5. DESCRIPTION OF PROJECT:

Tell us what you want to do. Describe all proposed work including materials, design, and dimensions. Additional pages may be attached.

We are proposing a 30" overall width welded bracket sign with digitally printed sign faces. The sign faces will be 2D. The will consist of a UV laminated digital print applied to 1/4" aluminum composite panels, routed to a circular shape.

The bracket will project an overall width of 30" over the sidewalk. The sign faces themselves are 26x26". There will be two sign faces, affixed to either side of the fixed vertical metal bars. This will be a non-swinging design. It will be drilled into the concrete column that is immediately to the north of the entrance door. The sign faces will have approx 10'-6" of clearance between them and the sidewalk.
