Subject: In Support of File 220401

You don't often get email from gary@ggis.biz. [Learn why this is important](#)

Hopefully this is not sent too late to be considered.

I live on Shepard Ave about 6 blocks from the proposed development. Looking over the building plans and the current site usage, I think this is not only an acceptable proposal but is almost exactly the type of additional development my area of the city needs.

I did watch the stream of a previous meeting on this proposal and heard the concerns of a few of the neighbors. It seemed to me that all of their concerns were reasonably and effectively addressed.

Again, I support the change in zoning to RM6 for the proposed development on N Hackett. Unfortunately, I will not be able to attend this meeting either in person or on the stream.

Thank you,

Gary Dalton
