Mark Nicolini Budget and Management Director 200 East Wells Street Milwaukee, WI 53202 Derek C. Mosley, Presiding Judge Branch 2

Valarie A. Hill, Judge Branch 1

Phillip M. Chavez, Judge Branch 3

Kristine M. Hinrichs
Chief Court Administrator

Sheldyn M. HimleAssistant Court Administrator

Attached please find the Municipal Court's Capital Improvements Program (CIP) requests for 2012. These requests address two critical infrastructure and safety needs facing the Court and are summarized below:

<u>Datacenter Air Conditioning Unit Replacement.</u> The Court's work and public areas are served by the Police Administration Building HVAC system. However, the Court datacenter is served by a dedicated air conditioning unit intended to ensure dedicated and uninterrupted cooling. It is critical to Court operations to maintain the functioning of the datacenter as a failure will jeopardize the functions of the \$100,000 in capital assets housed in that room and, therefore, the functioning of the Court.

This air conditioning unit was installed in 1993-95 when the datacenter was constructed. The unit has reached the end of its useful life. Over the last few years we have had to make major repairs and have another, the \$3,700 replacement of the circuit board, pending. The contractor finds it very difficult to secure replacement parts on a unit of this age – making repairs expensive and leaving the Court vulnerable should critical parts not be available in an emergency situation. It is important to replace this unit in a planned and structured fashion rather than as a response to an emergency situation.

Panic Alarm System. We believe that the original panic alarm system was installed when the Court moved to the Police Administration Building. This system is no longer operational and leaves the Judges, staff and public vulnerable in the event of an emergency situation. Court staff consulted with MPD on this issue a few years ago due to a concern with this safety issue. At that point they indicated that the system did not function and could not be repaired. They recommended the use of a system to "speed dial" the security station in the event of an emergency. While this system has been implemented, it is simply a "make do" solution and does not provide for a sufficient level of protection in a critical tactical or medical situation.

The Court's request includes the installation of panic alarms in each court room at the Judge, Court Clerk (2), and bailiff stations and at the Reception window. Monitor panels will also be installed at each bailiff station to alert them to emergencies in another court room. The system will be tied to the security station at the entrance to the PAB and to the 1st District station on the second floor. This will allow for immediate response in a critical situation.

It is unfortunate that such security measures are required. However, the Court believes that we have the obligation to install this system to protect the safety of our Judges, staff and the public.

Cost estimates for both projects are based upon quotes provided by a vendor familiar with the Court's current systems. Quotes were not requested from other suppliers or vendors.

Thank you for your consideration of this request. I will be happy to respond to any questions you or the Committee have with regard to these two projects.

Kristine M. Hinrichs

CIC - Capital Improvement Request Part III

Department:	Municipal Court	Data Culturit	
Project/Program.	Datacenter AC Replacement	Date Submitted:	3/28/2011
Prepared By:	Jane Tabaska	Current Description	
Dept Head:	Kristine Hinrichs	Current Request:	\$54,000
		6 Yr Total.	\$54,000

General Project/Program Description:

This project will replace the original Liebert air conditioning unit installed in the Municipal Court's datacenter when it was constructed between 1993-1995. The unit has exceeded its life expectancy and no longer provides sufficient and dependable service to maintain required environmental conditions in the datacenter to protect the Court's primary network equipment.

Whenever possible, please quantify the impact of the project in either the amount column or the comment section of each area. Supporting documentation does not need to be submitted with the request but should be available upon request. Please see Capital Guidelines for detailed descriptions of each area of emphasis and additional considerations.

Comments / Other Considerations:

Χ

Replacement of the AC unit will avoid ongoing lifecycle costs associated with maintaining the current, aged unit -- expenses which have run upwards of \$3,000 annually in parts and labor to keep the unit functional. More importantly, however, is that failure or malfunction -- for which there is currently a very significant possibility given the condition of the unit -- could damage any or all of the network equipment housed in the datacenter, which represents capital assets of mor than \$100,000 and hosts the Court's mission-critical case management information system.

Will this project cause disruptions to regular city operations?

Does the project involve specific energy reduction strategies or features?

Are there other potential costs associated with this project that are not addressed above?

Yes	No	N/A	Amount	programs
Χ	A,		***************************************	How does the request effect the pertinent replacement cycle? Provide specifics below
Χ	• • • • • • • • • • • • • • • • • • • •			Has the facility being replaced exceeded its useful life?
	Χ		,	Does this project extend the useful life of an existing facility?
	Χ		***************************************	Do maintenance costs exceed replacement costs? (See Below)
Х				Have you documented costs of unplanned or corrective maintenance related to the facility?
	Χ			Does the project incorporate new technology that will provide enhanced service?
	Χ			Does the project extend service for new development or redevelopment?
	Χ			Will this project improve the functionality or service life of other related infrastructure?

Comments / Other Considerations:

The current AC unit has exceeded its replacement cycle of 10 - 15 years. By replacing the unit, the Court can expect 10 - 15 years of service from the new unit. In 2010, the Court expended \$3,829 in repairs to the unit and was recently provided with a quote of \$3,695 or more needed repairs. This kind of annual expenditure would be required to further extend the life of the current unit.

Department [,]	Municipal Court	nate.	Submitted	3100/0044
Project/Program:	Panic Alarm System	Date	Odbitilited.	3/28/2011
Prepared By:		Curre		
Dept Head	Kristine Hinrichs		ent Request:	\$23,000
	TOTALITE THITTICALS	6 Yr 7	Fotal:	\$23,000

General Project/Program Description:

There is no functioning panic alarm system to serve the Court's three court rooms, reception area, or costing area. There is no way for bailiffs or staff to alert MPD security should a dangerous situation arise. This project would involve installation of a panic alarm system to alert building security and 1st District staff in case of an emergency to allow for an immediate response.

Whenever possible, please quantify the impact of the project in either the amount column or the comment section of each area. Supporting documentation does not need to be submitted with the request but should be available upon request. Please see Capital Guidelines for detailed descriptions of each area of emphasis and additional considerations.

Would an alternate location for this project provide a greater positive economic impact? Will the project produce desirable jobs in the City? Will the project rejuvenate an area that needs assistance? Will the project promote the equitable distribution of the costs and benefits of development? Special Considerations Is there a significant external funding source that can only be used for this project and/or which will be lost if not used immediately (e.g. proffers, grants through various federal or state initiatives, and private
Yes	No No No	N/A X X X X X X Other C	Amount	Does the project have the potential to promote economic/community development in areas where growth is desired? Will the project continue to promote or enhance economic/community development in an already developed area? Is the net Impact of the project positive? Would an alternate location for this project provide a greater positive economic impact? Will the project produce desirable jobs in the City? Will the project rejuvenate an area that needs assistance? Will the project promote the equitable distribution of the costs and benefits of development? Special Considerations Is there a significant external funding source that can only be used for this project and/or which will be lost if not used immediately (e.g. proffers, grants through various federal or state initiatives, and private donations)?

Comments / Other Considerations:

The impact of delay can't be quantified except to note that a dangerous incident could occur at any time on any day. Should such an incident occur without the capacity to immediately call for help, significant injuries or other effects could result.
