
RECAPITULATION

- *Settled on aluminum with blue paint*

- Aiming for PMS 286C

- *Using two vendors, patron will choose*

- “Made in Milwaukee” version with call out that will reduce word count slightly
- Prototype file in Tom’s hands, working out production schedule currently
- Pricing info from Tom will come after prototype is totally complete, and will be added to the website
- Reiterating that this first prototype will be observed, it’ll be a real test of materials/environment
- Templates are finished – if aluminum should prove too unstable despite proper maintenance, changing metal will only require a change of cost estimates from vendors
