I WAS parking my motorcycle
in front of my house, when
something came CRASHING down
on my head, I thought that I may
been shot or something, Next
thing I know, some strangers
was lifting my bike up and help-
ing me up as well, Don't know
how long I WAS out, but WAS
real dizzy and my head and
NECK and BACK WAS hurting
real bad, so I had my son
come and take me to the
ER, I WAS there for hour
terrific Pain, difference pain
meds but didnt work, Pain
WAS still there, going to
pain doctor as of now 9/15/15
still have a little pain in my
Neck and Back, every now and
I get a bad Headack.

IN the Past I've Can the
city about the large tree &
its branches, because they
would grow over the top of
the house roof, And I'm
afraid that the branch
would knock off my shingles
so they have come out and
would trim to a certain extend
but I think the tree has
a lot of rotting branches on
it, but I'm not a expert, but
now I'm afraid of my the
tree in front of my house
still have Night mare about it,
I have ask my Psychiatry to
up my medication, I'm having
more than usual Panic attacks
Sorry about this, Why this
had to happen to me, Scared
of the tree in front of my
house please help. Damage
to my bike is minor but the Pain^{is}

The staff of Aurora Health Care would like to thank you for allowing us to assist you with your healthcare needs. The following includes patient education materials and information on how best to care for your illness/injury at home and when to see a physician. If you need to locate a Doctor or clinic close to you, please call the Doctor Referral Service at 1-888-863-5502. The Service is available Monday through Thursday from 8 AM to 8 PM and Fridays from 8 AM to 4 PM.

Patients Please Note: If further time off is required, or a medical clearance to return to work is required, it must be obtained through your primary physician. Return to work clearances and extensions of "Time-Off" will not be given by the Emergency Department.

We hope that you leave our Emergency Department believing that we provided you with very good care.

Your Opinion Matters To Us

If you receive a patient satisfaction survey in the mail, please complete and return it in the postage-paid envelope. We truly value and appreciate your feedback.

Discharge Instructions**Contusion, Back**

You have a CONTUSION of the back. This is a bruise with swelling and some bleeding under the skin. There are no broken bones. This injury takes a few days to a few weeks to heal. It is normal to feel muscle stiffness and aching in the area of injury the next day.

Home Care:

- 1) Rest and relax your back muscles until you are feeling better.
- 2) Apply an ice pack (crushed or cubed ice in a plastic bag, wrapped in a towel) for 20 minutes every 2-4 hours during the first two days after a new injury. Local heat (hot shower, hot bath or heating pad) and massage will help reduce muscle spasm. Some patients feel best alternating treatments. Use the method that feels best to you for.
- 3) You may use acetaminophen (Tylenol) or ibuprofen (Motrin, Advil) to control pain, unless another pain medicine was prescribed. [**NOTE** : If you have chronic liver or kidney disease or ever had a stomach ulcer or GI bleeding, talk with your doctor before using these medicines.]

Follow Up

with your doctor or this facility if your symptoms do not start to improve after three days.

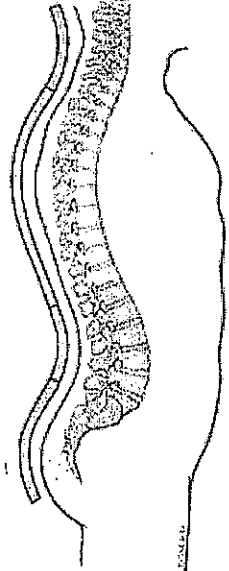

[NOTE: If X-rays were taken, they will be reviewed by a radiologist. You will be notified of any new findings that may affect your care.]

Get Prompt Medical Attention

if any of the following occur:

- Pain becomes worse or spreads to one or both legs
- Weakness or numbness in one or both legs
- Loss of bowel or bladder control
- Numbness in the groin or genital area
- Redness, warmth or drainage from the skin

Procedures and tests performed during your visit

CT Cervical Spine
 CT Head Brain
 XR THORACIC SPINE 3 VW INCL SWIMMERS

Procedures

None

Imaging Results

XR THORACIC SPINE 3 VW INCL SWIMMERS (Final result)

Result time: 08/13/15
 17:48:51

Procedure changed from XR Thoracic Spine AP and Lateral

Final result

Impression:
IMPRESSION:

- 1. No acute fracture.

Narrative:

EXAMINATION: XR THORACIC SPINE 3 VW INCL SWIMMERS

INDICATION: Back pain following trauma..

COMPARISON: None.

FINDINGS:

The osseous structures are diffusely demineralized. The thoracic vertebral bodies are uniform in height and alignment. There is mild narrowing of the mid thoracic intervertebral disc spaces. Small anterior osteophytes involve the mid and lower thoracic spine.

The pedicles are preserved. No paravertebral abnormality is identified.

CT Cervical Spine (Final result)

Result time: 08/13/15
17:13:23

Final result

Impression:
IMPRESSION:

- 1. No acute intracranial abnormalities.
- 2. No acute osseous findings of the cervical spine.
- 3. Probable left thyroid nodule, which is incompletely visualized. Further evaluation with dedicated thyroid ultrasound is recommended.

I have reviewed the images and agree with the resident's interpretation.

Narrative:

CT HEAD WO CONTRAST, CT CERVICAL SPINE WO CONTRAST

HISTORY: Head and neck injury.

COMPARISON: None.

TECHNIQUE: Multiple axial images were obtained through the head without intravenous contrast. Multiple contiguous helical axial 0.625 mm images of the cervical spine were obtained from the skull base through the lung apices without intravenous contrast. Sagittal and coronal reformatted images were performed by the technologist and submitted for review.

FINDINGS:

HEAD:

No intracranial hemorrhage or abnormal extra-axial fluid collection. No evidence of mass, mass effect, or midline shift. The ventricular system is midline. The gray-white matter differentiation pattern is preserved. Allowing for beam-hardening artifact, the posterior fossa structures are unremarkable.
