To The Honorable
Common Council

Subject: Proposed Study to Identify Potential Savings
And Operational Business Improvement Opportunities
For the City of Milwaukee Traffic Signal System,
Specific to Traffic Signal Indication Retrofits
Using Light Emitting Diode Technology

Dear Council Members:

Attached is a resolution pertaining to a proposed study to identify potential savings and operational business improvement opportunities for the City of Milwaukee, specific to traffic signal indication retrofits. The introduction of new Light Emitting Diode technology and new hardware improvements to permit longer service life will be studied by Johnson Controls, Inc. Study results may propose that a substantial portion to all of the retrofit work proposed by the retrofit aspect of this study be contracted out to private electrical forces.

Respectfully submitted,

Jeffrey S. Polenske, P.E.
City Engineer

Mariano A. Schifalacqua
Commissioner of Public Works
