

**ALEXIAN
BROTHERS**
Alexian Village of Milwaukee

October 20, 2010

To whom it may concern,

Alexian Village of Milwaukee is planning a small expansion of our campus. We currently have one hundred eight nursing home bed licenses. Ninety-five of the beds reside in our nursing home building (Health Center) and thirteen reside in our independent living building (East Building). We are proposing to build a small wing off the front of the Health Center and move the thirteen nursing beds from the East Building into the new wing in the Health Center.

Our reasoning behind this expansion is we believe it would be easier for us to manage all the nursing beds out of one building as opposed to two buildings. We also believe it will give us the opportunity to help grow our assisted living business.

We have looked into all the requirements and standards listed by the city of Milwaukee and believe we have met them. Please see the attached drawings for more details. Thank you.

Sincerely,

John Koeper
