Re: UW-Milwaukee (Formally Columbia Hospital)  
Northwest Quadrant Renovation Project –  
Demolition - Building A - Mitigation Plan  
3321 North Maryland Ave

WHS Reference #106495  
DFD Project # 17B10

Tyler,

I was reminded that we need to officially notify Wisconsin Historical Society all mitigation requirements agreed to in the 2/2/19 letter, have been completed. We were delayed in engaging the survey consultant due to his previous commitments, so we did not get all the items done the debated promised June 2020. The only delivery we still need to make is the physical thumb drive of the photos. See my notes next to the scope items below.

1. We will undertake digital images of all elevations of the exterior, and character defining features of the interior, including photographs of the defining spaces such as lobbies, stairwells, corridors, gathering spaces, and a representative room from each floor. (The UW-Milwaukee Campus will accomplish this) *(Photos taken 10/6/2020. Due to the file size we will transmit to you via campus [shared folder link](#) and thumb drive)*
2. Written data: We will compose a summary of the building history in a 200-300-word document for your agency to upload into the AHI. (The historic consultant to Kahler Slater will compose this) *(Completed by Charlie Quagliana dated 9/30/2020)*
3. We will undertake a survey of UW-Green Bay, Parkside and Superior as they were not Certified Local Government's (CLG) at the time of the recent UW System building survey. *(It is our understanding the consultant had uploaded all the additional data into the WHS AHI.)*

At this stage we usually receive a response and approval from your office of the plan of action. We look forward to our continued mitigation consultations for the demolition of the UW –Milwaukee NWQ – Building A. Please do not hesitate to contact me should you have any additional questions or concerns.

Sincerely,

Maura A. Donnelly
