Dear Aldermen,

I am emailing to express my support of the trap-neuter-release program for feral cats, along with the recommendations put forward by the Wisconsin Humane Society.

The cumbersome requirements in the current program make it too hard for residents to participate. But if you eliminate the TNR program completely, some people will be less likely to bring cats in for fear of them being killed. Either scenario will result in more unfixated, unvaccinated cats roaming loose.

Getting rid of these extra requirements will make it easier for people to have stray cats fixed and vaccinated, which will both reduce the population and reduce problems like spraying and aggression which are associated with feral cats. Thank you for your consideration.

Sincerely,

Anne Wallenfang
