

Kraft Foods

NICK MERIGGIOLI
PRESIDENT
OSCAR MAYER

July 21, 2008

TO: Alderman Bohl

Dear Alderman Bohl:

As the President of Oscar Mayer headquartered in Madison, I am writing to thank you for the leadership you have demonstrated by introducing the proposed resolution to “support efforts to discontinue federal corn ethanol mandates and cease incentives for corn ethanol production.”

As one of more than four thousand Kraft Foods employees in Wisconsin, we recognize that renewable energy and bio-fuels play an important role in sustainable energy for America – improving our energy security and enhancing the economic future of our children. However, recent government policies with regard to bio-fuels have resulted in unintended consequences, including contributing to higher commodity prices, heightening the risk of environmental damage, and tightening supplies of food aid to the poor.

Again, we appreciate your introducing this resolution and are hopeful it will be approved this afternoon.

Sincerely,

Nick Meriggioli
President
Oscar Mayer
