

Conference and other forums, Sweet Water representatives are active in promoting innovative approaches at statewide and national events such as the annual conferences of River Network, Land Trust Alliance, Healing our Waters and the Clean Water America Alliance. The City's *Milwaukee's Greenscape* efforts will be shared across a variety of national water quality forums. Working together, the progress made using green infrastructure in the area has national implications for adaptation and replication across the Great Lakes and the country.

Budget Narrative

The City of Milwaukee will use federal funds to install 28,865 ft² of green infrastructure including green alleys, porous walks and stormwater parking. The requested \$1,000,000 federal funds will cover the porous pavement cost only. The City will provide \$2,120,000 in match funds for project engineering, design and construction. The City will perform engineering, design and inspection of the green infrastructure and contract for project installation. The City will perform project management, outreach, coordinate with project partners and issue a final report to the US EPA as part of the project.

Milwaukee's Greenscape – Green Alleys, Porous Walks and Stormwater Parking budget details include:
