Subject: Data Center - Midtown location

Some people who received this message don't often get email from cmakenna1@gmail.com. [Learn why this is important](#)

To whom it may concern,

The proposal to build a computer data center in the middle of a community that that is the last thing needed, should not be allowed! This community does not need a data center plaguing up the neighborhood, increasing our property taxes and overall just not providing a resource to the community members here who are literally in need! We are begging for this not be allowed and rather to have a grocery store or a pharmacy placed back within the community! You have allowed them to strip this community of the accessibility to the fresh foods we may need and you have stripped the community of being able to get the medication they need to manage their health. Being in charge of Milwaukee county, you should know and be ashamed of yourselves to know that this community is a food dessert! We have lost a decent amount of grocery stores in our area resulting in the need for many to travel distances that many may not even have the mobility to travel too just so they can have food in their homes! A data center will not fix this! We have bigger issues within the community than to be allowing something that would cause more damage to us than good. Residents should have access to their medications and specifically speaking to the fact that the hospital near by is Ascension St. Joseph's and when patients get discharged and they need to pick up a prescription, they HAVE to drive out towards neighboring cities such as Wauwatosa or near Brookfield just to obtain this medications so they do not end up back in the hospital or even worse, dead. The proposal to build a computer data center in the middle of a community that is starving, is the last thing that we need. Go do that else where, where there is nothing you can take from the people that already are struggling.
