5. DESCRIPTION OF PROJECT:

Tell us what you want to do. Describe all proposed work including materials, design, and dimensions. Additional pages may be attached via email.

1 - Spot tuckpoint the chimney from the roofline up with best matched mortar. Crown coat the entire crown wrapping up onto each tile by 1 inch. Waterproof the chimney from the roofline up.

2 - Spot tuckpoint the chimney from the roofline up with best matched mortar. Remove and dispose of crown/mortar wash. Form and pour a new 4 inch thick concrete crown with a 1 1/2 inch overhang. Waterproof the chimney from the roofline up.

3 - Spot tuckpoint the chimney from the roofline up with best matched mortar. Remove and dispose of crown/mortar wash. Form and pour a new 4 inch thick concrete crown with a 1 1/2 inch overhang. Waterproof the chimney from the roofline up.

4 - Spot tuckpoint the chimney from the roofline up with best matched mortar. Crown coat the entire crown wrapping up onto each tile by 1 inch. Waterproof the chimney from the roofline up.

5 - Waterproof the chimney with Chimsaver Water Repellent from the roofline up.

We will be using Type N Mortar with a Mortar Match to match the existing exterior mortar color.

The new concrete crowns will be constructed with QUIKRETE® 5000 Concrete Mix , reflecting the chimney that was most recently rebuilt. Remaining crowns that are not in need of full reconstruction will be sealed with CrownCoat in the color Buff Gray matching the color of poured concrete.

Chimsaver Water Repellent is a clear/non-visible sealant applied to chimneys designed to protect the masonry structure from absorbing moisture from the exterior leading to deterioration. There is no sheen/color to this product. It will not obstruct or change the appearance of the masonry it is applied to.

6. SIGNATURE OF APPLICANT:

Signature

Steven Pratt
Please print or type name
