I have worked in Milwaukee in the 13th Aldermanic District since 1980. I have been married for 25 years with 2 children, one is attending UWM and the other will be entering High School next fall.

I started working at Advance Transportation on S. 6th St. in the rating and billing department. Over the course of my career in the trucking industry I worked my way through the Cartage dept, Licensing, Fuel tax reporting and maintenance. In 1990 I was voted to the Board of Directors and became the Vice President of Maintenance. At the same time I pursued my pilot license and became one of the corporate pilots for the organization. In 1994 Advance merged with ANR Transportation and I was involved extensively in the negotiations of the merger for the Advance side. We combined the two companies ANR/Advance Transportation and became the largest Milwaukee based carrier grossing over \$250,000,000 in annual revenues. As Executive Vice President of the new organization I was responsible for all of the equipment maintenance, purchases along with Real Estate transactions.

In 1996 I decided to leave ANR/Advance and pursue my own business by partnering with my brother in what is now known as Lindner Logistics. We stay focused on building a strong business on the south side focusing on distribution and storage.

I became involved in the AGBA as I have watched the district progress over the years. I strongly believe we as a group can make a difference in this area by getting involved. My objective is to carry out the Mission of the AGBA and continue to work on the goals that have been set forth by our Board of Directors.
