

The Spartan
A hand-drawn sketch of a gabled roof section showing a gutter and fascia board.

Details

*ALL TRIM SHOULD BE CLEAR, SMOOTH WOOD THAT IS FREE OF BARNWOOD AND OF A NATURALLY DECAY RESISTANT SPECIES INCLUDING RED CEDAR, WHITE CEDAR, REDWOOD, CYPRESS, WHITE OAK AND MAPLE.

*IF PINE IS USED IT SHOULD BE CLEAN, SMOOTH EASTERN WHITE PINE WHICH HAS MODERATE DECAY RESISTANCE. WESTERN PINE IS HIGHLY DECAY PRONE BECAUSE IT DECOMPOSES QUICKLY IN AN OUTDOOR INSTALLATION.

*IF PLAT TRIM AROUND WINDOWS AND DOORS, THE CORNER BOARDS, FASCIA, BOARDS AND CORNERS ARE ALL 5/4"

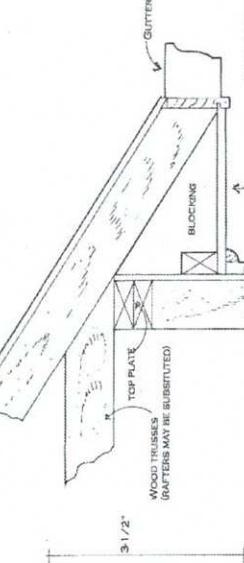

*RESEARCH HAS BEEN DONE THAT QUARTER-SAWN WOOD LAYS FLATTER AND PAINT BETTER AND GENERALLY LAST LONGER THAN PLAIN SAWN WOOD OF THE SAME SPECIES.

*RADIAL SAWN (A TYPE OF QUARTER SAWN) EASTERN WHITE PINE OR SPRUCE CLAPBOARDS ARE RECOMMENDED.

• PLEASE NOTE THAT QUARTER-SAWN WOOD WILL LAY FLATTER AND PAINT BETTER AND GENERALLY LAST LONGER THAN PLAIN SAWN WOOD OF THE SAME SPECIES.

• RADIAL SAWN (A TYPE OF QUARTER SAWN) EASTERN WHITE PINE OR SPRUCE CLAPBOARDS ARE RECOMMENDED.

• RESEARCH HAS BEEN DONE THAT WHEN NEW, EASTERN WHITE PINE IS LEFT EXPOSED TO THE ELEMENTS FOR ONLY 10 YEARS, THE LIFE OF THE PANT IS 100 YEARS. IN 20 YEARS, THE LIFE OF THE PANT IS 50 YEARS. THIS IS NOT TO SAY THAT IT IS LIKELY TO BE DECREASED BY PLATING AND PAINTING WOOD PRIOR TO INSTALLATION, BUT IT CAN INFLUENCE THE LIFE OF THE WOOD AND THE FINAL PAINT COLOR.

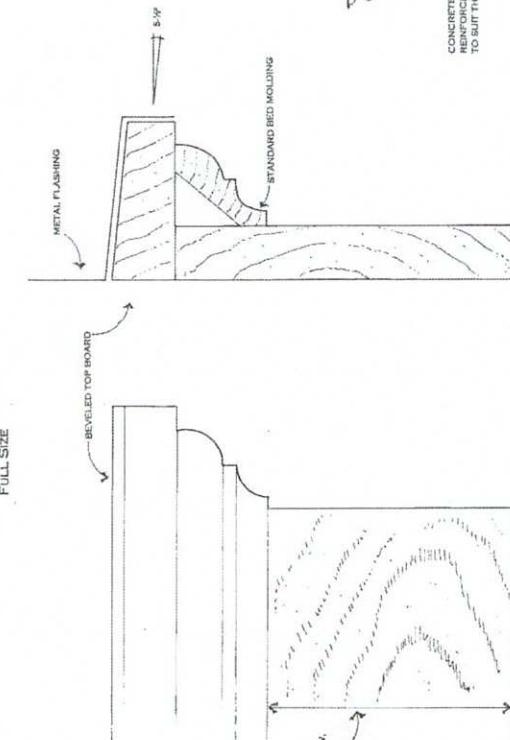

NOTE: FASCIA BOARD
IS ONE BOARD THICKER
THAN SOFFIT AND COVERED
THE BACK OF THE GUTTER

OPTION C
SOLID CORNER

CORNER BOARDS
OPTION B
TRADITIONAL

OPTION A
QUARTER ROUND

TIE MEASUREMENT IS 4-1/2" FOR
THE TOP OVER THE SERVICE DOOR AND WINDOW.
THIS IS INCREASED TO 5 1/4" OVER THE
MAIN OVERHEAD GARAGE DOORS.
