Some people who received this message don't often get email from juniperlewis94@gmail.com. [Learn why this is important](#)

Good afternoon,

My name is Dr. Juniper Lewis and I live about half a mile from Midtown Center and the site of the proposed data center/data research facility. I love my neighborhood, my neighbors, and my Milwaukee community, but I am continually frustrated that I live in a part of Milwaukee that the city doesn't love back.

Data centers hurt property values, cause noise pollution, and use immense amounts of resources. Our neighborhood has so little support does not need to be the home of a building that will just take and take.

Has the commission considered the concerns of the community? Has research been done into the environmental and health impact of the data center?

I ask that the commission slow down and pause the construction of data facilities in our community. Do not make supporting the Northside contingent on taking away our resources as well.

Thank you for your time. I am happy to continue this conversation if needed.

Sincerely,

Juniper Lewis, Ph.D
