* For comparable vehicles that are available, the price listed reflects a projected sales price. The projected sales prices for which the vehicle is projected to sell for based on analyzing sold vehicle data for that specific year, make, model vehicle.

✓ Vehicle is equipped with specified equipment.

× Vehicle is not equipped with the specified equipment.

Age of Ad Adjustment: An adjustment made to advertised vehicles based on the difference between the ad publication date and the loss date.

Local Market Average: A vehicle representing the weighted average derived from all comparable vehicles used in the valuation.

Establishing Base Value: When calculating the Base Value, adjustments are made for differences in vehicle type, odometer and equipment between the loss vehicle and comparable vehicles. Only the vehicles shown in this report were used to determine the Base Value.

Market Value: The market value is calculated by comparing the loss vehicle to comparable vehicles recently sold or available in the loss vehicle local area. The appropriate adjustments for differences between the vehicles have been made to establish market value.

Mileage Adjustment: When adjusting for odometer variance, a positive adjustment is made to a comparable vehicle with a higher odometer reading than the loss vehicle because it would be worth more if it had fewer miles. Likewise, a negative adjustment is made to a comparable vehicle with a lower odometer reading.

Vehicle Type Adjustment: The Vehicle Type Adjustment may include differences in submodel, body style, engine, and drive train between the loss and comparable vehicles.

Weighting Factor: Percentages may not sum to 100% due to rounding.

Search Radius used for this valuation: 150 miles from loss vehicle zip code.
