Subject: 1550 Project Letter of Support
Date: Monday, August 14, 2017 1:13:35 PM

As a resident and business owner in Milwaukee of I am fully aware of what Chris Houden is proposing for the 1550 project. A project that will add a new and approachable place of residents for Milwaukee. A new value to our skyline and design that targets the millennials that our city needs to help it grow.

I have heard of objections regarding the structure, parking, its placement and the preservation of the Goll Mansion that is on the site. These are all things that are valid but to my knowledge have been addressed in the plans. It is our responsibility as a city not to create barriers to our growth but instead to collaborate to create solutions. Milwaukee is in a state of rapid change and growth. The only way we can truly see this through is by being open to what is inevitable.

Many other developers in the city have used city funding to get their projects off the ground. This is one that is not doing that and will drive over 2 million in revenue through taxes to the city. A city that suffers from a shortage in funds on an annual basis. Creating countless jobs throughout the duration of the process as well. Leading to more economic value as the project begins to go up.

There will undoubtedly be some issue with congestion while the building is going up. This is a short-term sacrifice that will create a long-term return on investment. I am sure as the people of our city become more aware they will support this project. A project that will make our city more profitable and beautiful.

Your passion and value for our city is the reason why you are in the position that you are in. Let's work together with those willing to invest in our city to lift them up. This will only attract more outside money into our city and drive us to become profitable.

Sincerely;

Nathan D. Harris
