Enclosed are two copies of a proposed resolution to create a contribution account (Council file 131656) to accept and expend rebates for energy efficiency and renewable energy projects. OES has recently received approximately \$27,000 in rebate checks from Focus on Energy for energy efficiency projects completed on City facilities in 2013. OES proposes to reinvest those funds in additional energy efficiency or renewable energy projects in 2014 and beyond, including energy efficient lighting in Milwaukee public libraries, fire stations, and other municipal facilities.

Please let me know if you have any questions or concerns.

Erick Shambarger

Deputy Director of Environmental Sustainability
