Subject: RE: 522 N. Water Street Signage

Good morning Tim,

Regarding our phone conversations yesterday & today, the sign company is strongly suggesting using VHB adhesive tape to mount individual letters to the fascia.

We completely understand that you are trying to preserve the historic fascia on the building, and we want to help preserve it.

We feel that adhesive tape would cause less damage to the fascia than drilling several holes into the wood to mount raceways to the building.

We appreciate your understanding & verbally approving the letters being mounted to the fascia using adhesive tape.

Please send us confirmation that you have approved this & let me know if there's anything else we need in order to move forward with this.

Thank you,

Nicole Helminiak Executive Assistant
