (WEPA), Wisconsin Statutes 1.11, and Wisconsin Administrative Code Chapter DOC 335.07.

This project will provide for the planning, design, and construction of a new building for a Type 1 Juvenile Corrections Facility (JCF) located in Milwaukee, Wisconsin. The facility is anticipated to be approximately 71,000 gross square feet (GSF) and will include the following spaces: rooms for a total of 32 beds; classroom, computer lab, and teacher spaces; food services; health care services; administrative, mechanical and equipment space; Type 1 security level perimeter fence and locked building; 100 stall parking lot; and courtyard/recreational area. The current project has an enumerated budget of approximately \$45 million.

The intent of this EA process is to evaluate the potential positive and adverse environmental impacts for the project to determine if an Environmental Impact Statement (EIS) is necessary. Based on the analysis conducted to date, the preliminary determination of this EA is that an EIS is not needed for the proposed action.

The EA is available to the general public for a 15-day review period starting December 1, 2022, and this notice of availability has been circulated to the appropriate federal, state, and local agencies.

A copy of the EA document is available for review at the Milwaukee Public Library – Good Hope Branch and online at:

<https://geiconsultants.sharefile.com/d-s90bb587aa0534fc8be9ba9ecaa6bc201>

If you are interested in the potential environmental impact of this project, we welcome your comments in writing by December 16, 2022, at 5:30 p.m. Response Forms are available on the website. Comments should be directed to:

### Attendees:

Mitch Salzwedel – GEI Consultants, Inc.  
Becky Springer – GEI Consultants, Inc.  
Caitlin Graeber – GEI Consultants, Inc.  
Ellen Konerza – BWBR Architects  
Robert Hoffman – WDOA DFD  
Paulina Gutierrez – DOC  
Zach Madden - WDOA

Attendees listed above are those persons who provided information on the meeting sign-in sheets. Other attendees may have been present at the meeting but are not listed above.

---

### Introduction

The following paragraphs represent a summary of the major discussion points from the Public Information Meeting conducted for the Environmental Assessment (EA) for the Type 1 Juvenile Corrections Facility proposed for the City of Milwaukee, Wisconsin. The minutes are not intended to be a verbatim record of all statements, opinions, or comments stated or expressed during the meeting.

### Presentation

The meeting began at 6:10 PM local time. Mitch Salzwedel (GEI Consultants, Project Manager) facilitated the meeting using a PowerPoint presentation. See attached PowerPoint presentation (Attachment A) used to facilitate the meeting.

Mr. Salzwedel introduced himself to the attendees and made note of the sign-in sheet and written comment forms located near the entrance of the room.

Mr. Salzwedel indicated that a Public Notice was published in the Milwaukee Journal Sentinel and the Wisconsin State Journal on December 1, 2022 and indicated that the meeting was being recorded and that meeting minutes would be developed as part of the project record.

The EA preparation and review team were then introduced. After this introduction, Mr. Salzwedel indicated that the purpose of the meeting presentation is to describe the EA process, describe the

proposed project and alternatives, discuss potential project impacts, and obtain public input/comments on potential issues and concerns for the project.

### **Environmental Assessment (EA) Process**

The proposed project is classified as a Type II action, for which an EA is required.

Under DOC 335.07, the project consists of “construction of a new residential institution with fewer than 65 beds at a location where there was not previously a Department of Corrections operated institution,” which classifies it as a Type II action. Preparation of an EA is conducted to determine if an Environmental Impact Statement (EIS) needs to be prepared, or if there will be no significant impact as result of the project.

Mr. Salzwedel clarified the difference between Type II Action and Type I Facility.

Mr. Salzwedel discussed the EA process including the initial data gathering steps, publication, public meeting/notice, and determination of need for EIS or Finding of No Significant Impact (FONSI).

A hardcopy of the EA document is available at the Milwaukee Public Library – Good Hope Branch. An electronic copy was made available on the GEI ShareFile site.

### **Project Need and Description**

Mr. Salzwedel provided the background on 2017 Act 185 as amended by 2019 Act 8, which established the need for the project. 2021 Act 58 enumerated \$4M for site selection, acquisition and design of the facility. Additionally, 2021 Act 252 enumerated \$41.8M to move project forward to build a new Type 1 facility in Milwaukee County. The closure of Lincoln Hills School for Boys and Copper Lake School for Girls by July 1, 2021, requires the construction of new Type 1 facilities to house and treat juveniles. The Milwaukee site was selected as a regional location for a new facility in southeast Wisconsin.

Mr. Salzwedel gave a brief description of the project location using a site map, aerial imagery, and photographs showing different aspects of the project site. He described the site and surrounding land use, which includes mixed-use, commercial, and industrial areas, railroad and electrical utility easements, and vacant land. A general project description including both site and building features were presented.

### **Alternatives**

Alternatives considered during the course of the project included:

- No action/defer project request – Statutory requirement under 2017 Action 185 and 2019 Act 8 will likely not be met. Evidence based practices for incarcerated youths would not be met. The goal of bringing youths closer to their homes and families would not be met.
- Siting Alternatives – Evaluated by the Juvenile Correction Study Committee (JCSC) established by Act 185:
  - Sites in southeast Wisconsin were evaluated.
  - Criteria were developed supporting selection of a location.
  - Criteria were developed which would rule out selection of a location.

- Site at Mill Road and 73<sup>rd</sup> Street had highest evaluation rating and was initially selected. Upon further review, the site was determined to not have sufficient area for the facility, and it was later determined that DOT would no longer relinquish the property.
  - North Teutonia Avenue and Town of Hortonia Locations were declined for funding by the Joint Committee on Finance.
  - Felmers O. Chaney Center (FCCC) location was not selected due to the need to purchase additional acreage, and the requirement to move existing operations from that facility.
  - Location at Mill Road and Teutonia Avenue was selected by DOC due to close proximity to community and health services, proximity to major transportation routes, low foot traffic, distance from residential areas, existing connections to municipal services and utilities. Additionally, there are no known environmental issues at this site.
- Design Alternatives – Evaluated by JCSC:
- Conceptual prototype design was presented by BWBR Architects during the October 16, 2018 JCSC meeting.
  - Floor plans, renderings, site plans, cost were presented, and the types of facility goals were discussed.
  - Committee provided comments and suggestions to be integrated into site specific designs.

### **Project Schedule**

- State Building Commission (SBC) Approval to Purchase Site - Spring 2023
- State Building Commission (SBC) Approval to Construct – Summer 2023
- Substantial Completion - 2025/2026.

### **Detailed Project Description**

Ms. Ellen Konerza (BWBR Architects) provides a detailed description of the facility. Summarized site features, amenities, design concepts, and operational approach as described by Ms. Konerza are presented below:

- Building sits on a 6.66-acre site, approximately 71,000 square feet. Will house 32 youth.
- Goal and focus of the design is to provide a therapeutic building that appears to be more similar to an educational facility than a punitive facility, as a part of the evidence-based approach.
- Fence will be recessed at the site, and not readily seen from the perimeter.
- Parking lot with 100 stalls will recess the building from the street entry point. Bicycle parking will be available at the front entrance. Pedestrian pathways are included in the design for individuals arriving by public transportation or on foot.
- Perimeter patrol road will be located outside the site security (gravity) fence. There will be an outdoor recreation area.
- Goal was to provide a welcoming healing environment, where friends and family feel invited to enter.
- Building will be primarily a single story, but will have a second story mechanical penthouse.
- Bedroom, dayrooms, classrooms, food services, health services, and visitation areas included in the building areas.
- Lighting will be upgraded as a part of construction.

Ms. Konerza then presented several renderings of the front entrance, recreation areas, and interior locations of the proposed facility. Refer to the PowerPoint slides (Attachment A) for the preliminary site plan and renderings for the proposed facility.

### **Potential Impacts**

Mr. Salzwedel continued the meeting by presenting a summary of the potential impacts which were evaluated during the EA process including physical, biological, environmental, social, economic, traffic (bike, pedestrian, vehicular), noise, energy, historical/archeological, secondary, and cumulative impacts. Results of Phase I and Phase II Environmental Site Assessments (ESAs) were also discussed. Refer to the attached PowerPoint presentation slides (Attachment A) for details of each potential impact that was discussed.

### **EA Public Comment Period**

Mr. Salzwedel explained the purpose of the EA comment period. Mr. Salzwedel then opened the floor for comments. No audience members elected to provide comments during the public information meeting.

### **Closing Comments**

Mr. Salzwedel stated that the comment period for the EA closes on December 16, 2022 and thanked the audience for attending. The meeting was adjourned at 7:27 PM.

Project Architect

# EA Public Information Meeting

## Purpose

- Describe Environmental Assessment (EA) Process
- Describe proposed project, alternatives, and schedule
- Discuss the potential project impacts
- Receive Public Comments
  - Please reserve comments until the public comment period at end of presentation

AGENDA

- 1 Introduction
- 2 **Environmental Assessment Process**
- 3 General Project Description
- 4 Alternatives Considered and Project Schedule
- 5 Detailed Project Description by Architect
- 6 Discussion of Potential Impacts
- 7 Public Comment Period
- 8 Closing Comments

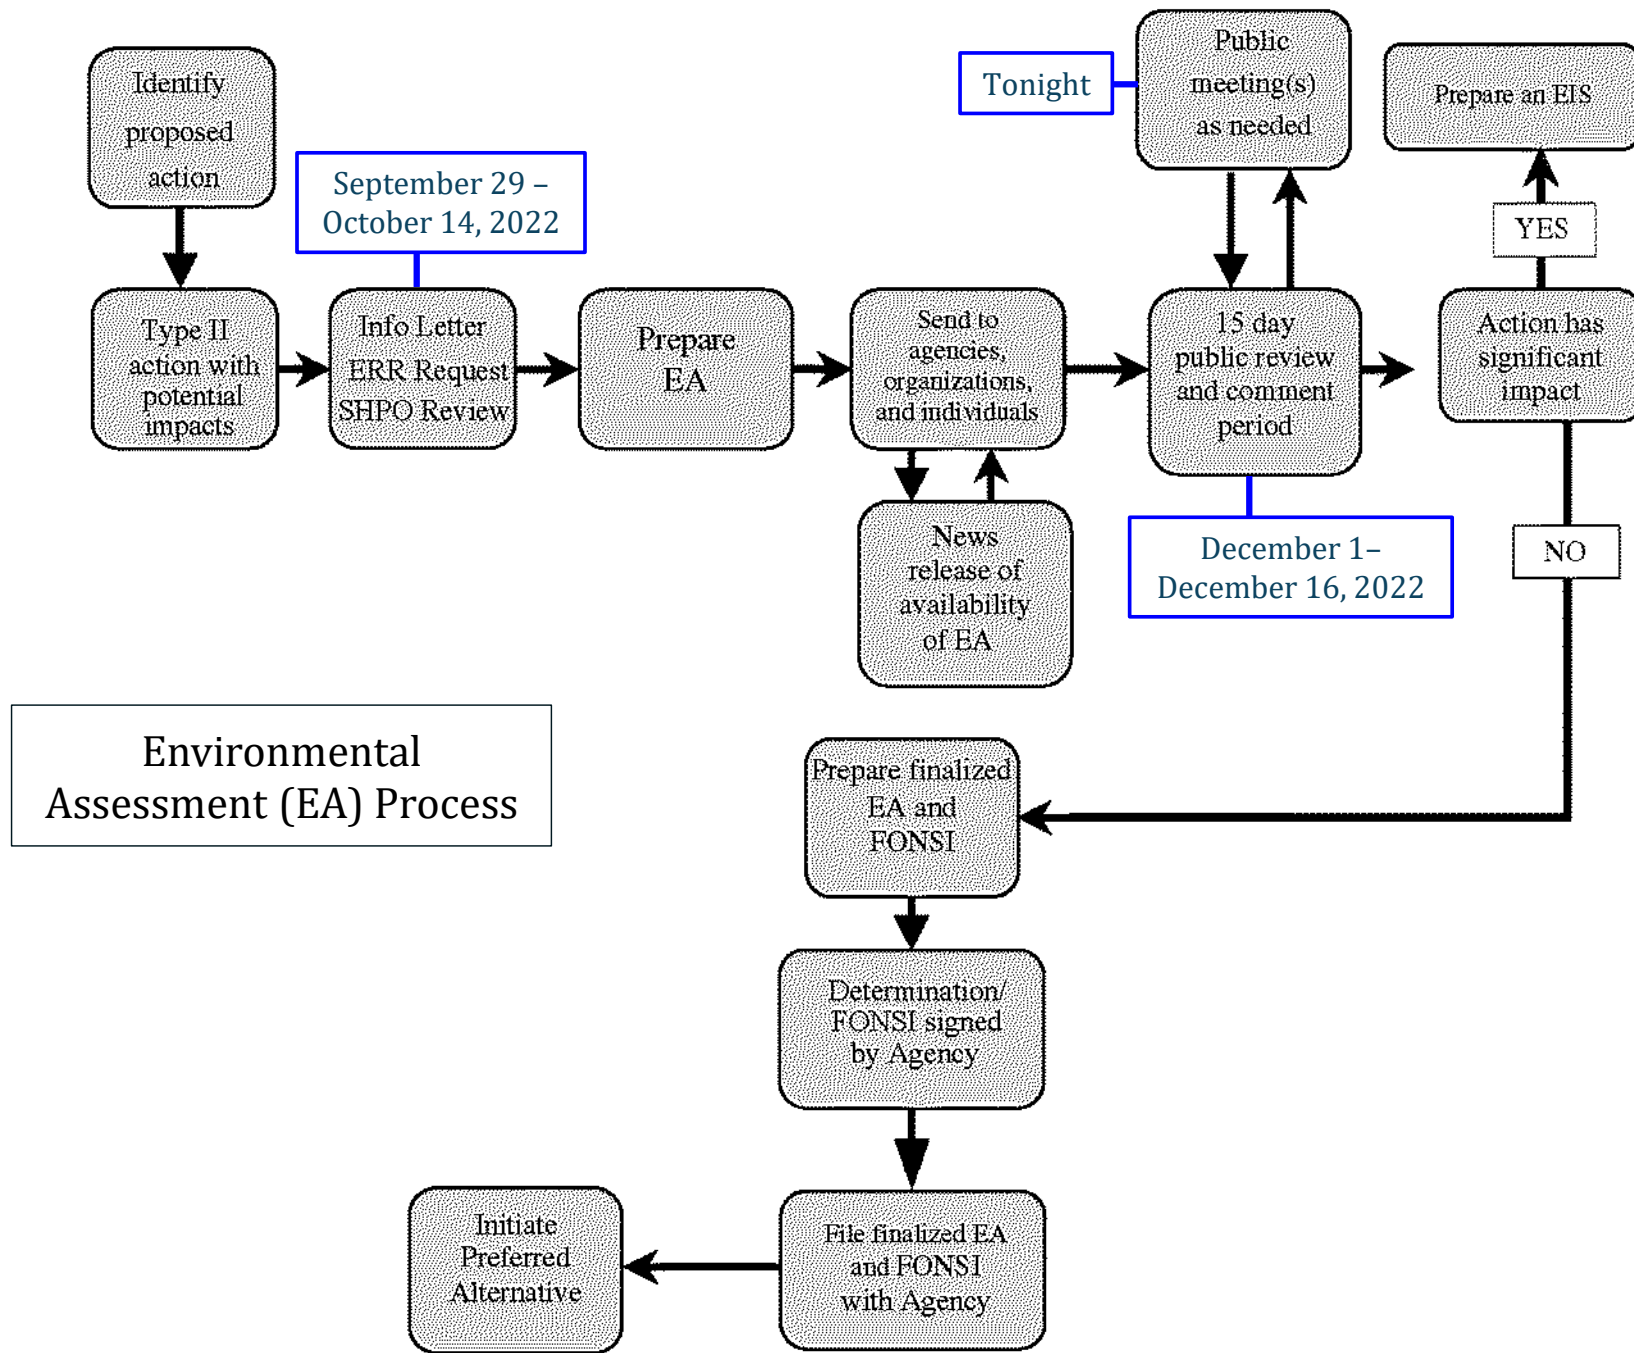

## Environmental Assessment (EA) Process

- Project to be classified as a **Type II Action**:
  - “Construction of a new residential institution of fewer than 65 beds at a location where there was not previously a department-operated institution.”
- Wisconsin Administrative Code Chapter DOC 335.07
  - “determine whether a Type II action is major and significantly affects the quality of the natural and physical environment of human beings, and to describe alternatives to that action”
- Determine whether an Environmental Impact Statement (EIS) is required

\*: Type II Action – not to be confused with the fact that DOC is building a Type 1 Facility, which means a maximum-security facility for youth

## Environmental Assessment (EA) Process

EA Available at:

- Hardcopy - Milwaukee Public Library – Good Hope Branch

- 2 Environmental Assessment Process
- 3 **General Project Description**
- 4 Alternatives Considered and Project Schedule
- 5 Detailed Project Description by Architect
- 6 Discussion of Potential Impacts
- 7 Public Comment Period
- 8 Closing Comments

## Project Need

- 2017 Act 185 as amended by 2021 Act 252
  - 2017 Act 185 requires the DOC to construct smaller regional Type 1 facilities in order to close LHS/CLS
  - 2021 Act 58 - \$4,000,000 enumerated for site selection, acquisition, and the design of a juvenile correctional facility
  - 2021 Act 252 - \$41,791,000 enumerated necessary funding to move project forward to build a new Type 1 facility in Milwaukee County.
  - Milwaukee site selected to allow more youths to be placed in a Type 1 facility closer to home in southeast Wisconsin.

# Site Photo - Looking Southwest

Site buildings, perimeter

## General Project Description

- 6.66-acre site for a 71,000 gross square foot (GSF) building that will include the following:
  - Operational capacity and beds for 32 youth.
  - Classroom, computer lab, program and teacher spaces.
  - Food Services.
  - Space for nursing staff for primary health care services.
  - Multipurpose space for visiting and programs.
  - Space for administrative services, mechanical areas, supplies, and equipment.
  - Parking lot with estimated 100 parking stalls.
  - Courtyard/recreational area.

## General Project Description (continued)

- The facility will have Type 1 security level, including the following:
  - 16-foot concrete and brick perimeter wall surrounding the courtyard/recreational area
  - 6-foot decorative steel picket nuisance fence set back from the courtyard/recreational
  - Locked building
  - Perimeter patrol and emergency vehicle access road
  - Perimeter lighting
  - Monitored perimeter cameras
  - Roof perimeter security
  - Motorized gates operated from within the building
  - 24/7/365 secured facility

## AGENDA

- 1 Introduction
- 2 Environmental Assessment Process
- 3 General Project Description
- 4 **Alternatives Considered and Project Schedule**
- 5 Detailed Project Description by Architect
- 6 Discussion of Potential Impacts
- 7 Public Comment Period
- 8 Closing Comments

# Alternatives Considered

- No Action/Defer Project Request
  - Project does not occur
  - Statutory requirement under 2017 Act 185 for closure of Lincoln Hills School for boys and Copper Lake School for girls would likely not be met
  - Constructing smaller regional facilities to follow evidence-based practices for incarcerated youth would likely not be met
  - Type 1 juvenile correction facility is needed to transfer youths
  - Bringing youth closer to home and families would likely not be met

# Alternatives Considered - Siting

- 2017 Act 185 created a Juvenile Corrections Study Committee (JCSC)
  - Recommend rules for governing services and programming
  - Develop siting criteria to determine location for construction of one or more Type 1 facilities
  - Recommend a location for construction of one or more new Type 1 facilities

## Criteria Supporting Location Recommendations

- Number of youth
- Proximity to families
- Workforce availability
- Proximity to tribes
- Industry/vocational opportunities
- Availability of services
- Amount of land
- Proximity to technical colleges and universities
- Community resources
- Existing facilities

## Criteria that Supported Ruling Out of Locations

- Staffing issues
- Locations are too remote
- Too few youth
- No potential site
- Availability of services
- Drive time for staff
- Rural location
- Harder to access
- Distance from Milwaukee

# Alternatives Considered - Siting (continued)

- Alternative Locations Considered:
  - Mill Road Location
    - Not enough area for a new facility due to buildings onsite and later determined that the DOT would no longer relinquish the property
  - North Teutonia Avenue and Town of Hortonia Locations
    - Joint Committee on Finance declined to fund these two locations
  - Felmers O. Chaney Center (FCCC) Location
    - Need to purchase additional city owned property to comply with minimum site acreage
    - Need to relocate existing programming/residents of FCCC at new location

## Alternatives Considered - Siting (continued)

- Clinton Avenue location – was selected due to key criteria consisting of the following:
  - ✓ Proximity to community services
  - ✓ Proximity to health services:
    - Site is approximately ½ miles away from Good Hope Pediatrics and Froedtert Good Hope Health Center
  - ✓ Locational attributes and site information:
    - Site is adjacent to major transportation routes.
    - Site is in close proximity to a bus line with regular bus service.
    - Site has a low level of foot traffic and is not in or near a residential area.
    - Site has existing connection to municipal services and utilities.
    - No known environmental issues at the site.
  - ✓ Site was previously reviewed as a possibility by Milwaukee County for a proposed youth detention center

# Alternatives Considered - Design

- Conceptual Design - Prototype juvenile corrections facility prepared by BWBR
  - Presented to JCSC during an October 16, 2018, meeting
  - Floor plans, site plans, renderings, and cost estimates
  - Goals and vision were discussed including the following elements:
    - ✓ Community Care
    - ✓ Day Treatment
    - ✓ Family Engagement and Support
    - ✓ Service Coordination
    - ✓ Community Partnerships
    - ✓ Residential Treatment
    - ✓ Juvenile Courts
    - ✓ Youth Education and Development
    - ✓ Development of an Integrated Continuum of Care
  - Suggestions for amenities and elements were provided by JCSC for integration into facility design

# Proposed Project Schedule

## Project Milestones

- State Building Commission Approval to Purchase Site
- State Building Commission Approval to Construct
- Substantial Completion

## Date

Spring 2023\*

Summer 2023\*

2025/2026

\* = Estimated Goal

- 2 Environmental Assessment Process
- 3 General Project Description
- 4 Alternatives Considered and Project Schedule
- 5 Detailed Project Description by Architect
- 6 **Discussion of Potential Impacts**
- 7 Public Comment Period
- 8 Closing Comments

## Potential Impacts - Physical

- Short-term increase in air emissions during construction due to equipment/vehicles and long term increase due to vehicles
- Demolition of existing commercial buildings
- Removal of vegetation and existing pavement
- Change in grades
- Total area of land disturbance – 6.0 acres
- Decrease in permeable area – 1.2 acres
- Change in visual appearance from surrounding area/property
- Increased lighting levels at the site compared to current levels

## Potential Impacts – Biological

- Long-term adverse impacts not anticipated
  - Project is in a developed urban setting
- Loss of greenspace, trees, and other site vegetation
- Displacement of local birds, mammals, insects
- No adverse impacts to fish and aquatic invertebrates anticipated
  - No streams or wetlands are located within the project footprint
- Revegetation will occur as part of landscaping with trees, plantings, and grassed areas
- Adverse impacts to endangered or protected species are not anticipated

### Notes

## Potential Impacts – Environmental

- Phase I Environmental Site Assessment was conducted in September 2022
- Environmental Business Risks (EBRs)
  - Presence of Fill Material – Unknown Source
  - Asbestos Containing Material Potentially Present

Service Layer Credits: City of Milwaukee, Wisconsin  
 Source: Esri, Maxar, Earthstar Geographics, and the GIS User Community

Type 1 Juvenile Corrections Facility  
 Environmental Assessment  
 7930 West Clinton Avenue  
 Milwaukee, Wisconsin

GEI Project 2203107

PHASE II ESA SOIL  
 BORINGS

November 2022

Figure 5

## Potential Impacts – Environmental

- Phase II Environmental Site Assessment was conducted in October 2022.
  - Soils: Arsenic background threshold exceedances in all samples
    - No polychlorinated biphenyls (PCBs), volatile organic compounds (VOCs), polycyclic aromatic hydrocarbons (PAHs) over reporting limits
  - Groundwater: Not observed to a depth of 20 feet, groundwater pathway not completed.

# Potential Impacts – Environmental

- Phase II Environmental Site Assessment
  - Native Soils: Exceedances of Metals Residual Contaminant Levels (RCLs)
  - Recommendations
    - Soil - Appropriate management of soil either through onsite engineering controls or excavation and disposal. Limit inhalation, ingestion, or dermal contact during construction.

## Potential Impacts – Environmental

- Beneficial impact during building demolition
- Assess and remove potentially hazardous material
- Typical materials
  - Asbestos
  - Lead-Based paint
  - Mercury switches
  - PCB ballasts
  - Mold
- To be removed and properly disposed

## Potential Impacts – Environmental

- Beneficial impact from engineering controls and/or removal measures for soil
- Mitigation of potential long-term adverse effects to juveniles, workers, and visitors at the site
- Removal/grading of aggregate, asphalt, soil piles, restoration with vegetation

## Potential Impacts – Social

- Short-term adverse impacts due to construction noise, dust, and vibrations
- Long-term impact due to change in appearance of property from surrounding properties and to local residents
- Existing neighborhood is primarily mixed-use commercial and light-industrial use. Project will impact the land use and function at the site. Impacts to adjacent properties not anticipated

## Potential Impacts – Social

- Long-term beneficial impact on youth and staff in the Wisconsin DOC system. Facility will follow evidence-based practices and national trends with a small juvenile corrections facility model:
  - Ability to keep youth close to home and engaged with families
  - Increased opportunities to recruit a pool of diverse staff
  - Greater opportunities to recruit mentors and other volunteers
  - Ability to integrate provisions of DOC programs in a treatment environment
  - Smaller youth to staff ratio allows for more effective treatment, programming, and communication.

## Potential Impacts – Economic

- Enumerated budget of approximately \$45 Million
- Positive short-term impact to local retail community during construction from food, lodging, fuel, equipment, and supply expenditures
- Short-term increase in employment – estimated 540 project-related jobs generated based on 12 jobs per \$1M in spending (Economic Impact of Wisconsin Construction Industry, AGC, Feb. 2021)

## Potential Impacts – Economic (continued)

- Long-term beneficial economic effects include employment of approximately 107.5 full time equivalent (FTE) staff
  - Approximately 88 staff at new facility
  - Approximately 19 staff located at Central office in Madison or elsewhere
- Annual Operating Cost – Approximately \$13,645,730
- Annual Utilities Costs – Approximately \$91,600

## Potential Impacts – Bike and Pedestrian Traffic

- Short-term adverse impacts to pedestrian and bike traffic on Clinton Avenue
- Intermittent sidewalk closures for construction traffic
- Existing sidewalks restored to existing condition/function as part of construction, additional sidewalks added as a benefit
- Accessible ramps, bike lanes, and bike racks to be extended to the facility as a benefit

## Potential Impacts – Noise

- Short-term impacts to adjacent property owners during construction:
  - Materials hauling
  - Excavating
  - Grading and site work
  - Building construction
- No Long-term adverse impacts anticipated

## Potential Impacts – Vehicular Traffic

- Short-term impact to traffic patterns - potential for slowdowns and congestion due to construction traffic
- Short-term impacts to pedestrian and bike traffic – intermittent sidewalk closures during construction
- Long-term increase in traffic intensity associated with visitors and facility staff
- Approximately 100 new parking stalls at project site

## Potential Impacts – Energy

- Short-term impact due to commitment of resources during construction
  - Construction materials
  - Fossil fuels
  - Electricity
- Long term impacts due to operation of facility
  - Lighting
  - Heating
  - Cooling
  - General electricity consumption

## Potential Impacts – Historical/Archaeological

- No adverse impacts anticipated
  - Archaeological survey was conducted by Commonwealth Heritage Group, Inc. in September 2022
  - No cultural materials or archaeological features were identified within the project area

## Secondary Impacts

- Foreclosure of Future Options – None
- Establishment of Precedent – Action is consistent with other state-funded, owned, and operated facilities
- Stimulation of Indirect Effects – Stormwater runoff will be managed according to WDNR standards. Impacts to Threatened or Endangered Species are not anticipated

## Secondary Impacts

- Conflicts with Government or Agency Plans - Does not appear to impact other plans. Site is not subject to County or municipal zoning ordinances per Wis. Stat. 301.16(3) however is voluntarily participating in the rezoning process and providing multiple opportunities for public engagement and interaction.
- Significant Controversy Associated with the Action - Five automatic responses were received from Information Letter. General project discussions and public meetings to date generally included discussion regarding:
  - Site selection process
  - Status and content of the current site design/programming
  - Potential economic, environmental, traffic, economic, physical, and social impacts related to the proposed project

## Secondary Impacts

- Cumulative Impacts When Similar Actions Are Repeated  
Major or significant cumulative environmental impacts are not anticipated:
  - WDNR requirements for stormwater runoff and fugitive dust control will be implemented
  - Sites graded during construction to prevent erosion
  - Removal of potential hazards from state or city-owned properties will generally provide a safer environment
  - Commitment of state funding will be required to support construction, programmatic, operational, and staffing needs for new facilities
  - Completion of other Type 1 juvenile corrections facilities will support DOC programming for coverage throughout the state

## AGENDA

- 1 Introduction
- 2 Environmental Assessment Process
- 3 General Project Description
- 4 Alternatives Considered and Project Schedule
- 5 Detailed Project Description by Architect
- 6 Discussion of Potential Impacts
- 7 **Public Comment Period**
- 8 Closing Comments

# Public Comment Period

## Purpose

- Solicit public input to identify potential issues and concerns specific to the proposed action
- Compile and distribute comments to Wisconsin Department of Corrections
- Determination for a Finding of No Significant Impact (FONSI) or need for an Environmental Impact Statement (EIS)

# Public Comment Period

- Open for Comments (Oral/Written)
  - Not intended for questions and answers
  - Provide comment for the project record
  - Please state name, entity representing, and comment
  - Speak clearly for microphone
  - 2-3 minutes per person for comments to allow time for all persons to speak
  - Turn in written comment sheets

## AGENDA

- 1 Introduction
- 2 Environmental Assessment Process
- 3 General Project Description
- 4 Alternatives Considered and Project Schedule
- 5 Detailed Project Description by Architect
- 6 Discussion of Potential Impacts
- 7 Public Comment Period
- 8 **Closing Comments**

## Closing Comments

- EA comment period concludes December 16, 2022
- Department of Corrections to consider comments to issue a determination of Finding of No Significant Impact (FONSI) or need for Environmental Impact Statement (EIS)
- Additional information available regarding public involvement at [doc.wi.gov/act185](https://doc.wi.gov/act185)

**Thank You For Attending**

GEI  
406 SCIENCE DRIVE, SUITE 404  
MADISON, WI, 53711

Notice of Availability and Public  
Information Meeting  
Environmental Assessment  
Type 1 Juvenile Corrections Facility  
7930 West Clinton Avenue, Milwaukee,  
Wisconsin

STATE OF WISCONSIN

A public information meeting is sched-  
uled, the time and location of the public  
information meeting is posted at the  
website below. A description of the proj-  
ect will be presented, and all persons will  
be afforded a reasonable opportunity to  
identify both orally and in writing any  
support, issues, or concerns they believe  
should be addressed as part of the Envi-  
ronmental Assessment (EA) process for  
this proposed project.

I hereby state that I am authorized by Journal Media  
Group to certify on behalf of Journal Sentinel Inc.,  
publisher of the Milwaukee Journal Sentinel editions  
dated and The Sunday Journal Sentinel, public  
newspapers of general circulation, printed and  
published in the city and county of Milwaukee;  
published in the Daily Edition of the Milwaukee Journal  
Sentinel on 12/01/2022 ; that the Milwaukee Journal  
Sentinel and The Sunday Journal Sentinel are  
newspapers printed in the English language and that  
said printed copy was taken from said printed  
newspaper(s).

The EA has been prepared in accord-  
ance with the Wisconsin Environmental  
Policy Act (WEPA), Wisconsin Statutes  
1.11, and Wisconsin Administrative  
Code Chapter DOC 335.07.

This project will provide for the planning,  
design, and construction of a new build-  
ing for a Type 1 Juvenile Corrections Fa-  
cility (JCF) located in Milwaukee,  
Wisconsin. The facility is anticipated to  
be approximately 71,000 gross square  
feet (GSF) and will include the following  
spaces: rooms for a total of 32 beds;  
classroom, computer lab, and teacher/  
spaces; food services; health care ser-  
vices; administrative, mechanical, and  
equipment space; Type 1 security level  
perimeter fence and locked building; 100  
staff parking lot; and  
courtyard/recreational area. The current  
project cost estimate is approximately  
\$45 million.

The intent of this EA process is to evalu-  
ate the potential positive and adverse  
environmental impacts for the project to  
determine if an Environmental Impact  
Statement (EIS) is necessary. Based on  
the analysis conducted to date, the pre-  
liminary determination of this EA is that  
an EIS is not needed for the proposed  
action.

The EA is available to the general public  
for a 15-day review period starting  
December 1, 2022, and this notice of  
availability has been circulated to the ap-  
propriate federal, state, and local agen-  
cies.

A copy of the EA document is available  
for review at the Milwaukee Public Li-  
brary - Good Hope Branch and online at:

<https://geiconsultants.sharefile.com/d-s90bb587aa0534fc8be9ba9ecaa6bc201>

If you are interested in the potential envi-  
ronmental impact of this project, we wel-  
come your comments in writing by  
December 16, 2022, at 5:00 p.m. Re-  
sponse forms are available on the  
website. Comments should be directed

Notice of Availability and Public Information Meeting  
Environmental Assessment  
Type 1 Juvenile Corrections Facility  
7930 West Clinton Avenue, Milwaukee, Wisconsin

A public information meeting is scheduled, the time and location of the public information meeting is posted at the website below. A description of the project will be presented, and all persons will be afforded a reasonable opportunity to identify both orally and in writing any support, issues, or concerns they believe should be addressed as part of the Environmental Assessment (EA) process for this proposed project.

The EA has been prepared in accordance with the Wisconsin Environmental Policy Act (WEPA), Wisconsin Statutes 1.11, and Wisconsin Administrative Code Chapter DOC 335.07.

This project will provide for the planning, design, and construction of a new building for a Type 1 Juvenile Corrections Facility (JCF) located in Milwaukee, Wisconsin. The facility is anticipated to be approximately 71,000 gross square feet (GSF) and will include the following spaces: rooms for a total of 32 beds; classroom, computer lab, and teacher spaces; food services; health care services; administrative, mechanical and equipment space; Type 1 security level perimeter fence and locked building; 100 staff parking lot; and courtyard/recreational area. The current project cost estimate is approximately \$45 million.

The intent of this EA process is to evaluate the potential positive and adverse environmental impacts for the project to determine if an Environmental Impact Statement (EIS) is necessary. Based on the analysis conducted to date, the preliminary determination of this EA is that an EIS is not needed for the proposed action.

The EA is available to the general public for a 15-day review period starting December 1, 2022, and this notice of availability has been circulated to the appropriate federal, state, and local agencies.

A copy of the EA document is available for review at the Milwaukee Public Library - Good Hope Branch and online at:

<https://geiconsultants.sharefile.com/d/295bc587aad534fc82e9ba2eaaadb201>

If you are interested in the potential environmental impact of this project, we welcome your comments in writing by December 16, 2022, at 5:30 p.m. Response Forms are available on the website. Comments should be directed to:

**Subject:** [EXT] Your message has been received

EXTERNAL EMAIL

Thank you for contacting my office with your thoughts, concerns, and ideas.

As governor, whether it is traveling across the state for listening sessions, visiting local businesses, schools, or farms, or reading messages like yours, it is my top priority to listen to the people of Wisconsin. As I like to say, I'm not going to make important decisions about you without you. Your input is critically important to me and my administration, and in working together to put our families, communities, and our state in the best position to bounce back from this pandemic and to build the sort of future we want for our state.

My office receives hundreds of letters, emails and phone calls every day, but I want you to know that we have received your message and are giving it due consideration, and greatly appreciate your contacting us.

Again, thank you for writing me. It is an honor to serve you and to represent the people of Wisconsin. As always, please do not hesitate to reply to this email if we can be of further assistance.

Sincerely,

Tony Evers  
Governor

This map complies with FEMA's standards for the use of digital flood maps if it is not void as described below. The basemap shown complies with FEMA's basemap accuracy standards

The flood hazard information is derived directly from the authoritative NFHL web services provided by FEMA. This map was exported on 10/25/2022 at 11:57 AM and does not reflect changes or amendments subsequent to this date and time. The NFHL and effective information may change or become superseded by new data over time.

This map image is void if the one or more of the following map elements do not appear: basemap imagery, flood zone labels, legend, scale bar, map creation date, community identifiers, FIRM panel number, and FIRM effective date. Map images for unmapped and unmodernized areas cannot be used for regulatory purposes.

## MAP INFORMATION

The soil surveys that comprise your AOI were mapped at 1:15,800.

Warning: Soil Map may not be valid at this scale.

Enlargement of maps beyond the scale of mapping can cause misunderstanding of the detail of mapping and accuracy of soil line placement. The maps do not show the small areas of contrasting soils that could have been shown at a more detailed scale.

Please rely on the bar scale on each map sheet for map measurements.

Source of Map: Natural Resources Conservation Service

Web Soil Survey URL:

Coordinate System: Web Mercator (EPSG:3857)

Maps from the Web Soil Survey are based on the Web Mercator projection, which preserves direction and shape but distorts distance and area. A projection that preserves area, such as the Albers equal-area conic projection, should be used if more accurate calculations of distance or area are required.

This product is generated from the USDA-NRCS certified data as of the version date(s) listed below.

Soil Survey Area: Milwaukee and Waukesha Counties, Wisconsin

Survey Area Data: Version 18, Sep 7, 2022

Soil map units are labeled (as space allows) for map scales 1:50,000 or larger.

Date(s) aerial images were photographed: May 20, 2020—Jul 1, 2020

The orthophoto or other base map on which the soil lines were compiled and digitized probably differs from the background imagery displayed on these maps. As a result, some minor shifting of map unit boundaries may be evident.

## Map Unit Legend

Map Unit Symbol	Map Unit Name	Acres in AOI	Percent of AOI
AsA	Ashkum silty clay loam, 0 to 2 percent slopes	0.1	1.3%
Cv	Clayey land	0.5	7.0%
MtA	Mequon silt loam, 1 to 3 percent slopes	1.1	17.0%
OuB	Ozaukee silt loam, high carbonate substratum, 2 to 6 percent slopes	3.3	49.5%
OuB2	Ozaukee silt loam, high carbonate substratum, 2 to 6 percent slopes, eroded	1.7	25.1%
<b>Totals for Area of Interest</b>		<b>6.6</b>	<b>100.0%</b>

## Milwaukee and Waukesha Counties, Wisconsin

### OuB—Ozaukee silt loam, high carbonate substratum, 2 to 6 percent slopes

#### Map Unit Setting

*National map unit symbol:* 2sn09

*Elevation:* 650 to 1,010 feet

*Mean annual precipitation:* 31 to 39 inches

*Mean annual air temperature:* 44 to 49 degrees F

*Frost-free period:* 125 to 185 days

*Farmland classification:* All areas are prime farmland

#### Map Unit Composition

*Ozaukee, high carbonate substratum, and similar soils:* 96 percent

*Minor components:* 4 percent

*Estimates are based on observations, descriptions, and transects of the mapunit.*

#### Description of Ozaukee, High Carbonate Substratum

##### Setting

*Landform:* Ground moraines, end moraines

*Landform position (two-dimensional):* Summit, shoulder

*Landform position (three-dimensional):* Interfluve

*Down-slope shape:* Convex

*Across-slope shape:* Linear

*Parent material:* Thin mantle of loess over silty and clayey till

##### Typical profile

*Ap - 0 to 8 inches:* silt loam

*E - 8 to 10 inches:* silt loam

*Bt1 - 10 to 13 inches:* silty clay loam

*2Bt2 - 13 to 23 inches:* silty clay

*2Bt3 - 23 to 29 inches:* silty clay loam

*2Cd - 29 to 60 inches:* silty clay loam

##### Properties and qualities

*Slope:* 2 to 6 percent

*Depth to restrictive feature:* 23 to 40 inches to densic material

*Drainage class:* Moderately well drained

*Runoff class:* Medium

*Capacity of the most limiting layer to transmit water*

*(Ksat):* Moderately low to moderately high (0.06 to 0.20 in/hr)

*Depth to water table:* About 24 to 42 inches

*Frequency of flooding:* None

*Frequency of ponding:* None

*Calcium carbonate, maximum content:* 60 percent

*Maximum salinity:* Nonsaline to very slightly saline (0.0 to 2.0 mmhos/cm)

*Available water supply, 0 to 60 inches:* Low (about 4.6 inches)

### **Interpretive groups**

*Land capability classification (irrigated):* None specified

*Land capability classification (nonirrigated):* 2e

*Hydrologic Soil Group:* C

*Ecological site:* F110XY012IL - Moist Glacial Drift Upland Forest

*Forage suitability group:* Mod AWC, adequately drained with limitations (G095BY006WI)

*Other vegetative classification:* Mod AWC, adequately drained with limitations (G095BY006WI)

*Hydric soil rating:* No

### **Minor Components**

#### **Ashkum, drained**

*Percent of map unit:* 2 percent

*Landform:* End moraines, ground moraines

*Landform position (two-dimensional):* Toeslope

*Landform position (three-dimensional):* Base slope

*Down-slope shape:* Linear

*Across-slope shape:* Concave

*Ecological site:* R110XY024IL - Ponded Depressional Sedge Meadow

*Hydric soil rating:* Yes

#### **Urban land**

*Percent of map unit:* 1 percent

*Landform:* Ground moraines

*Landform position (two-dimensional):* Summit

*Landform position (three-dimensional):* Interfluve

*Down-slope shape:* Linear

*Across-slope shape:* Linear

*Hydric soil rating:* No

#### **Orthents, clayey**

*Percent of map unit:* 1 percent

*Landform:* Ground moraines

*Landform position (two-dimensional):* Summit, backslope

*Landform position (three-dimensional):* Interfluve

*Down-slope shape:* Convex

*Across-slope shape:* Convex

*Ecological site:* F095XB010WI - Loamy and Clayey Upland

*Hydric soil rating:* No

### OuB2—Ozaukee silt loam, high carbonate substratum, 2 to 6 percent slopes, eroded

#### Map Unit Setting

*National map unit symbol:* 2sn0c

*Elevation:* 650 to 1,010 feet

*Mean annual precipitation:* 31 to 39 inches

*Mean annual air temperature:* 44 to 49 degrees F

*Frost-free period:* 125 to 185 days

*Farmland classification:* All areas are prime farmland

#### Map Unit Composition

*Ozaukee, high carbonate substratum, eroded, and similar soils:* 96 percent

*Minor components:* 4 percent

*Estimates are based on observations, descriptions, and transects of the mapunit.*

#### Description of Ozaukee, High Carbonate Substratum, Eroded

##### Setting

*Landform:* Ground moraines, end moraines

*Landform position (two-dimensional):* Summit, shoulder

*Landform position (three-dimensional):* Interfluvium

*Down-slope shape:* Convex

*Across-slope shape:* Linear

*Parent material:* Thin mantle of loess over silty and clayey till

##### Typical profile

*Ap - 0 to 7 inches:* silt loam

*Bt1 - 7 to 11 inches:* silty clay loam

*2Bt2 - 11 to 22 inches:* silty clay

*2Bt3 - 22 to 27 inches:* silty clay loam

*2Cd - 27 to 60 inches:* silty clay loam

##### Properties and qualities

*Slope:* 2 to 6 percent

*Depth to restrictive feature:* 22 to 40 inches to densic material

*Drainage class:* Moderately well drained

*Runoff class:* Medium

*Capacity of the most limiting layer to transmit water*

*(Ksat):* Moderately low to moderately high (0.06 to 0.20 in/hr)

*Depth to water table:* About 24 to 42 inches

*Frequency of flooding:* None

*Frequency of ponding:* None

*Calcium carbonate, maximum content:* 60 percent

*Maximum salinity:* Nonsaline to very slightly saline (0.0 to 2.0 mmhos/cm)

*Available water supply, 0 to 60 inches:* Low (about 4.2 inches)

### **Interpretive groups**

*Land capability classification (irrigated):* None specified

*Land capability classification (nonirrigated):* 2e

*Hydrologic Soil Group:* C

*Ecological site:* F110XY012IL - Moist Glacial Drift Upland Forest

*Forage suitability group:* Mod AWC, adequately drained with  
limitations (G095BY006WI)

*Other vegetative classification:* Mod AWC, adequately drained with  
limitations (G095BY006WI)

*Hydric soil rating:* No

### **Minor Components**

#### **Ashkum, drained**

*Percent of map unit:* 2 percent

*Landform:* End moraines, ground moraines

*Landform position (two-dimensional):* Toeslope

*Landform position (three-dimensional):* Base slope

*Down-slope shape:* Linear

*Across-slope shape:* Concave

*Ecological site:* R110XY024IL - Ponded Depressional Sedge  
Meadow

*Hydric soil rating:* Yes

#### **Urban land**

*Percent of map unit:* 1 percent

*Landform:* Ground moraines

*Landform position (two-dimensional):* Summit

*Landform position (three-dimensional):* Interfluve

*Down-slope shape:* Linear

*Across-slope shape:* Linear

*Hydric soil rating:* No

#### **Orthents, clayey**

*Percent of map unit:* 1 percent

*Landform:* Ground moraines

*Landform position (two-dimensional):* Summit, backslope

*Landform position (three-dimensional):* Interfluve

*Down-slope shape:* Convex

*Across-slope shape:* Convex

*Ecological site:* F095XB010WI - Loamy and Clayey Upland

*Hydric soil rating:* No

## Milwaukee and Waukesha Counties, Wisconsin

### MtA—Mequon silt loam, 1 to 3 percent slopes

#### Map Unit Setting

*National map unit symbol:* g953  
*Elevation:* 670 to 1,100 feet  
*Mean annual precipitation:* 28 to 36 inches  
*Mean annual air temperature:* 37 to 55 degrees F  
*Frost-free period:* 135 to 170 days  
*Farmland classification:* Prime farmland if drained

#### Map Unit Composition

*Mequon and similar soils:* 90 percent  
*Minor components:* 10 percent  
*Estimates are based on observations, descriptions, and transects of the mapunit.*

#### Description of Mequon

##### Setting

*Landform:* Ground moraines  
*Landform position (two-dimensional):* Summit  
*Landform position (three-dimensional):* Interfluvium  
*Down-slope shape:* Linear  
*Across-slope shape:* Concave  
*Parent material:* Loess over calcareous clayey till

##### Typical profile

*Ap - 0 to 8 inches:* silt loam  
*BA - 8 to 12 inches:* silt loam  
*2Bt - 12 to 19 inches:* silty clay  
*2BC - 19 to 26 inches:* silty clay loam  
*2C - 26 to 60 inches:* silty clay loam

##### Properties and qualities

*Slope:* 1 to 3 percent  
*Depth to restrictive feature:* More than 80 inches  
*Drainage class:* Somewhat poorly drained  
*Capacity of the most limiting layer to transmit water (Ksat):* Moderately low to moderately high (0.14 to 0.57 in/hr)  
*Depth to water table:* About 12 to 36 inches  
*Frequency of flooding:* None  
*Frequency of ponding:* None  
*Calcium carbonate, maximum content:* 40 percent  
*Maximum salinity:* Nonsaline to very slightly saline (0.0 to 2.0 mmhos/cm)  
*Available water supply, 0 to 60 inches:* High (about 10.5 inches)

##### Interpretive groups

*Land capability classification (irrigated):* None specified  
*Land capability classification (nonirrigated):* 2w

*Hydrologic Soil Group:* C  
*Ecological site:* F095XB005WI - Moist Loamy or Clayey Lowland  
*Forage suitability group:* Mod AWC, high water table  
(G095BY004WI)  
*Other vegetative classification:* Mod AWC, high water table  
(G095BY004WI)  
*Hydric soil rating:* No

### **Minor Components**

#### **Ashkum**

*Percent of map unit:* 4 percent  
*Landform:* Depressions  
*Landform position (two-dimensional):* Summit  
*Landform position (three-dimensional):* Interfluve  
*Down-slope shape:* Concave  
*Across-slope shape:* Concave  
*Ecological site:* R110XY024IL - Ponded Depressional Sedge Meadow  
*Hydric soil rating:* Yes

#### **Martinton**

*Percent of map unit:* 3 percent  
*Landform:* Ground moraines  
*Landform position (two-dimensional):* Summit  
*Landform position (three-dimensional):* Interfluve  
*Down-slope shape:* Linear  
*Across-slope shape:* Concave  
*Ecological site:* R110XY007IL - Moist Glacial Drift Upland Prairie  
*Hydric soil rating:* No

#### **Ozaukee**

*Percent of map unit:* 3 percent  
*Landform:* Ground moraines  
*Landform position (two-dimensional):* Summit  
*Landform position (three-dimensional):* Interfluve  
*Down-slope shape:* Linear  
*Across-slope shape:* Convex  
*Ecological site:* F110XY011IL - Dry Glacial Drift Upland Forest  
*Hydric soil rating:* No

### Cv—Clayey land

#### Map Unit Setting

*National map unit symbol:* g936  
*Elevation:* 670 to 1,100 feet  
*Mean annual precipitation:* 28 to 36 inches  
*Mean annual air temperature:* 37 to 55 degrees F  
*Frost-free period:* 135 to 170 days  
*Farmland classification:* Not prime farmland

#### Map Unit Composition

*Clayey land and similar soils:* 90 percent  
*Minor components:* 10 percent  
*Estimates are based on observations, descriptions, and transects of the mapunit.*

#### Description of Clayey Land

##### Setting

*Parent material:* Clayey mine spoil or earthy fill

##### Typical profile

*H1 - 0 to 10 inches:* clay loam

##### Properties and qualities

*Slope:* 1 to 12 percent  
*Depth to restrictive feature:* More than 80 inches  
*Drainage class:* Moderately well drained  
*Capacity of the most limiting layer to transmit water (Ksat):* Moderately low to moderately high (0.06 to 0.60 in/hr)  
*Depth to water table:* About 12 to 80 inches  
*Frequency of flooding:* None  
*Frequency of ponding:* None  
*Maximum salinity:* Nonsaline to very slightly saline (0.0 to 2.0 mmhos/cm)

##### Interpretive groups

*Land capability classification (irrigated):* None specified  
*Land capability classification (nonirrigated):* 7s  
*Hydrologic Soil Group:* D  
*Hydric soil rating:* No

#### Minor Components

##### Ashkum

*Percent of map unit:* 10 percent  
*Landform:* Depressions  
*Landform position (two-dimensional):* Toeslope  
*Landform position (three-dimensional):* Base slope  
*Down-slope shape:* Concave  
*Across-slope shape:* Concave

*Ecological site:* R110XY024IL - Poned Depressional Sedge  
Meadow  
*Hydric soil rating:* Yes

### ACTIVITY DETAILS

#### CONTINUING OBLIGATIONS APPLY

Due to remaining contamination, continuing obligations apply to one or more properties. For information specific to the continuing obligations review the documentation below. Prior to constructing or reconstructing a water supply well, you need to contact DNR for approval of well construction specifications.

#### IMPACTED ANOTHER PROPERTY OR RIGHT-OF-WAY

A hazardous substance discharge originating from this property has impacted one or more other properties or right-of-ways (ROWS). For more information, please review the documents below. Certain exemptions regarding the cleanup of impacted properties under Wisconsin Stat. Section 292.13 may apply.

### ACTIVITY DETAILS

#### CONTINUING OBLIGATIONS APPLY

Due to remaining contamination, continuing obligations apply to one or more properties. For information specific to the continuing obligations review the documentation below. Prior to constructing or reconstructing a water supply well, you need to contact DNR for approval of well construction specifications.

#### IMPACTED ANOTHER PROPERTY OR RIGHT-OF-WAY

A hazardous substance discharge originating from this property has impacted one or more other properties or right-of-ways (ROWS). For more information, please review the documents below. Certain exemptions regarding the cleanup of impacted properties under Wisconsin Stat. Section 292.13 may apply.

### Site Files

The document(s) below contain permanent records available at the time the paper file for this Activity was scanned and uploaded. The paper file may have been divided into multiple scanned documents because of size. Records withheld by the department due to confidentiality, attorney-client privilege, lab data, and other sensitive documents, are not included. Additional records associated with this Activity may, or may not, be available through an open records request.

Name	File

Hi Gabe,

Attached is the finalized Endangered Resources Review, invoice, and checklist for the Clinton Avenue Environmental Assessment, Milwaukee County. This project has been assigned ER Log # 22-727. Please include this review with any other DNR permits you apply for and note that the invoice must be paid within 30 days. If you are not the responsible party for paying then please pass it along to the correct person.

Please let me know if you have any questions.

Thank you,  
Angela

Dear David Sumwalt,

We have completed our review of WHS #22-1813, DFD Project- Clinton Ave Juvenile Regional Corrections Facility and find that no eligible properties will be affected (i.e. none are present or there are historic properties present but the project will have no effect upon them).

If your plans change or cultural materials/human remains are found during the project, please halt all work and contact our office.

Please use this email as your official SHPO concurrence for the project. If you require a hard copy signed form, please contact me and I will provide you a signed copy as soon as possible.

Sincerely,  
Alex Eginton

Clinton Ave JRCF  
Milwaukee, Wisconsin  
State-Level Archaeological and Architecture/History Review**

Dear Mr. Salzwedel:

The above-referenced project of the Wisconsin Department of Administration, Division of Facilities Development (DFD) will provide for the planning, design, and construction of a new building at 7930 W. Clinton Avenue in the city of Milwaukee that will serve as a regional juvenile corrections facility (Figure 1). As an undertaking of a state agency, the project must comply with Wisconsin Statute §44.40. This state law requires the consideration of effects to properties listed on, or determined eligible for listing on, the National Register of Historic Places (National Register); previously surveyed and recorded in the Wisconsin Historic Preservation Database (WHPD); and/or locally designated as historic places under Wisconsin Statute §44.45. Additionally, the project must comply with Wisconsin's burial sites law, Wisconsin Statute §157.70, which provides legal protection for human burial sites from unauthorized disturbance.

A review of the WHPD indicated there are no previously surveyed above-ground resources (buildings and structures), archaeological sites, or cemetery/burial sites that may be affected by the project (Figure 2). Further, no properties listed on, or determined eligible for listing on, the National Register, or locally designated as historic places under Wisconsin Statute §44.45, are located in the project area. The closest previously surveyed resource is an unevaluated c.1960 industrial building at 7817 W. Clinton Avenue (AHI #232604). It is located about 500 feet east of the project and not on an adjacent parcel.

Commonwealth concludes that no historic properties or protected human burial sites will be affected by the proposed regional juvenile corrections facility in Milwaukee under Wisconsin Statutes §44.40 and §157.70. Please let us know if you have any questions regarding the results of our archaeological and architecture/history review or require additional information.

Sincerely,

A handwritten signature in black ink that reads "Greg Rainka".

## H.1 – DOC Public Engagement – Community Input & Listening Sessions

# Wisconsin Department of Corrections

Governor Tony Evers | Secretary Kevin A. Carr

To: DOA

From: Paulina Gutiérrez, Legislative Advisor, Department of Corrections (DOC)

Date: November 30, 2022

RE: Overview of public engagement for DOC's proposed site of the new secure youth facility

---

Since announcing the proposed location of 7930 West Clinton Avenue in Milwaukee for DOC's new secure youth facility, the agency has committed to keeping the public informed and providing a variety of opportunities to gather input, answer questions and address any concerns.

In the spring of 2022, the legislature finally passed Act 252 which authorized the necessary funding for us to move forward on a plan. The law also added an unprecedented requirement of seeking local government support of the process before actually engaging the public. While the resolution file #220553 passed in August 2022, it was made clear that the process of public engagement and local decision-making was still expected.

Understanding that this decision would have historic implications, the state committed to moving through the city plan commission and zoning, development, and neighborhood committee process to ensure that the public had multiple opportunities to testify and comment on our proposal. Along with the DOC's commitment to the local process, the agency also participated in and planned several public engagement sessions.

Soon after the announcement of the selected site, Senator Lena Taylor, the jurisdictional state senator, coordinated and hosted three meetings with key stakeholders in her district and invited DOC to participate in those meetings with her constituents. She led presentations regarding the history of Act 185 and the process for the site selection. Her meetings also allowed time for public comments and questions. Below is a summary of her meetings.

- Tuesday, September 6, 2022 1pm, Virtual Teams Meeting
  - Meet and Greet with leadership at the Havenwoods Neighborhood Partnership (formally known as Havenwoods Economic Development Corporation)
  - Attendees
    - Senator Lena Taylor
    - DOC Secretary Kevin Carr
    - Paulina Gutiérrez, Legislative Advisor, DOC
    - Zach Madden, Legislative Affairs Director, Office of the Governor
    - Stephanie Harling, Executive Director, Havenwoods Neighborhood Partnership

Liz Hammer, Community Organizer, Havenwoods Neighborhood Partnership

- Thursday, September 8, 2022 12:30pm, Mr. B's Lounge, 8617 West. Brown Deer Road
  - Approximately 60 attendees
  - Local Businesses and Community Member meeting with the Granville Business Improvement District
  - Sen. Taylor took questions and comments specifically from the local businesses and community residents that attended
  - Panelists
    - Senator Lena Taylor
    - Representative Dora Drake
    - Representative LaKeisha Myers
    - DOC Secretary Kevin Carr
    - Zach Madden, Legislative Affairs Director, Office of the Governor
  
- Wednesday, September 28, 2022 6:00pm, Abundant Faith Church, 7830 West Good Hope Road
  - Approximately 150 attendees
  - Sen. Taylor took public comments and registered attendees that were in support, against, or neutral
    - 46 people registered to speak: 17 in favor, 26 against, 3 for information only, and additional 3 people spoke who did not register, of which 2 were in favor and 1 was against.
  - Panelists & Speakers
    - Senator Lena Taylor
    - Representative Dora Drake
    - Representative LaKeisha Myers
    - County Supervisor Deanna Alexander
    - DOC Secretary Kevin Carr
    - Lance Horozewski, Assistant Administrator, DOC Division of Juvenile Corrections
    - Deonte Cottingham, EXPO

The DOC facilitated three Community Input Gathering sessions, two on Wednesday November 16<sup>th</sup> and one on Saturday, November 19<sup>th</sup>. As part of the requirements in 2019 Act 8, the DOC formally noticed these public meetings on Tuesday, November 8<sup>th</sup>. These sessions contained three different stations: 1) building design, 2) operations & staffing, and 3) programming & youth justice. At these stations, the public could engage directly with a subject matter expert on the specific topic. In addition to written testimony from attendees, each station had a notetaker who tracked comments and concerns to be submitted to DOC and the City for review. Regarding the notetaking – the DOC relied on volunteer staff to facilitate and note-take during the sessions which involved active discussions between the community and subject matter experts. In other instances, participants requested that note takers transcribe verbal testimony. Volunteer staff did their best to track verbal interactions and capture the message from community participants and also interactions between subject matter experts and

residents. Attached is a copy of the flyer that was shared with key stakeholders, local state legislators, the entire common council and city clerk. Also attached is a summary of public comments, concerns, and questions. The questions and concerns that were recorded were responded to during the sessions. The summary provides only comments from community participants. DOC Secretary Kevin Carr attended all three sessions, along with representatives from the building design team, the Division of Juvenile Corrections and the Department of Children & Families.

- Community Input Gathering Sessions
  - Approximately 80 attendees over a three-day period
  - Wednesday, November 16<sup>th</sup>, 9am to noon, Milwaukee Police Academy
  - Wednesday, November 16<sup>th</sup>, 5pm to 8pm, Milwaukee Police Academy
  - Saturday, November 19<sup>th</sup>, 10am to noon, Milwaukee Police Academy

In addition to the meetings above, the DOC is also required to complete a public meeting as part of the environmental assessment process. This public meeting is being led by an environmental consultant who will conduct a presentation on their findings and then take public comment.

- Wednesday, December 7<sup>th</sup>, 6pm to 8pm, Milwaukee Safety Academy

As part of the local zoning process, the City is also holding several official public hearings, which are listed below. The public will have an opportunity to comment at these public hearings, as well.

- Wednesday, December 7<sup>th</sup>, Granville Development Advisory Committee
- Monday, December 12<sup>th</sup>, City Plan Commission
- January 2022, Zoning, Neighborhood, & Development Committee for the Common Council

## Public Notice

# Community Input Gathering & Listening Sessions

Wisconsin Department of Corrections' proposal for a New Secure Youth Facility on  
7930 West Clinton Avenue, Milwaukee, WI 53233

The DOC will be facilitating multiple Community Input Listening Sessions to provide the public an opportunity to review plans, ask questions and submit comments. Three sessions will be held on:

Wednesday, November 16, 2022

9:00 am to 12:00 pm

5:00 pm to 8:00 pm

Saturday, November 19, 2022

10:00 am to 12:00 pm

All three sessions will be held at the:

Milwaukee Police Academy

6680 N Teutonia Ave

Milwaukee, WI 53209

All three sessions will offer the same information in an open house style community event with displays and experts from DOC and the design team available for open dialogue and short presentations in a roundtable format relating to the proposed secure youth facility at:

*7930 West Clinton Avenue, Milwaukee, Wisconsin 53233.*

There will be stations with resources relating to the interior and exterior of the building, on-site youth programming, juvenile justice resources, project process and opportunities for public comment.

The public will have an opportunity to review preliminary site plans and view the latest renderings. DOC and building design staff will be available during each session to present on specific topics, facilitate discussion, answer any questions, and take public comment.

For more detail on DOC's proposal, please visit our website at: [doc.wi.gov](http://doc.wi.gov), click on [New Juvenile Facility](#).

### **Summary from Volunteer Notetaker Staff and Submitted Written Comments**

The DOC held three public listening sessions on Wednesday, November 16<sup>th</sup> in the morning and evening and on Saturday, November 19<sup>th</sup> in the morning. All three sessions offered the same information in an open house style community event with displays and experts from the DOC and the design team. There were four stations available for the public to engage and they included: 1) Building Design, 2) Operational Security & Staffing, 3) Youth Programming & Juvenile Justice, and 4) Next steps. Each station was staffed by at least two subject matter experts, a facilitator, and a notetaker. Along with notetaking staff, the DOC offered comment cards for participants to submit written testimony as well.

Notetakers were available at each station to track interactions between community participants and subject matter experts and also available to take in public comment if requested by community participants. Below is summary of community interactions and public comment, including written comments from each station for all three sessions. During these interactions, questions were answered by subject matter experts. 18 written comment cards were submitted in total, and notetakers submitted 23 pages worth of notes. The following summary details the issues that participants expressed as concerns, questions, or advocacy. Many of the comments here were repeated throughout.

#### **Youth Programming & Juvenile Justice Station Participant Comments Summary**

- Questions regarding services currently provided at Lincoln Hills/Copper Lake Schools and what will be transferred to the new Type 1 facility.
- Questions regarding the effectiveness of programs and how they work, including Dialectical Behavioral Treatment (DBT), faith-based initiatives, family-centered programming, vocational and job readiness training.
- Advocating for improved educational programming and additional vocational opportunities for youth including life skills training as a crucial component of preparing youth for transition to independent living.
- Questions regarding transportation for families and if programs will involve families.
- Questions regarding how programming is prepared and shared with youth prior to release and if families are involved when out in the community.
- Questions regarding how visitation works at a secure facility and how family interact.
- Advocating for partnerships with community groups, faith-based initiatives, youth programming in the community, local businesses and other schools.

### **Summary from Volunteer Notetaker Staff and Submitted Written Comments**

- Advocating to have health services provide programming on nutrition, ADLs, etc. Music/Art and cooking classes would be beneficial.
- Advocating for more transparency regarding programming, sharing information about what types of programs and how they work.
- Advocating for community partnership for circles of support, restorative justice, and conflict resolution.
- Advocating for the foster grandparent program continue to operate in the new facility.
- Advocating for engaging youth in decision making or offering their input on programming or changes at the facility.
- Advocating for support animal programs including dogs and birds.
- Advocating for parenting programs for youths' parents at the new facility.
- Advocating for a sensory room and therapeutic programming.
- Advocating for community involvement in the space to see the programming and feel part of the process.

### **Building Design Station Participant Comments Summary**

- Concerns about security and how it will prevent escapes.
- Advocating for the well-planned and beauty of the design.
- Advocating for punishment to be convicted and sent away; should not be convenient for family, friends, gang members to visit them. Should not be easy for visitors as it should be part of the punishment.
- Advocating for the facility to be placed in another city in Milwaukee County.
- Questions about the perimeter and wall height and standards for fence security.
- Questions are parking and security and cameras.
- Questions regarding recreation space and the movement within the secure perimeter that is outside.
- Advocating to keep Lincoln Hills opens since programs are working there.
- Concerns that the facility could be expanded beyond 32 beds.
- Advocating for different sports other than just basketball.
- Advocating for youth to be closer to home.
- Advocating for current design and a community garden to teach youth and share food with local food pantries.
- Questions about bedrooms, how many kids to a room.
- Advocating for solar energy and rain barrels.

### **Summary from Volunteer Notetaker Staff and Submitted Written Comments**

- Advocating for its location.
- Advocating against the location.
- Concern over the welcoming nature of the facility. Wants youth to feel welcome and motivated to change. Advocating to make it look like a school and not a prison.
- Concerns about what happens when the facility fills up and where other youth will go.
- Advocating to postpone the decision until a new alderperson is elected in April 2023.
- Advocating to keep Felmers O. Chaney Correctional Center open, by supporting this new location.
- Concerns about the feeling of safety in the community with this facility in the neighborhood.
- Concerns that the decision is already final to build at proposed location.
- Questions and concerns about kinds of convictions that the youth will have that are living there.
- Concerns about gang activity in and around the facility.
- Concerns about visitors causing crime in the area and visitations increasing foot traffic in neighborhoods.
- Concerns and questions about how and when youth are transported in and out of the facility.
- Questions about budget, and daily and annuals costs. Concerns about how expensive this project is and its impact on taxpayers.
- Advocating that money be spent on prevention rather than a prison.
- Concerns that the facility is being built in a residential neighborhood.
- Questions about how youth will be paired in living units, types of cells, what goes on inside.
- Concerns regarding if youth will be outside of perimeter walls.

### **Operations, Security, & Employment Station Participant Comments Summary**

- Questions about how the new facility will prevent past abuses from occurring and how staff are held accountable.
- Questions about process for hiring staff, background checks for potential staff and volunteers.
- Advocating for communicating job opportunities to the local community.
- Questions about the how the location was determined.
- Concerns that the location decision was not transparent and moved too quickly.
- Concerns that new facility will reduce property values and increase crime.
- Concerns that the police department does not have enough resources to monitor neighborhoods and new facility.

**Summary from Volunteer Notetaker Staff and Submitted Written Comments**

- Concerns that district already has a jobcorps center and this facility will saturate the neighborhood and the district is already carrying too much for the city.
- Questions about what happens when a youth is having a bad day, how staff handle those situations.
- Questions and concerns about current consent decree and how that will impact new facility.
- Concerns that the new facility will revert to punishment/correctional models.
- Advocating against the mass incarceration of children.
- Advocating for residency requirements for staff at new facility.
- Questions about staff turnover and how that will impact operations at new facility.
- Concerns that current crime will increase in the neighborhood with new facility.
- Questions about the use of solitary confinement and restraints at the current and proposed facility.
- Concerns that the chosen location is a target-rich environment for criminals.
- Questions about whether the facility will be long-term or short-term.
- Questions about the transition plan from old facility to new facility.
- Questions about where girls will go and how the county will impact this new facility.
- Questions regarding recidivism rates and release procedures from the facility.
- Concerns that new facility will cause other potential business and residents not to move in the area.
- Questions about the difference between county and state facilities in the youth justice system.
- Advocating that money be spent on increasing transportation to and from Lincoln Hills/Copper Lake schools.
- Questions about the impact of family/parenting on the youth at these facilities and issues with neglect and abuse impacting neighborhoods.
- Concerns that the facility will be too close to victims.
- Concerns about the impact of this new facility to area schools and churches.
- Concerns that the facility will be too comfortable, nice and expensive.
- Questions about staff, process for discipline and accountability.
- Questions about staff uniforms and staff training.
- Questions about cultural competency among staff.

Meeting convened at 1:32 p.m.

**Present:** 6 - Nemec, Sas-Perez, Crane, Washington, Moody, Smith

**Excused:** 1 - Bloomingdale

**Also present:**

*Sam Leichtling, DCD Planning  
Kristin Connelly, DCD Planning  
Sydney Swift, DCD Planning  
Tayler Jones, DCD Planning*

- 1. Review and approval of the previous meeting minutes from December 5, 2022.**

*The meeting minutes from December 5, 2022 were approved without objection.*

### Zoning - Public Hearing 1:30 PM

- 2. [220878](#)** A substitute ordinance relating to the change in zoning from Industrial Light, IL1, to a Detailed Planned Development known as Wisconsin DOC Juvenile Correctional Facility to allow the development of a juvenile correctional facility located at 7930 West Clinton Avenue, on the north

side of West Good Hope Road, west of North 76th Street, in the 9th Aldermanic District.

**Sponsors:** THE CHAIR

*Appearing:*

*Secretary Kevin Carr, Wisconsin Dept. of Corrections*

*Lance Horozewski, Assistant Administration for Juvenile Corrections*

*Courtney Cooper, BWBR Architects*

*Sen. Lena Taylor, Wisconsin Senate District 4*

*Michelle Bryant, Sen. Chief of Staff*

*Carlen Michaels, Wisconsin Dept. of Administration*

*A presentation was made.*

*Public testimony in support:*

*Wendy Volz-Daniels, Chair of Felmers Chaney Advocacy Board, testified that the Felmers Chaney Center helped to locate alternative sites, that the new facility on Clinton Ave. was a better site would add value, that a smaller sized facility was better, that their facility should remain and should not be replaced as the site for the new facility.*

*Robert Dodds, Granville Advisory Committee member asked that the DOC provide the Granville Advisory Committee quarterly updates at their meetings and questioned the retention of staff, plan to assist potential businesses lost, and establishment of an economic trust fund.*

*Sylvester Jackson, Co-chair of Believers for Change, testified that he suffered trauma as a youth, was incarcerated, that the new facility was appropriate, that youth need their trauma to be addressed, that the DOC was trying to address youth trauma better, and that juveniles can be redeemed.*

*Rev. Joseph Ellwanger, resident, testified of not experiencing public safety and property value decrease issues living near other similar facilities in his area, that he had a pastoral background working with youth, not experiencing safety issues from other nearby centers, for the Chaney center to remain, and being support of restorative justice.*

*Public testimony in opposition:*

*Liz Hammer testified that the facility would negatively impact local business development and City's image.*

*Carolyn Allen, resident, testified of being a home owner nearby, being an educator, that the new facility would negative impact public safety to her residential neighborhood and the City's image, for there to be consideration of alternative sites, and that a type 1 facility was not appropriate.*

*Margaret Thorn, resident, testified of living and being a block watch captain nearby, having experienced crime in the area (break-ins), that residents wanted the neighborhood to be safe, that community meetings were not fair in providing opportunity to those in opposition to provide input, that local church members and businesses were in opposition, that some neighbors unable to attend meeting, and the lack of aldermanic representation.*

*Cherie Ray testified of staffing the vacant 9th aldermanic district office previously, that there were 95% in opposition at the time of her employment in office from community input, that there was a push to take advantage and rush approving the new facility during the aldermanic vacancy, that there was no aldermanic representation presently, that she had limited information to give to constituents at the time, that the previous alder was in opposition to the Clinton Ave. site being used for the new facility, and that money should be invested elsewhere rather than in a new juvenile detention center. She questioned the level of culturally responsive services and development and economic benefit that would be produced from the new facility.*

*Julio Ramos, south side resident, testified of being a community organizer, that there was neglect of addressing community needs overall citywide, that providing youths with services only after incarceration first was a wrong message, that investment should be to provide better services into communities rather than in detention centers/prisons, that prisons were a form of slavery without compensation for those incarcerated, and that there should be financial investment to youths and the community directly which was lacking.*

*Tresha Lovell testified that business development was declining in area, the new facility would worsen the decline and negative impact the business corridor, local businesses were against the new facility, a new facility would provide the wrong message, and that other alternative sites be considered. She inquired about next steps.*

*Bobbie Wendt, resident, testified that the new facility would oversaturate the area with training centers and was concerned about adequate staffing for the new facility.*

*Debbie Banks testified that there was lack of aldermanic representation to support the facility and hold DOC accountable, there was an unfair rush to push the facility through, that there be consideration of better sites, and that the local community did not want the new facility there.*

*Member Smith moved conditional approval, seconded by member Crane. (Prevailed 5-1)*

*Conditions:*

*1.) State DOC commit to periodic meetings with representatives of Granville Advisory Committee to discuss the facility.*

*2.) Updating the zoning exhibits to limit occupancy within the facility to 32 juvenile residents.*

**A motion was made by Willie Smith, seconded by Catrina Crane, that this Ordinance be APPROVED CONDITIONALLY. This motion PREVAILED by the following vote:**

**Aye:** 5 - Nemec, Sas-Perez, Crane, Moody, and Smith

**No:** 1 - Washington

**Excused:** 1 - Bloomingdale
