Re: Request for Higher Level of Water Service

Dear Ms. Lewis:

Thank you and Mayor Barrett for considering our request for a higher level of service from Milwaukee Water Works. Please consider this letter as the Village of Greendale's formal request for a higher level of service. Under the present Agreement, MWW provides Greendale "unlimited, uninterrupted service of standard quality water at pressures at or in excess of 11 pounds per square inch (HGL=836.0) measured at the center of the outlet flange of the meter when the flow of water does not exceed the rated capacity of the meters (5.75 mgd)." Under this request, the requested pressure will be increased and the requested flow will decrease slightly.

### Requested Service

The Village of Greendale requests a total flow rate of not less than 5.25 mgd at the minimum hydraulic gradelines shown in Table 1.

Table 1 Minimum Hydraulic Guidelines

Connection		Elevation feet (a)	Min. Pressure psi (a)	Min. HGL feet
Point	Type			
S. 60th St at W. Edgerton Ave.	Primary	817.0	46.75	925.0
S. 68th St at W. Edgerton Ave.	Secondary	788.0	59.30	925.0
S. 43rd St at W. College Ave.	Secondary	810.0	47.60	925.0

MWW would only be required to provide the minimum hydraulic gradelines indicated in Table 1 when the flow rate at each secondary connection point was less than or equal to 1.50 mgd and the aggregate flow through the three connection points was less than or equal to 5.25 mgd.

September 1, 2011

Ms. Carrie M. Lewis, M.Sc., Superintendent

We have been planning for the replacement of our elevated storage tank for more than a year. Your response to this request will determine the size of the new elevated tank. Because construction will take approximately a year, the Village of Greendale requests the City's prompt attention to this request.

If you have any questions about this request, please contact me at (414) 423-2100.

Sincerely,

**VILLAGE OF GREENDALE**
