

PETITION

We, the undersigned, in support of the opportunities to experience beauty, spiritual and intellectual upliftment, and the multitude of environmental services ie, biodiversity, water retention , heat absorption that Gardens provide not only support the plantings of a variety of plant material in the so called 'parkways' [between the sidewalk and the curb] and deem that the current ordinance is too restrictive. Specifically, we suggest that the 24" Plant ht. Be raised to "app. 36" furthermore this be applied through the length of the block. This would increase the amt. of species of plants available to the gardener. We wish to especially note our appreciation of the garden at 829 E. Townsend

Andres Rojas Andres Rojas

We've been trying for (20) years to grow grass on the street lawn to no avail. It is way too shady even for full shade lawn seed. So this area becomes an eyesore and a mud pot. We have a lot of wild critters in Bayview who the people love. And some of these plants feed them.
